ABSTRAK

Motivasi memberikan pengaruh yang besar terhadap naik turunnya prestasi atlet renang. Salah satunya motivasi ekstrinsik yang menjadi dorongan dari luar individu seperti dukungan orang tua, pelatih, teman dan lingkungan sekitarnya. Penelitian ini bertujuan untuk mengetahui dukungan orang tua dan pelatih terhadap prestasi atlet renang klub di Denpasar. Penelitian dilakukan melalui pendekatan deskriptif kualitatif dengan metode survei. Sampel penelitian berjumlah 80 orang tua dan 5 pelatih dengan populasi 155 orang pada klub renang di Denpasar. Teknik pengumpulan data dilakukan melalui observasi, kuesioner, wawancara, dan dokumen. Data survei dianalisis dengan metode analisis statistik deskriptif. Hasil penelitian menunjukkan bahwa: (1) dukungan orang tua terhadap pencapaian prestasi atlet renang sebesar 30% (sangat mendukung), 52% (mendukung), 18% (kurang mendukung), dan (2) dukungan pelatih terhadap pencapaian prestasi atlet renang adalah 80% (sangat mendukung), 0% (mendukung), dan 20% (kurang mendukung). Jadi simpulan dalam penelitian ini dukungan orang tua dalam ketercapaian prestasi adalah mendukung, sedangkan dukungan pelatih dalam ketercapaian prestasi adalah sangat mendukung pada klub renang di Denpasar. Maka disarankan keterlibatan orang tua dan pelatih menjadi hal yang penting dalam pembinaan dan ketercapaian prestasi.

Kata-kata kunci: dukungan, orang tua, pelatih, prestasi renang.

ABSTRACT

Motivation has a big influence on the ups and downs of swimming athlete achievement. One of them is extrinsic motivation which becomes encouragement from outside the individual such as support from parents, coaches, friends and the surrounding environment. This study aims to determine the support of parents and coaches on the achievements of club swimming athletes in Denpasar. The research was conducted through a qualitative descriptive approach with a survey method. The research sample was 80 parents and 5 coaches with a population of 155 people at a swimming club in Denpasar. Data collection techniques were carried out through observation, questionnaires, interviews, and documents. The survey data were analyzed by descriptive statistical analysis method. The results showed that: (1) parental support for swimming athlete achievement was 30% (very supportive), 52% (supportive), 18% (less supportive), and (2) coach support for swimming athlete achievement was 80 % (strongly supports), 0% (supports), and 20% (less supports). So the conclusion in this study is that parental support in achieving achievement is supportive, while the coach's support in achieving achievement is very supportive of the swimming club in Denpasar. So it is suggested that the involvement of parents and coaches is important in coaching and achieving achievements.

Keywords: support, parents, coach, swimming achievement.
