ABSTRAK

INLISLite dibangun dan dikembangkan dalam rangka membantu upaya pengembangan pengelolaan dan pelayanan perpustakaan berbasis teknologi informasi dan komunikasi. Dalam penerapan sistem ini pastinya akan banyak timbul tanggapan dari pengguna yang mengarah ke penerimaan sistem tersebut. Untuk mengetahui tanggapan dari pengguna perpustakaan Undiksha terhadap implementasi Sistem Informasi perpustakaan INLISLite, maka peneliti termotivasi untuk melakukan evaluasi penerimaan para mahasiswa terhadap penggunaan sistem informasi tersebut. Penelitian ini menggunakan Metode UTAUT 2 (*Unified Theory Of Acceptance And Use Of Technology*). Tujuan dari penelitian ini adalah untuk mengetahui hasil Evaluasi Penerimaan Sistem Informasi Perpustakaan INLISLite Undiksha Menggunakan Metode UTAUT 2. Jumlah responden dalam penelitian ini sebanyak 96 responden. Adapun analisis data menggunakan teknik analisis Structural Equation Modeling - Partial Least Square (SEM-PLS) dengan bantuan SmartPLS 3.0. Hasil penelitian ini menunjukkan bahwa dari 9 hipotesis yang diuji, hipotesis yang diterima sebanyak 6 hipotesis dan yang ditolak sebanyak 3 hipotesis.

Information Systems Study Program

ABSTRACT

INLISLite was built and developed in order to assist efforts to develop information and communication technology-based library management and services. In implementing this system, there will certainly be many responses from users that lead to acceptance of the system. To find out the responses of Undiksha library users to the implementation of the INLISLite library information system, the researchers were motivated to evaluate students' acceptance of the use of the information system. This study uses the UTAUT 2 method (Unified Theory Of Acceptance And Use Of Technology). The purpose of this study was to find out the results of the Acceptance Evaluation of the INLISLite Undiksha Library Information System Using the UTAUT 2 Method. The number of respondents in this study were 96 respondents. The data analysis used the Structural Equation Modeling - Partial Least Square (SEM-PLS) analysis technique with the help of SmartPLS 3.0. The results of this study indicate that of the 9 hypotheses tested, 6 hypotheses were accepted and 3 hypotheses were rejected.
