APPENDIX 01

List of Essays

Essay 1

Fashion is a dress style that determines one's appearance. Of course, everyone has their own fashion, include my close friends exactly my friends in senior high school and in the college. They have their own fashion and different with one another. The choice of the type of fashion depends on the characteristics. We can see their habit and also characters from their fashion selection. (D12, E1, PRL). I classify my close friend's fashion into three types, namely casual, chic, and sophisticated.

Casual fashion is the most famous type and is the one of everyone's favorite, include my close friend. On average, my close friends interested with this type. Seen from the result of the data, that 74% (20 people from 27) chose this type. They love this fashion because gives women the opportunity to be fashionable and comfortable at the same time (Laren). They prefer to choose T-shirt than another dress to hang out (D6, E1, ATH). They are also not shy if hanging out wear a basic dress. In my opinion, the type of person who interested it doesn't like things that are complicated and indeed most of my close friend looks like that.

Chic is one of fashion world's signifiers of choice and the one of popular fashion styles in the world. My friends who are very concerned about her style are classified into this type. They are sometimes embarrassed, when using inappropriate clothing in the public place. After I did a little research, I got the data that 22% (6 people from 27) indicate into chic fashion. They love to look stylish and not tied to trends (Mandasari, Brilistyle, 2017). They very selective to choose their outfit to look fashionable, for the example, they prefer to use dress instead of using a T-shirt to make it look unusual. In my opinion, the people who have chic fashion taste are not too many and maybe only middle to upper class people like it because it's easy to get the style they want.

Sophisticated fashion is a type which has high and classy fashion taste (Mandasari, Brilistyle, 2017). Maybe Sophisticated type of fashion which we rarely hear because any reasons. A sophisticated person who interested in this

fashion always has the perfect look. In my research there is only one person or 4% who indicated into sophisticated fashion. She basically has classy fashion sense and looks from the outfit she wears when hanging out. Sometimes the person of this type like shopping for clothes. In my opinion, they will not be confident when wearing the wrong clothes in a public place and always be perfect look and attract to attention.

Actually, there are many types of fashion that exist in this world. There are only three dominant ones seen in my close friend and most choose casual than two others. Indeed, casual is easier and less complicated, so people prefer this one. In my opinion, all kinds of fashion are very good and nothing bad. The most important thing is that we can be confident with what we use.

Essay 2

MLTR (Michael Learn to the Rock) is a soft rock and pop rock band and has twenty-seven albums. Colour is the second MLTR's album. It was released on October 1993. One of the single is my favorite, namely "Complicated Heart". This song always set my mood into mellow because of the lyrics, the instrument, and the experience about this song.

First, this song have the lyrics are simple and deep meaning. The song has quite complicated lyrics but it is not difficult to interpret the lyrics. (D7, E2, ATH). Every sentences have clear meaning and to the point. I can immediately feel the meaning of the lyrics. This song explains about someone who still love is ex while his ex still want to break up. I suddenly feel mellow and weep.

Second, this song has instrument is very unhurried. Jascha Richter as the lead vocal, he is very perfectly to bring this song. Mikkel Lento as guitars is very good playing the musical instrument. Kare Wancer as drummer is very perfectly playing drum instrument. The combination between lyrics and instrument make me very sorrow. I feel the melody and rhythm are harmony and match with the lyrics of the song. I will be sleepy because the instrument is very suitable for lullabies.

Third, I know this song from my mother. She often plays the song every night. This song was a sing when my mother and father were dating. (D28, E2, MTY). I feel how this song touches my heart very deep. (D32, E2, HYB). Meanwhile, my mother and father are already divorced. The lyrics and experience about this song are same. I love this song because this is one of the memories of my parents.

At least, this song always can set my mood to be mellow. The lyrics are very meaningful, the instrument very calm, and this song also always be my memories for me. I cannot forget my experience about this song. So far, this song is perfect to make me sorrow. MLTR very successfully brought this song. I am as listener very satisfied with this song.

Essay 3

This year one of the song entitle "*You're the Reason*" by Calum Scott become popular. One of the applications that mostly used to listen to the songs named JOOX which is very popular nowadays. (D29, E3, MTY). The percentage of genres songs by JOOX there are POP 81, 4%, R&B 34, 9%, Jazz 34, 1%, and Rock 21, 2%. From that report, POP genre song is the favorite one for teenagers in this world including me. I love this song because when I'm hearing it I fell emphatically.

The feeling of emphatically suddenly appear when this song is playing. This song can touch my soul indeed, because it has deeply meaning of the lyrics. (D33, E3, HYB). Lyrics by Wikipedia are words that make up a song usually consisting of verses and choruses. (D30, E3, MTY). In this song, the meaning of the lyrics is expressing the writer's emotion that make the audiences will feel and imagine the writer's situation. Actually, the sentences that can make me feel emphatically generally are existing in the figurative language of the lyrics. For example, *"I climb every mountain and swim every ocean"* is a part of lyrics that really make me full of imaginations like doing that kind of activities.

Besides that, this song gives the same effect to my friend. It will make her sing from the beginning till the end of the song. (D45, E3, OXY). Sometimes,

when we are <u>hearing</u> together, she would be <u>looking</u> at my expressions clearly. (D13, E3, PRL). She feels that I'm became another person with different personality. My friend and I also have the same assessment toward this song. We know that this song tells about a couple who have LDR (Long Distance Relationship) or being break up but still in a same feeling.

Furthermore, the best place to listen or enjoy this song is in my room. My room becomes my favorite place because I feel so safe and calm. In my room, it has a mirror that can help me to look for my expression during listening or singing a song. I will close the door and being alone to feel the melody of the song. Sometimes, I feel as a professional singer on the stage when I sing with my feeling.

So, those are the reason why I love this song entitle *''You're the Reason''* by Calum Scott and very recommended for who really like to have a lot of imaginations. Have you ever felt the same feeling like me? I think most of the people will have the same feeling about this song, but not all people will have the same favorite song. Just make sure that you know the meaning of the song first in order to understand and imagine the song by your own self.

Essay 4

As we know, all people around the world like listening to the music. They like the music maybe because the genre or the music can describe their feelings. Like the other people, I also have my favorite song; it is "Perfect" by Ed Sheeran. This song is one of a romantic song I ever heard. Now I will describe how this song can change my mood and affects the environment around me.

First, I fell so happy when I play this song because it's make me imagine how my love story will be. <u>This song got me drifting in the illusion</u> that my love story will be as romantic as in the song. (D31, E4, AGY). The rhythm of this song so soft and it makes me calm down. Be- cause the rhythm so soft and can make me feel calm down, sometimes I fell asleep while listening to this song. When I fell asleep, I'm dreaming about my future with my boy- friend cause the effect of hearing this song many times. And when I woke up from my beautiful

dream, I feel a little bit sad because <u>it is only in my dream not in the real life.</u> (D8, E4, ATH)

Second, not only can change my mood its turn out effect to the people around me said that I quieter when I hear this song. That's true because this song makes me feel so calm. They also said that I look so happy. They say like that because they see <u>my face turns red</u> when I play this song. (D41, E4, SYB). They think that I'm in love or thinking about a romantic thing. I can't deny it, all they said and they think about me when I play this song that's

Third, this song also affects the environment around me. I remember when my boyfriend and I ate in a restaurant; the restaurant played my favorite song "Perfect". In that time, the situation was so calm; all the customers look so quiet. The customers who are standing in line seen so patient wait their turn. They seem like they enjoy the music. On the other case, the customers also enjoy the food they have orders. I also see some customer also sing this.

