**Abstract**

*This study aims (1) find out the role and authority of the community-based intervention team (IBM) in preventing the eradication of narcotics abuse and illicit traffic (P4GN) in order to eradicate narcotics crime in Sangsit Village (2) to find out the obstacles experienced by the Intervention Team Community-Based (IBM) and (3) to find out the efforts made by the community-based intervention team in eradicating narcotics crimes in Sangsit Village. The type of research used is empirical juridical research with the nature of descriptive research. The location of this research was carried out in Sangsit Village. Data collection techniques used are document study techniques, observation and interviews. The sampling technique used is Non Probability Sampling and the determination of the subject uses Purposive Sampling technique. Qualitative data processing and analysis techniques. The results of the study show that (1) The role of the community-based intervention team includes: overcoming narcotics abuse, providing facilities and understanding to the community, as well as the authority of the community-based intervention team, namely assisting perpetrators or victims of narcotics abuse, and supervising every community activity. (2) The obstacles that were experienced when they were first formed were underestimated by the community and constrained by places of service and funds, access to IBM was very limited to only assistance and supervision and relatively many families or parents refused if their children were to be rehabilitated. (3) then the efforts made include penal efforts: repressive efforts and non-penal efforts: pre-emptive and preventive efforts.*
