ABSTRAK

Penelitian ini bertujuan untuk mendeskripsikan ketahanmalangan siswa melalui penerapan proyek penguatan profil pelajar pancasila di sekolah dasar gugus VII Kecamatan Buleleng Kabupaten Buleleng. Jenis penelitian yang digunakan yaitu *survey deskriptif*. Populasi penelitian ini adalah siswa kelas IV SD yang tergabung dalam gugus VII Kecamatan Buleleng Kabupaten Buleleng, dengan jumlah siswa kelas V total 236 orang siswa. Penelitian ini menggunakan teknik *Proporsional Sampling*, yaitu teknik pengambilan sampel dengan pengambilan sampel dari anggota populasi dengan menggunakan cara acak tanpa memperhatikan strata dalam populasi tersebut. Hasil pengambilan sampel dari populasi, didapatkan sampel sebanyak 148 orang siswa. Pengumpulan data dalam penelitian ini menggunakan angket/kuisisioner ketahanmalangan yang telah melalui uji validitas isi dan uji reliabilitas. Metode dan teknik analisis data yang digunakan dalam penelitian ini yaitu analisis statistik deskriptif. Dari hasil analisis data diperoleh ketahanmalangan siswa melalui penerapan proyek penguatan profil pelajar pancasila memiliki rata-rata nilai siswa sebesar 76,95 yang apabila dikonversikan pada kategorisasi angket ketahanmalangan termasuk dalam kategori sedang. Persentase setiap aspek berada antara 75,2% hingga 79,3%, yang berada pada kategori sedang. Berdasarkan hasil analisis tersebut maka dapat disimpulkan bahwa ketahanmalangan siswa melalui penerapan proyek penguatan pancasila di sekolah dasar gugus VII Kecamatan Buleleng Kabupaten Buleleng berada pada kategori sedang.

Kata-kata kunci: ketahanmalangan, proyek penguatan profil pelajar pancasila

ABSTRACT

This study aims to describe the resilience of students through the implementation of a project to strengthen the profile of Pancasila students in elementary schools cluster VII, Buleleng District, Buleleng Regency. The type of research used is a descriptive survey. The population of this study were fourth grade elementary school students who were members of cluster VII Buleleng District, Buleleng Regency, with a total of 236 fifth grade students. This study used the Proportional Sampling technique, which is a sampling technique by taking samples from members of the population using a random method without regard to strata in the population. The results of taking samples from the population, obtained a sample of 148 students. Data collection in this study used a questionnaire/questionnaire for adversity that had gone through a content validity test and a reliability test. Data analysis methods and techniques used in this study are descriptive statistical analysis. From the results of data analysis, it was obtained that student resilience through the implementation of the Pancasila student profile strengthening project had an average student score of 76.95 which, when converted to the categorization of the resilience questionnaire, was included in the medium category. The percentage of each aspect is between 75.2% to 79.3%, which is in the medium category. Based on the results of this analysis, it can be concluded that the resilience of students through the implementation of Pancasila strengthening projects in elementary schools cluster VII, Buleleng District, Buleleng Regency is in the medium category.

Key words: *resilience, project to strengthen the profile of Pancasila students*