Whatever the song I like, it depends on my situation. If I'm in love, maybe I will like a romantic song and play it couple time or if I'm sad maybe I will like the sad song too. The song not only can change my mood but it does also can affect the people around me and the environment around me.

Essay 5

Many collages in Indonesia have a rule for the students, where students are required to collect the points because it would be eligible for graduation. For collecting points, students usually join an organization or to be a committee in an event or students also can collect points by joining a seminar. From the three ways to collect points, many students choose to join the organization or to be a committee in an event. Like my classmate, some of them choose to join an organization and they can be classified by ten types form the reasons why they choose to join the organization (Hegedus and Knight, 2015), but here I only explain three of them.

The first type (type A) is a student who joins organization because they assume that join organization is important for them. This type usually joins more than one organization. They hope by joining an organization they can find new friends, new experience, and actually, they want to know how to be a leader. Type a usually active in all events that the organization makes. From the 32 students in my class, there are only three students can be classified in this type. Although I see them have many works in their organization they still can finish the assignment that given by lectures. Not only active in organization type an also active in the class, but in the fact my friend in this type also as a member of the administrator, they can manage the class well.

The second type (Type B) is a student who joins organization because in that organization their friends are in them. They join it because they don't want to lose competitiveness with their friends. Type B also joins organization because they want to collect points as I said before. They usually not active in the organization. Most of them when attending the meeting which is held by the organization they will come only as a listener. (D38, E5, IRY). I found that nine of my friend can be classified to this type. I often see and hear that they want to join an organization but their friends must join too, and sometimes they forced their friends to join with them and the worst of all if their friends out.

The last type (Type C) is similar with type b, but they join organization cause perforce. They only want to obey the rules in the campus and they try to collect points too. Although they obey the rules type c only come if the organization makes an event. This type usually cannot reliable; they don't know everything because they don't attend the meeting when it discusses something. In my class, there are eight students who can be classified in this type. They always have many reasons for not attend the meeting. They assume that not too important to join the organization they prefer to study then join the organization.

So from those, we can conclude that only 9, 37% of students join organizations cause their own desires. 28, 12% students join organization cause-effect of their friends and the last 25% of students join organization because they want to obey the rules.

Essay 6

Music is a part of my life. Music gives me a lot of meaning in my life. Sometimes that fills my day. One of my favorite songs is entitled "Love Me Like You Do" song by Ellie Goulding. This song always accompanies me every day and it is a great song to listen. I always feel comfortable when I listening to the song. This song brings effect to me, people and environment around me.

When I listening to the song " Love Me Like You Do ", I feel happy. I can express my happiness by hearing to the song. With a speed tone and beautiful lyrics, make me like this song. Then I sing a song without caring about the people around me who listen to me sing a song. When the song lyrics "Love me like you do, lo-lo-love me like you do, touch me like you do", I usually start to dance and sing follow the lyrics and tone. Listening to this song make me feel on stage and dancing with my boyfriend. Listening to my favorite music sometimes make me more comfortable, uplifting and happy in my daily life.

My boarding house is my favorite place for listening to my favorite song. On the bed with red bed linen and two pillows on the mattress accompany me, when I listening to this song. At that time my boarding house was the mess and several books were scatter on the table. I feel more excited when I listen to my favorite song to do something and with high enthusiasm, I think to start to clean the boarding house to tidy it up arrange and I do it. Usually, I clean up the boarding house slowly, <u>but if while</u> listening to the song it becomes faster to clean. (D14, E6, PRL). Listening to my favorite song gives effect to my mood.

I usually listen to a song with high volume. People around me usually sing together when I play music. They are happy when they see me happy by listening to the song. They never feel disturbed, but they feel happy. The people around me and I feel closer because we like to sing together especially my neighbors at my boarding house. I usually listen to high volume. People around me usually sing together when I play music. They are happy when they see me happy by listening to songs. They don't feel disturbed, but they feel happy. When I listen to the song outside the boarding house environment, I usually use the

headset so that the others people do not feel disturbed and the others stay comfortable around me, and the blind people think so.

Music is a way of expressing my-self. It is can <u>give me a lot</u> of changes and <u>give me a lot</u> of motivation when I listen. (D17, E6, RPT). It also makes me feel that I have many friends in the environment where I live. Listening to music is the most fun thing to do.

Essay 7

One of my favorite songs is titled " Burn Break Crash " by Aanysa. The part of the song lyrics that I like is "all I wanna do is keep on crashing into you". Listen to it song made me feel excited to do something. <u>I listen to this song</u> when holiday at my hometown and every day <u>I listen to this song</u> when I was jogging in there. (D18, E7, RPT). I felt like I was jogging in the streets of my hometown with feeling happy.

In my boarding house I listen it with white earphones and I sit on the blue chair. I always imagine what I do in my hometown when I hear that song. I imagined as if I was jogging at the time wearing black clothes, red short pans, and grey sport shoes. I felt like I was jogging with my friends while talking and laughing with them in the afternoon. At that time I tied my hair and wagged it when it hit the wind.

At the moment I saw the people around me were harvesting rice in the field. They harvest rice using a sickle and a special machine to separate rice from the steam. They joke with their friends while pounding rice in the middle of the rice field. In addition to harvesting rice, there are also people who are mowing grass in the fields. There were three people who came from the rice field at that time and greeted me.

I remember the road situation when I jogged was quiet, there were not many vehicles passing there. Vehicles passing at that time were only motorbikes. The scenery in my hometown is very beautiful. The nature surrounding that is

still natural. I can see the distant scenery of mountains, rice fields, and even the sea is also visible.

I sensed the atmosphere when I jogged in my hometown was very comfortable. The air in my hometown is still natural. Smell of the distinctive aroma of rice being harvested in fields. The sun had not yet sunk so it gave a warm atmosphere. The weather was very bright and coupled with the gentle breeze made the atmosphere pleasant.

That's the feeling that I feel when listening to my favorite song. When I listen to the song I like being able to feel <u>what I</u> am doing, <u>what I</u> see, <u>what I</u> hear, and <u>what I</u> smell at that time. (D19, E7, RPT). So, if we don't feel excited to do something or your mood is not good, we can listen to this song. This song can change our mood for the better so we will be more excited when we want to do something.

