ABSTRAK

Tujuan Penelitian ini yaitu Untuk mengetahui Survei sarana dan prasarana PJOK di SMP Negeri se-Kecamatan Sawan. Jenis penelitian yang penulis pilih merupakan deskriptif kuantitatif, dengan menggunakan metode survey. Penelitian ini mengambil sampel dari keseluruhan jumlah populasi yaitu SMP Negeri yang ada di se-Kecamatan Sawan. Teknik pengumpulan data dilakukan dengan observasi langsung dan wawancara dengan guru PJOK di masing masing sekolah tepatnya dengan melakukan pengamatan langsung terhadap sumber data atau objek penelitian, dan mencatat data yang diperlukan menggunakan lembar observasi.

Jumlah Sekolah yang akan menjadi populasi penelitian yaitu 5 sekolah, sarana kemudian yang berkondisi baik sebanyak 494 buah dengan persentase 90%. Selanjutnya yaitu sarana yang berkondisi buruk sebanyak 30 buah dengan persentase 5,4%. Kemudian, yang memiliki sendiri sebanyak 548 sarana dengan persentase 100%, untuk yang menyewa sarana dengan persentase 0% serta yang berkondisi standart sebanyak 526 sarana dengan persentase 95%, untuk yang modifikasi sebanyak 22 sarana dengan persentase 4% dari jumlah total sarana keseluruhan yaitu 548. Jumlah fasilitas Prasarana keseluruhannya yaitu 24 Prasarana dan yang berkondisi baik 24 dengan persentase 100% berkondisi baik dan yang berkondisi rusak yaitu dengan persentase 100%. Kemudian, yang memiliki sendiri sebanyak 100 prasarana dengan persentase 100%, untuk yang menyewa sebanyak 0 prasarana dengan persentase 0% serta yang berkondisi standart sebanyak 19 prasarana dengan persentase 79,1%, untuk yang modifikasi sebanyak 5 prasarana dengan persentase 20,8%.

Artinya semua fasilitas di SMP Negeri se-Kecamatan ini berkondisi Sangat baik Namun dari segi jumlah sarana prasarana dari beberapa sekolah masih sangat kurang dalam artian jumlah sarana prasarana dan jumlah siswa tidak sesuai.

ABSTRACT

The purpose of this research is to find out the survey of PJOK facilities and infrastructure in public junior high schools in Sawan District. The type of research that the authors choose is descriptive quantitative, using survey methods. This study took samples from the entire population, namely public junior high schools in the entire Sawan District. The data collection technique was carried out by direct observation and interviews with PJOK teachers in each school, to be precise by direct observation of the data source or research object, and recording the required data using an observation sheet.

The number of schools that will become the study population is 5 schools, then the facilities are in good condition as many as 494 schools with a percentage of 90%. Furthermore, there are 30 facilities with bad conditions with a percentage of 5.4%. Then, those who own as many as 548 facilities with a percentage of 100%, for those who rent facilities with a percentage of 0% and those with standard conditions are 526 facilities with a percentage of 95%, for those who modify as many as 22 facilities with a percentage of 4% of the total number of facilities, namely 548 The total number of infrastructure facilities is 24 infrastructure and 24 of which are in good condition with a percentage of 100% are in good condition and those with damaged condition are with a percentage of 100%. Then, those who own 100 infrastructure with a percentage of 100%, for those who rent as many as 0 infrastructure with a percentage of 0% and those with standard conditions are 19 infrastructure with a percentage of 79.1%, for those who are modified as many as 5 infrastructure with a percentage of 20.8%.

This means that all the facilities at State Junior High Schools in this sub-district are in very good condition. However, in terms of the number of infrastructure facilities, several schools are still lacking, in the sense that the number of infrastructure facilities and the number of students are not appropriate.
