ABSTRACT

This study aims to describe the implementation of PJOK learning during the Covid-19 pandemic for class VIII SMP Negeri 3 Singaraja in the 2021/2022 academic year. The population in this study were class VIII students of SMP Negeri 3 Singaraja for the academic year 2021/2022 who took part in the online learning process during the COVID-19 pandemic as many as 11 classes with a total population of 420 students. Sampling in this study using Simple Random Sampling technique, so that the sample used in this study were 91 students. This study was designed using quantitative descriptive research using survey methods. Research data was collected using a questionnaire or questionnaire to find data on the percentage of PJOK learning implementation during the COVID-19 pandemic. The results showed the average score for the preliminary aspect was 73.7 which was included in the good category, the core activity aspect score was 75 which was included in the good category, and the closing aspect score was 73.65 which included in the good category. Overall, after averaging the implementation of PJOK learning during the Covid-19 pandemic, it obtained a score of 76.08, which in this case can be said that PJOK learning in schools was carried out well during the recent Covid-19 pandemic, this is supported by the situation which is gradually improving and the learning system in school is gradually being carried out face-to-face like the learning situation before the covid-19 pandemic.
