***ABSTRACT***

*This study aims to examine the effect of CAR, LDR, BOPO, and NPL on stock prices in banking sector companies in the LQ45 index for the 2017-2022 period. This research uses quantitative research. The data in this study used the document recording method and was analyzed by multiple linear regression analysis using SPSS 26.0 for Windows. The results showed that (1) CAR has a positive effect on stock prices in the banking sector which is included in the LQ45 index. (2) LDR has a positive effect on stock prices in the banking sector which includes the LQ45 index. (3) BOPO has a positive effect on stock prices in the banking sector which is included in the LQ45 index. (4) NPL has a positive effect on stock prices in the banking sector which is included in the LQ45 index. (5) CAR, LDR, BOPO, and NPL have a positive effect together on stock prices in the banking sector which includes the LQ45 index.*