Essay 8

I got more to know my friend who was in the class. Because friends were everything to me, those who could accept me as I am and can listen to my joys and sorrows. For that reason, about the activity in the classroom, I knew better, <u>there are some students who are active in</u> the subject area, <u>there are some students who are active in</u> the organization and <u>there are also some students who are active in</u> the arts. (D20, E8, RPT)

Students who active in organization were 11 students in class 3c. They join the organization because they want to bring together English Language Education took part in the activities. Not only following activities but adding their insight and testing their abilities.

Students who active in arts were 11 students in class 3C. They participated in Balinese dance, modern dance, and gamelan art. They were activated in the arts to improve their own worked as well as to align Balinese culture through rules in the language and arts faculty.

Students who active in subjects' area were 25 students in class 3C. Every person's ability differs from seeing his activeness due to the ability of his brain to store the teachings themselves. So that they can be said to be active in the lesson but they can be said to be active in the organization so that the situation becomes balanced in class 3c. For each child they have differences and strengths.

The conclude was that students were students who can best understood anything and they could share their knowledge with others and give the best direction in their assessment. And friends were people who could accept our joys and sorrows and could share in everything we were embrace. Then in the activated of students in class 3c it could be said to be balanced because it has different activeness, whether it was activated in organization, arts, and activated in the learning.

Essay 9

I also have a favorite song that greatly affects my mood when I hear the song. My favorite song is "Firework" sung by Katy Perry. I hear this song makes my mood changes to be more excited.

The spirit that I got when listening to this song make me excited to do something. I saw a spark of light when I listened to this song, as if there was a hope that made me excited not to give up. (D34, E9, HYB). A sense of enthusiasm to fight my weaknesses is increasing. Singing this song made my inner spirit rise to prove that I could do it. Listening to this song made my body feel like I was really excited and wanted to fly. I smelled the aura of freedom that made me enthusiastic in overcoming the problems I was facing. (D35, E9, HYB)

The spirit that emerged from where I listened to this song. I saw my room turn into an open world that was free and filled with the light of fireworks. All the things that were in my room, as if flying and finally blowing up the light vigorously. The walls of the room as if saying "you are free now" (D26, E9, PSF) I immediately felt excited because I could be freed from the shackles of fear that I faced. The mirror in my room also seemed to ask "Do you ever feel like a plastic bag drifting thought the wind wanting to start again" with a

questioning voice. (D27, E9, PSF). After I heard "cause baby you're firework" I immediately felt thrown from the bed and flew into the air filled with light.

The enthusiasm that emerged from the people around when listening to this song. People around who hear this song will feel the spirit of freedom from all the fears felt. They will feel the appearance of the light of hope in them, which they can turn on until they emit beautiful bursts of light. The color of the song is full of enthusiasm, making the people around who hear will feel a burning color of spirit and make them enthusiastic in their day. Hearing this song makes us see a speck of light in each person, the spirit of light that will come out within us. The atmosphere will turn into a sky filled with passionate fireworks, which penetrate our souls.

Listening to music makes my mood instantly change, especially when I listen to my favorite music. When I feel in a complicated situation, I will listen to my favorite song, so I can calm down again. Listening to the right song in certain situations will help your mood get better. But when you listen to a sad song when you're sad, it will make you worse. Choose something that is right in the right situation.

Essays 10

Colum Scott is a singer who was the winner of a talent search event that covers many songs. His cover songs make me go to a new emotional situation. Most of his cover songs are slow songs. One of his best cover that I love the most is a song by Robyn, Dancing on My Own because of the lyrics that influence me, the people around me and the song changes the situation around my-self.

The feeling that the song wants to convey to me and people around me is through the lyrics in the song itself. The lyrics of this song is strongly reflects the lives of teenagers today. It also reflects me and my friend's love story in our life. It is about a person who is betrayed by his lover at a party, where a lot of people make his lover cannot see this person at all and this person decides to dance alone sadly in a crowd. (D42, E10, PDX). One of the lyric of this song "I'm giving it

my all, but I'm not the guy you're taking home, ooh, I keep dancing on my own" is so touching every time I heard it and make me and some of my friends feel pity to the person who is told in this song. Then we believe that, we should invite the person to join us to see the fact that our lover is gone into the arms of another person. For me the best situation to hear this song is when I am sad, because this song make me realize that we have power to face the truth that our lovers is not with us anymore.

Every time the song is played, it always creates the same situations which are gloomy and happy. The gloomy situation is created from the beginning until the middle of the song itself. From the beginning of the song until the middle of the song, it reminds me that my lover is already with another man. It is created because of the music and how the singer presents it with a slow tone. It's as slow as my heart take the truth that I fail in a love relationship. After making it gloomy, it gives a spirit to move on from my ex in the end of the song. The strong tones in the end of the song make another situation for me. The situation is like I meet Colum Scott and he force me to find another girl. Getting an advice from my idol although it is just an imaginary situation but it gives the spirit. It makes me realize that I deserve a better one than my ex.

The song and the lyric itself are the things that make me love this song. As a listener, it reflects me and my friends' life as a teenager and it gives me a spirit to move on from my ex. The song also creates two situations from gloomy into a happy ending. I believe that if this song nominated into the best song in Grammy Awards, I am the first person that will support this song become a winner.

Essay 11

Dian Yurista is a college student who always moving forward without paying attention to people's bad words. It can be seen from every time she is faced with many choices. She is a doubtless decisions maker for herself or for her environments whether it is living or dead. This is the result of the many experiences she has had during her life. One of them was when she received very bad advised and comments when she graduated from SNMPTN.

It began when the clouds did not block the sunlight from touching the courtyard of the Dian's house on April 26, 2017. It was the announcement of SNMPTN. A bit of sunlight adorned Dian's smile which made her lips flush when she found out that she passed the SNMPTN 2017. She put her laptop on a wooden table on the terrace, and then sighed as if all the burden of learning she was carrying disappeared. Footsteps slowly heard from behind the terrace. There was a female figure were seen approaching Dian who sit on the chair. The female figure is about 160 cm with a body that was not too fat; it could be said as slim. Her face was similar with Dian but she used eyeglasses and her hair was short. She was Dian's mother. Dian jumped from her seat happily to prepare a seat for her mother so her mother would listen to what was happening. Then Dian told her mother what was happening until the sunlight disappeared and was replaced by lights and stars. Her mother was happy about it, and she supported Dian's decision to continue her education at UNDIKSHA in Singaraja.

The next day, even though the sun shone on the courtyard of Dian's house, the atmosphere was not as warm as the light. At that time several family members were gathering in front of the terrace. There were a grandfather who was still fit, woman who was quite old, and Dian's father was seen putting a face with furrowed brows. (D24, E11, MPH). When they gathered, the sound of Dian's footsteps and the sound of several glasses of tea trembling approached. Dian served the tea on the table for the family members who looked thirsty. At the same time, the old man who was Dian's grandfather said, "Dian, continuing education to university is useless, it is better to work immediately. Why do you want to study again? It just wastes your time". After that a quite old woman who was Dian's aunt justified her grandfather's words and added "Moreover, nowadays many bachelors are unemployed". Dian did not put the words too deeply into her heart, because what she knew was that the decision she made was the best for her. Her father didn't say anything, but his forehead was slightly wrinkled.

