ABSTRACT

This study aims to obtain tested findings about the simultaneous and partial effect of corporate social responsibility and foreign ownership on financial performance. This type of research is causal quantitative. The research subjects are mining companies listed on the Indonesia Stock Exchange (IDX). The object of research is corporate social responsibility, foreign ownership and financial performance. Data were collected by recording documents, and analyzed by multiple linear regression analysis. The results show that (1) Corporate social responsibility and foreign ownership have a positive and significant effect on financial performance, (2) corporate social responsibility has a positive and significant effect on financial performance, (3) Foreign ownership has a positive and significant effect on financial performance.

Keywords: CSR, foreign ownership, financial performance