The ski was getting darker that day. No stars and moon appeared that night. It was a very quiet night until Dian's father came to Dian. He talked with

Dian about the words of her grandfather and her aunt. He gave understandings that old people like her grandfather didn't pay much attention to education. After the long talk, when her father finished his words, he said "no matter what is your decision, I will support you as strong as I can". Her father gently wiped her head, he gave a smile full of sincerity. Not so long, his hand moved away with body and the door of her room slowly covered the figure and closed. That day became the events that Dian couldn't forget until today.

Finally, she passed the SNMPTN in UNDIKSHA in English Language Education. Today she is in semester 3, active in many organizations in the university, faculty and English Language Education (D3, E11, ACX) and she got good scores in her last semester. All of her achievements are inseparable from the role of her parents who always support her until now. In the end Dian Yurista become a girl that proved that she is able to move forward and ignoring what people say about her.

Essay 12

Have you ever give an attention to your friends? Don't you realize that they have the differences on their personalities? Yeah, I realize that not all of my friends have the same personalities. There are three types of my friend's personalities. They are extrovert, introvert, and ambivert.

From 100% of my friends, 65% are extrovert. (Hudson & Ferguson, 2016) As the extrovert they are expressive, outgoing, easygoing, comfortable in interacting with their surroundings, and an energy people. My friends who are extrovert usually can express their feeling or share their story easily. They will be welcome to people who want to be their friends. They are also easygoing, whenever and wherever if there is a chance, so they will. They are comfortable in interacting with their surroundings that means they will be uncomfortable if the people around them just keep silent and have nothing to do. Extrovert means they are an active and energy people.

There are 15% of my friends which is introvert. (Hudson & Ferguson, 2016) Introvert people will be quiet, reserved, share things just with limited

people, more comfortable alone, and they have a moment just with their close friends. They will be quiet because they think that they are too lazy to talk unimportant things. They are also reserved, that means they are a private person, but it doesn't mean that they never share things each other. (D43, E12, PDX). They will share things but just with limited people that they belief. They are more comfortable alone because they don't like to make many interactions with each other. They have friends, but they will spend their time just with their close friend.

Beside that I also have 20% friends which are ambivert. (Hudson & Ferguson, 2016) They are not totally introvert or extrovert, but they have a balance personality. My friends who are ambivert people usually use their mood to do something. Ambivert people can be introvert and also extrovert depends on the situation. (D46, E12, OXY). If there are interest topics, they will be extrovert and look excitedly. But if there are bored topics, they will be reserved. Ambivert people like to spend the time with other people but sometimes it will be exhausting for them. (D44, E12, PDX).

If we look around and give attention to our friends, there will be too many differences that we will know about our friends. It is not just about their personalities, but also can be their characters relate to the personalities. No matter your friend's personalities, if you can take yourselves in each situation you will have too much friends with the different personalities.

Essay 13

Many people in the world of course have problems. Nia is the girl who beautiful, tall, not too fat, photogenic and also very cheerful. But, beside her cheerfulness, she keeps a lot of sad stories about her that many people do not know. She had also experienced something that had hurt her so far. One of her sad story is about the breakup between Nia and her ex.

When she was in Senior High School, she has a boyfriend named Yanik. They are dating for over a year. During that year, their relationship was fine and she loved him so much because he was her first love. But the longer they became,

their relationship became very tenuous. That was because Nia always saw he playing skateboard accompanied with another girl. When Nia asked about that girl, Yanik did not show anything suspicious at all. He explained it carefully so that Nia did not feel jealous. Yanik said that she was his friend who really wants to learn to play skateboard. Nia finally believed Yanik's explanation and their relationship back to normal.

One day, Nia's friend came to Nia's house to visited Nia. Suddenly, her friend asked about her relationship with Yanik. Because there was no problem between them, she answered that they were fine. And then, her friend asked about the girl who was often with Yanik. She told Nia that she often saw them together not only when they playing skateboard but also everyday in another activity. By heard that explanation, Nia felt so angry with Yanik and decided to looking for Yanik in the field, place him often playing skateboard. When they arrived, they did not found him there. She back to home and throw herself into bed, she cries and she felt it was very difficult to find Yanik. Finally she chooses to be silent and not said anything. (D15, E13, PRL)

Another day, Nia want to borrow Yanik's camera that she want to used it for her school event and Yanik lent it for her. When she was looking at the photo on the camera, she accidentally saw Yanik's photo with that girl eating together and holding hands. From that time, she changed became very overprotective until made their relationship even more tenuous. One day she got information that they had been camping and slept together. She cannot forgive that and wants Yanik to explain that. But, he precisely ended the relationship without giving any explanation. Her guess about Yanik and that girl was right; they have been in a relationship for a long time and continue their relationship when Yanik and Nia have officially broke up. It made Nia si down, she so angry, she cry until her eyes are swollen, she disappointed and also did not believe that it happened to her. She did not want to went out from her room, did not want to eat until she got sick for several days. (D4, E13, ACX)

From that accident made Nia changed, she became very difficult to believe in other, felt traumatized to establish a relationship with him again and

also felt resentful when she saw him. But from that accident too she learnt that she cannot be arbitrary in choosing a man for herself. She becomes very picky and not easy to fell in love.

Essay 14

Every people surely had either something that they called as <u>best</u> or <u>worst</u> experience. (D47, E14, OXY). Either that happened in long time ago or happened just a while. Diah Krisna is not an exceptional, as a human being, she also had experienced either best or worst experience during her lifetime. One of her worst experiences happened about one year ago, during the Campus Orientation, or known as OKK 2017 which is a must-event for a fresh man that occurred at mostly campus in Indonesia or even in the entire world in different style depends on their policies.

<u>OKK was her worst experience</u> because it changes her pattern of daily life. (D36, E14, HYB). She used to wake up at 6.30 am, but during OKK she had to wake up at 3.30 am. Not only them but since had they given her many assignments making her somehow lack of sleep time. One of example is for the first day, they given so much paper type assignment for the fifth day and with-out any choice, she must stay all night in order to complete not the task before the deadline of the 5th day but also the other task that given on each day and she also had to wake up earlier so she hadn't been late to the orientation venue at Kampus Tengah Undiksha.

Thus, it make her became tired faster than usual, and also starving as usual. As the OKK was held on August or in middle of dried season. Not only that the weather becomes more hot as usual that had made her like that but also many activities that did by the freshmen also made her feel hungry faster than usual. She said that on the first day's second half, she had to walk from Ceremonial Field until the Auditorium and then she sat on the floor until the first day of orientation over and then walk again to ceremonial field in order to hear the announcement for tomorrow's orientation.

But the reason that make it worst is the seniors bad attitude, she even said that she never fell again to their hell. She said that the senior is always mad at the freshmen and she didn't like that, they always yell to the freshmen. As already mentioned in the first reason, they also give too much assignment that should be done in short time. The example, some of the senior are too fierce and some of them are like some respect-freak that will mad when the junior did not ask them in the most polite way.

At the end, she felt nothing but bad things like trauma after she participates on the OKK and never wanted to experience the same thing again next time.

Essay 15

The homeless epidemic is a serious problem in nearly every major city across the country. According to the US Department of Housing and Urban Development, there are over 500,000 people experiencing homelessness on any given night. It's a difficult challenge to tackle precisely because it is so multi-faceted, both in terms of its causes and its far-reaching effects. Homelessness affects not only the people who must struggle to survive on the street, but also the business owners or residents in the neighborhoods. Petty crime and drug abuse are common. While many factors have contributed to the rise in homeless rates, one of the most profound is the lack of adequate social support services.

By definition, a homeless person is someone without a permanent home. They may seek shelter in parking garages, ATM vestibules, and subway stations. On a purely practical level, if a city can provide enough homeless shelters and other forms of affordable housing, the people who would otherwise sleep on the streets can sleep far more safely with a consistent roof over their heads.

Social support services, whether they are funded publicly or privately, would be able to tackle many of the immediate and long-term challenges that face people experiencing homelessness. In addition to providing adequate and reliable shelter, services like drug counseling, treatment for physical or

emotional abuse, and career counseling can address some of the factors that lead to homelessness.

The individual stories of each person going through homelessness will vary. What is often found, though, is that the homelessness came about because of a series of events. A person may unexpectedly lose their job, <u>which may lead</u> to family problems at home, <u>which may lead</u> to drug abuse as a coping mechanism, <u>which may lead</u> to further financial stress, and so on. (D22, E15, RPT). Appropriate social services at any point in this process may be able to prevent homelessness from becoming this person's reality.

The effects of homelessness are equally complex and can be mirror images of the root causes. Because the person is experiencing homelessness, this may put profound strain on personal relationships. Drug abuse can become an issue, as the person seeks some way of coping with the pain and hardship of living on the streets. This leads to a downward spiral that drives the person deeper and deeper into the depths of crippling poverty and isolation.

The impact extends well beyond the individual, too. As homelessness becomes an increasingly visible issue in a neighborhood, home values can plummet. Middle and working class families may move out, providing a bigger opening for various forms of crime. Businesses may close as the area becomes too prone to theft and property crime.

Every city, every neighborhood faces unique challenges when it comes to homelessness. While the specific root causes can vary between individuals, the lack of adequate social services is a leading contributor. The right social services can address, reduce or even remove some of these other underlying causes. With powerful effects for both the individual and society at large, homelessness is a pressing issue and one that must be approached with tact and compassion.

Essay 16

<u>Before entering 2020</u>, the Indonesian economy was still running as usual and <u>after entering 2020</u>, a health disease called COVID-19 emerged. (D10, E16,

ATH). Then the disease became a pandemic which required various businesses to close down to avoid contracting the corona virus. With this happening, the Indonesian economy began to disrupt. In April 2020, the government issued a policy for all citizens to implement health protocols and one of them is to maintain distance between individuals. With this policy, it will be more difficult for entrepreneurs to get out of this painful situation. Then there are still some impacts of the corona virus on the Indonesian economy.

Another impact of the emergence of the corona virus is the layoffs which occurred on a large scale. With many businesses not operating as usual, this has resulted in many employees being temporarily suspended because the company is no longer able to pay their employees' salaries. Many people suffer from the emergence of this corona virus. Many people find it difficult to earn income in the current situation.

As we already know that the corona virus can stick to objects, money is one of them. This is the reason why digital money will increase because digital money cannot be held or touched so that it will not cause virus transmission, unlike physical money (paper and metal) that can be held and of course this will cause the spread of the virus increased. This is due to many things, one of which is the decline in the Chinese economy so that the Indonesian state is affected because our country is pro-China, which is the opponent of the US-China trade war which is still hot. Now, 1 dollar has reached around Rp.16, 466 (as of March 25).

In conclusion, there are several economic sectors that feel the impact of the emergence of the corona virus is not good. This may take the next few years because this virus is very difficult to eliminate and economic conditions depend on the success of medics in dealing with this virus in Indonesia.

Essay 17

Corona virus is a family of viruses that infect the respiratory system. According to World Health Organization, corona virus disease or well-known as COVID-19 is a virus that caused by a newly discovered of corona virus. The

corona virus spreads primarily through droplets of discharge or saliva from the nose when an infected coughs or sneezes. The most common symptoms of the infected person are fever, dry cough, and tiredness. The other symptoms are sore throat, diarrhea, headache, aches, and loss of taste or smell.

Corona virus infection is caused by the virus itself, namely Severe Acute Respiratory Syndrome Corona Virus 2 or abbreviated as SARS-CoV-2, which is a new type of virus suspected of originating from animals. The corona virus or Covid-19 is a virus that circulates in several animals including camels, cats and bats. Usually this virus rarely involves and infects humans and spreads to others. But the case in China is clear evidence that the corona virus can spread from animal to humans. It can even be from human to human. World Health Organization (WHO) states that Covid-19 can be transmitted through aerosol, namely airborne particles. This transmission only occurs in certain medical procedures. In addition to the SARS-CoV-2 virus, other viruses that are also included in this family are the virus that causes Severe Acute Respiratory Syndrome (SARS) and the virus that causes Middle-East Respiratory Syndrome (MERS), the difference is only in terms of the speed of spread and the severity of symptoms.

Corona virus has a huge impact on the health, education, and economy sectors. In the health sector, the corona virus has infected more than 33 million people worldwide. Mental health problems also increase during pandemic. Some people can experience stress and anxiety in the face of the corona pandemic, which can affect mental health. Moreover, if a person previously had a history of anxiety disorders, depression, panic attacks or obsessive-compliant disorders. Prolonged stress in pandemic can trigger post-traumatic stress disorder or better known as PTSD. Stress can be traumatic because we perceive it and feel unable to cope with it. In the short-term stress can disrupt the immune system to the digestive system.

Due to the rapid spread of corona virus, all forms of outdoor activities are also restricted. It also has an impact on education. All teaching and learning activities are carried out virtually or better known as online classes, without any

preparation. The use of technology is highly emphasized in virtual learning, but not all are both teachers and learners are able to operate technology. In fact, there are still many teachers and learners who have limited supporting facilities and infrastructure for virtual classroom. (D39, E17, IRY). Moreover, the use of virtual classes really requires internet access, which means that there is a higher cost for the virtual class to run smoothly. If all of this does not happen, the learning processes will be disrupted so that there will be a reduction in the quality of education.

Apart from the health sector we must control Covid-19 so that it does not spread more widely, in the economic sector as well as being affected by Covid-19. The number of work terminations and disbursement increased during the pandemic in Indonesia, which caused many people to be unemployed. Tourism also stopped because the government limited the number of visitors so that affected the economic in the tourism sector.

The existence of corona virus has very bad impact on the whole world, not only in terms of health but the economy and education is also affected because of the limitation of social interactions to break the chain of the spread of Covid-19. (D2, E17, CLX)

Essay 18

The covid-19 pandemic was a time of global spreading of the virus around the world in an accelerated time. Corona virus the culprit in an economy going down in flames. Some economic indicators underscore not only how bad this month was, but how it's likely to get worse. March was a harsh month. Many companies went down in flames. The world today's, globalization is at a crossroads with COVID-19. The world economy is so intertwined and countries so interdependent, the breaking of one single link in the chain is apparently enough to cause all hell to break loose. The virus starts in China. These conditions cause anxiety, and it's not uncommon for people to panic. The corona virus outbreak could be dangerous. Whose condition is currently unsettling to

global society. Indonesia stands at a crossroads in its fight against the COVID-19 pandemic.

How not, people affected by it are at risk of death. If it is not removed immediately. With this news causing problems that arise among the public. For example Corona virus is taking its toll on people's mental health. What is happening nowadays is that many students do not have communication tools such as mobile phones to study online or daring. Failure to adhere to health protocol, for example still frequently non-masks during travel, and the enormous impact many people will suffer in pretrial today, difficult to find jobs for eating and drinking every day because of the pandemic period, resulting in more and more positive corona patients. So the government intervened to issue a rule to break the chains of the corona virus. Among such things as applying e-learning, work from home, etc. Certainly it will have both positive and negative impact.

Corona is like a king who eats everything; the power is like a starving monster. (D25, E18, MPH). Humans are helpless because this plague brings suffering. Since the news of the covid-19 case caused governments to create a new order for education. The March begins a home study in which educational institutions house their students to learn online. With such activity taking place, it can sever the chain of viral dissemination. At first the students were eager to carry out this online school because it was as much a holiday as a prolonged one. But it is increasingly difficult to understand the lessons for students. Because of this, more than a few students have begun to complain about the implementation of this online school. As time goes on, online learning is less effective. Students naturally better understand the learning method by face to face because the material explanation is valued as being easier and understandable. Furthermore, the socialization of fellow students and teachers is less. This causes some students to feel lonely because they do not meet their friends.

The result of these problems to add insult to injury, many news outlets are blaming minority communities for having higher rates of chronic disease which makes them more susceptible to COVID-19. And The Covid-19 emergency means that we will run the buses with a skeleton crew until further

notice. There's been a wide range of impacts from the covid-19 pandemic including the economic sector. Many small businesses will go to the wall because of Covid-19. As can be seen in the past three months, much of the tourist business, food, and even the aviation industry have decreased in revenue. So much of the effort would be so costly that they would be forced to terminate their relationship or even close.

Investors cannot sit on the fence after corona virus stock rout it's time to buy stocks, Bernstein says. Production activities became bumpy, many companies having difficulty because of reduced incomes and therefore unable to afford the workers. So the layoff wave is inevitable. Corona comes through like an army, in silent operation. Shooting at thousands around the world with anxiety bullets, which are adverse to the immune system. This has resulted in the tourism sector also becoming temporarily paralyzed, with unemployment growing as it is one of the containers that provide jobs for people around the tourist area and outside.

Conclusion: Every cloud has a silver lining. In uncertain times, become someone's savior. All the inhabitants of the earth are made uneasy because of fear of death. The laughter and jokes that sounded were now quiet. The corona virus has become a virus that can cause great harm among large communities regardless of who, age, and degree. This virus remains a mystery so that we realize that god has a role in "corona comes only as a coward, among the masses that attacks while we are blind. So to reduce the corona virus efforts that can be made to prevent the virus is to control the mind to stay happy. Regular exercise, eat a balanced diet, get enough sleep.

Essay 19

In this situation, many information that discusses about Covid-19 in the world. According to WHO, Covid-19 is an infectious disease caused by the new corona virus that has just emerged in human life. The covid-19 virus will attack the respiratory tract which will make it difficult for someone to be infected to breathe, but someone who has a good immune system will experience mild

respiratory disease. And older people who have medical problems such as diabetes, chronic respiratory disease, and cancer are more likely to develop serious illnesses. And the spread of this virus is through droplets of saliva or discharge from the nose when an infected person coughs or sneezes.

When the world experiences a pandemic due to the corona virus, everything will experience changes that people in the world have never thought of. All things have changed since the news emerged that a new virus was about to attack humans. This virus sprang from a region in China, a person is first said to have this disease, then spreads quickly to all people around him. And at that time, there was a lot of news that said that this virus would endanger people, and even die. However, when the news appeared, people in the world could still carry out their usual activities until finally tourists from visiting China who were infected with this virus returned to their own countries, or on vacation to other countries, finally this virus spread rapidly.

And with this there was the spread of the virus throughout the world. One by one the people were infected, and felt the symptoms of the corona virus. Much has been caused by the pandemic after it spread too many countries. One of them is changes to the activities we do often. After the pandemic from Covid-19, the public is urged to keep their distance and always maintain cleanliness. Things like that in the past, everyone underestimated and now for all of that become things that must be considered. And, as a result of Covid-19, schools, offices and public places were closed to avoid the virus, so that all people find it difficult to carry out activities.

Apart from changing our daily lives, this pandemic also affects our social behavior. Covid-19 has caused an unplanned social change. Before the existence of this corona virus, we were much emphasized to behave socially towards others. However, after the outbreak of this virus, our social behavior becomes prohibited. Now everyone is urged to keep their distance from each other and forced to conform to standard health protocols. This is only to prevent the spread of the virus through the fluids from which it is infected. Usually people have a habit of being happy to gather and shake hands, but now they are required to get

used to social restrictions. This has become a change in social behavior due to the Covid-19 disease.

So, Covid-19 is bringing about a change that the people of the world really don't expect. There are many negative impacts from the existence of Covid-19, such as <u>losing</u> family members, <u>losing</u> jobs, and <u>losing</u> socializing attitudes towards others. (D23, E19, RPT). What must be considered in a situation like this is to always maintain health, and always pay attention to the advice of established health protocols.

Essay 20

Covid-19 is a virus that originated in Wuhan, China. This virus is thought to have arisen due to zoometric events (movement of wild animals that are eaten). This virus has spread throughout the world including Indonesia, not only that this virus has also claimed thousands of lives in every country that was attacked. Only COVID-19 can change the world total. Life is different from usual, without us knowing it we stay at home for a long time to prevent ourselves and others and minimize the risk of contracting it. Everything has changed, <u>we usually do activities outside the home but now we have to do all the activities inside our own house.</u> (D11, E20, ATH). Not only that, this also has an impact on education in Indonesia. The government enforces regulations for online home-based study and work at uncertain times.

COVID-19 has rapidly affected everyday life, business, disrupting trade and the movement of the world. Identification of the disease at an early stage is very important to control the spread of the virus because it spreads very quickly from person to person. Most countries have slowed down the production of their products. 3, 4 various industries and sectors are affected by the causes of this disease; these include the pharmaceutical industry, the solar sector, tourism, information and the electronics industry. This virus creates significant indirect effects on the daily lives of citizens, as well as the global economy.

As we know, the first this pandemic had a very bad impact on social life, we couldn't interact with many people outside the home. Not only that, this

pandemic has also caused the cancellation or postponement of large-scale sports and tournaments, which adversely affects preparations already completed. As for other social consequences, delays in national and international travel, disruption of cultural, religious and event festivities, as a result, everyone cannot celebrate cultural celebrations. The next consequence is excessive stress among the population, resulting in decreased immunity. Social distancing with peers and family members the closure of hotels, restaurants and places of worship, makes everyone lose their jobs and there are limitations to worship. The closure of entertainment venues such as film and drama theaters, sports clubs, gymnasiums, swimming pools. As a result, children become bored just staying at home.

The second is that it has a huge impact on health; this pandemic has a huge impact on our health. As this pandemic does a challenge in diagnosis, quarantine and treatment, which results in everyone have to be quarantined if they come from outside the city. Next, this pandemic also affects patients with other diseases, this will be bad for their diseases because many have been neglected and left untreated because medical personnel are more focused on dealing with the Covid-19 virus. Moreover, there have been many cases of people who died not because of Covid-19 but because other diseases were handled too late.

The third is the economy, this pandemic has a very bad impact on the people's economic system, and all access is closed and makes all people experience an economic decline. For example, slowing down the production of important goods and causing everyone to slowly accept these goods. As for other impacts, namely losses in national and international businesses that have very bad consequences for entrepreneurs because they can harm already developed companies. This economic impact is very bad for everyone because all accesses are closed and like government regulations everyone has to go online.

And the last is the impact on education; this pandemic also has an impact on education, in schools and colleges. All students cannot carry out face-to-face learning and as a result all students or students have to carry out learning at home and make it difficult for some students to adjust to circumstances and find it

difficult to understand the subject matter. As for the other impact, namely internet connection, the result of this can hinder the learning process of students because each student has a different internet connection in their respective homes.

This pandemic made everyone experience a significant impact, which initially could be activities outside the home but due to the pandemic everyone had to work, go to school, and attend important events all done online. Another impact is that people cannot make important events such as weddings, thanksgiving and other things due to the pandemic. This made many people feel disappointed because an important event that was originally planned was suddenly canceled due to the emergence of this pandemic.

Essay 21

2020 it has been a hard year since the pandemic outbreak in march 2020, and it's all because of corona virus that spread incredibly fast. Because of corona virus that have been infected a lot of people in the world we have to feel a lot of effect from it. Not only for the health sector, but also all of sector around the world it includes the economy sector and the others. (D16, E21, PRL). The people who got infected by this virus will get the COVID-19 (Corona Virus Diseases 2019) which already killed a lot of people in the past month. This virus spread from droplets when somebody talking or having a sneeze, also cough. It also can spread from the air so that's why we have to maintain our distance with each other, and always use face mask, not forget to mention to wash our hand after going outside.

By the way of this virus spread, in the first month of the pandemic outbreak a lot of the country in the world doing a lockdown so that the spread of the virus, will slowing down, and infect less people than it normally should. When a country doing a lockdown that means no one is allowed to go outside at their own will. One family only can let one person go outside to buy their daily needs, and then going back as soon as he/she finish.

Then after the lockdown the country all around the world will start to do a new normal life, which they have to obey the health protocol like using mask every time they going outside, maintain their distance with each other, also washing hand every time they come from outside. It means that people can have their normal life but, with a new rules that used to keep them healthy so that they will not get infected by the corona virus. This type of new daily life is used to keep the economy stable and everyone can fulfil their daily needs.

Those things above have their own effect on our daily life. The lockdown itself already make a lot of store go bankrupt because there are no costumers visiting their store. Not only that a lot of worker also got fired because the place where they work did not have enough money to pay a lot of worker so many of them are getting fired because of those reason. Then the lockdown also affect how we work. Before the pandemic outbreak we usually work in our office or study in the school but after the lockdown we have to do everything online, meeting and the other stuff is become online based. But on the other hand there are some type of work that needs to be offline based no matter what the situation is but they need to obey the health protocol when they start want to work. The other thing is the economy rate is dropping down because of the lockdown; of course this is a bad thing, because there are little economic activities that happening it could affect a nation because of this.

Then after the lock down we have the new normal life, because of the dropping of economy rate so they need to keep it stable with this way. The effect of this new normal life is the economy rate that became stable, also a healthier lifestyle. Healthier lifestyle is happening because a lot of people aware that they have to do the health protocol so they will not infected by the corona virus. Also they have to keep their immune stay in the best condition by doing exercise. The new normal also effect the regulation, it became more strict than usual, for example if you want to go anywhere they have to check your body temperature, make sure you wash your hand at least with hand sanitizer, they also make a space so that we can maintain our distances and make sure we wear a mask. For

a special occasion like using plane or ship, we need to check for the corona virus status with rapid test and bring the proof with us if we want to go across the sea.

So in conclusion this virus outbreak is something that we can't avoid so it of course will affect our daily life, with a new way to do it or a new way to live our life. It has their own bad and good side, because it is how the life goes, there always good and bad side of every event that happened in the world. So we have to get used to this new way of living our life.

Essay 22

2019 is a year filled with anxiety and threats to the world because there is a disease that originated in the country of the bamboo curtain, namely China, Corona virus disease (COVID-19) is an infectious disease caused by the recently discovered corona virus. Most people who catch COVID-19 will experience mild to moderate symptoms and will recover without special treatment. Therefore all sectors in the world are closed for a very long period of time. From the education, economy, tourism, and others sectors. All sectors which are the main needs of a million people cannot run smoothly. I need to underline is the education sector which I will discuss the causes and consequences of the impact of this covid-19.

Education is very dependent on costs in the teaching and learning process, it is not strange that we know that the economic sector has dropped dramatically because Covid-19 will spread to all fields including the education sector which is very important for all circles. Because in order to stop the spread of this corona all students and teachers are learning from home, which is suddenly done without any preparation. The unpreparedness of all elements in education is a big obstacle too, the change in teaching and learning from face-to-face or offline (offline) to online (online) requires the readiness of all elements, starting from the government, schools, teachers, students and parents. (D5, E22, ACX). It is admitted that the government loosens the education assessment system according to emergencies as long as learning can continue without being burdened with competency attainment.

The impact of covid-19 can be seen from the education sector, many young people and children are threatened to quit school. That's because they don't have the costs and the tools we really need. Parents who are unable to meet all the needs of their children, until they give up and choose to quit school.

I see from a teacher (teachers), the news that I have read in parts of Indonesia in remote areas where it is difficult to find internet signals and students who do not have cell phones for their learning needs. Teachers are willing to look for each student in each house. Even though it is easy to get internet access and they have cell phones, many families have the trouble of buying quotas during a very drastic economic downturn.

Apart from seeing the negative side of Covid-19 in the field of education, we also have to see what we can learn from this impact; more clearly, see the positive side of Covid-19. We realize that now there are many innovations and new ideas developed by young people. It will affect the field of education which leads to new things, such as the emergence of many online learning applications making learning from home can still be done effectively. Online learning applications are developed by providing features that facilitate online learning. In addition, during this pandemic, students will certainly spend time studying at home. Where this requires innovative collaboration between parents and teachers so that students can continue to learn online effectively. In addition, innovative collaborations can overcome various complaints during online learning. This will have a positive impact on the world of education both now and in the future.

So the conclusion is that Covid-19 is a big influence on the education sector around the world, the unpreparedness of all elements in education is a big obstacle too, the change in teaching and learning from face-to-face or offline (offline) to online (online) requires the readiness of all elements, starting from the government, schools, teachers, students and parents It is admitted that the government loosens the education assessment system according to emergencies as long as learning can continue without being burdened with competency attainment, many young people and children are threatened to quit school.. That's because they don't have the costs and the tools we really need.

Essay 23

The student population on the campus is not a little with the various activities of each. Task assigned by lecturers, organization activity, activities outside the campus that are still related to the lectures. Their responses are different in this regard, because each individual has a different psychology like happiness, rate race, hedonism, and nihilism. Mini research results of people in 3F class is not only happiness and rat race but also 5 of 15 people are categorizes as hedonism people. Concerns that arise are those who are categorizes as hedonism people, what future can be expect, a good future or a bad future?

Human nature that makes itself gets something easily or instantly. Another basic nature is the sense of endless human discontent. If not well controlled will lead to hedonism. The external factor of hedonism is the current globalization of information. Media that causes the flows of information flows in various parts of the world. In the sense that information can be enjoyed by anyone in this part of the world, it can be obtained from the media television, advertising, and also internet. The students must be able to filter the flow of globalization of <u>good</u> and <u>bad</u> information. (D49, E23, OXY). Internal factors of the scope of the family, the care that greatly affects their psychology. In addition, other causes are uncontrolled associations without parental supervision. The weakness of one's religious beliefs also influences the behavior of hedonism.

Those who choose to become hedonism people have a negative impact on their behavior. The first impact is they doesn't think about future, they only thinks about the present do the best just in present. For example <u>they spent her money for buy everything that they want, not what they need.</u> (D40, E23, IRY). They just eats whatever they want and just spends the day by watching movies and don't care about assignment. The second impact is they spend the time to be relaxed without considering everything that she has to do. For example they just lies in the bed and not makes home work and procrastinating doing the daily activity like cleaning the house because of sleeping a lot in the day. The third impact is they like having fun with friends all day. For example they like hangout and spend a lot of money for something that they do not need.

The impact of those who behave in hedonism can be avoided if they want to get out of that behavior. First, need to control themselves in shopping and selecting goods as needed. Second, apply simple lifestyle in daily life. Third, the existence of maturity in thinking so that it can control themselves. Of course they themselves can change to choose to stick to the behavior of hedonism or beyond the behavior. If they can escape the behavior of hedonism, then their future will get better. If they choose to stick to the behavior, cannot imagine what their future will be like.

C: Informant II

D: Informant III

Questions:

A: Do you understand the concept of language style? If so, what do you know?

B: Yes, I do. I think that language style is a language that is used to communicate in daily life.

C: Yes, I do. I think that language style is an expression of someone when speaking or writing that has a figurative meaning.

D: Yes, I do. I know some language style types like metaphor, personification and soon.

A: Is it possible to use a particular language style in an essay?

B: Yes, it is possible to use a particular language style in an essay.

C: Yes, it is possible.

D: Yes, I think so.

A: Have you ever used a specific language style when writing an essay?
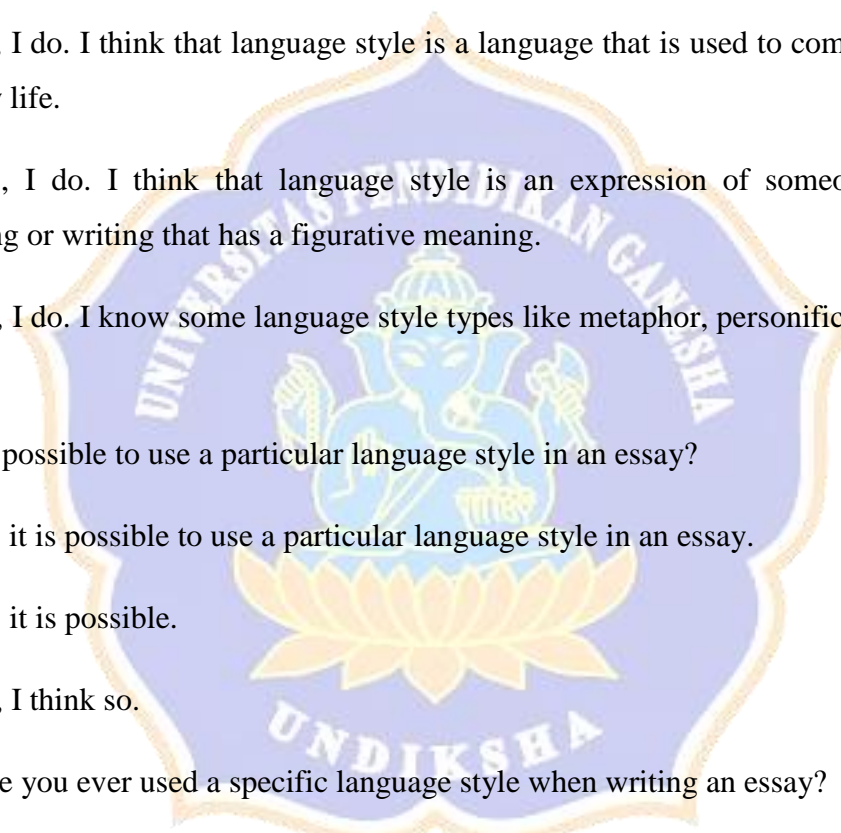

B: Yes, I have used a specific language style when writing an essay.

C: Yes, I have used it.

D: Yes, I have used it too.

A: Could you please provide a list of language style types that you are familiar with?

B: I only know a formal language style type.

C: I know a formal and informal style.

D: I have known about metaphor, personification, simile and hyperbole.

A: Do you understand the function of language style?

B: Yes, I do. The function is to make an artistic impact and increase the attention of readers/listeners.

C: Yes, I do. I think the function of language style is to make the language more beautiful and the readers/listener could be understood easily.

D: Yes, I do. I think to allow the readers/listener more fully understand about the content of an essay that we write, so that makes it more interesting.

A: According to Leech (1981), language style serves five functions: informational, expressive, directive, phatic, and aesthetic. Based on these five functions, try to identify which function you want to achieve when using language style in essays!

B: The language style function that I want to achieve is informational function.

C: I want to achieve an expressive function when writing an essay.

D: The language style function that I want to achieve is expressive function.
