ABSTRACT

This study aims (1) to find out what strategies are used by librarians at the Klungkung 1 State Vocational Scholl library in preserving book library materials. (2) find out the obstacles faced by librarians at SMK Negeri 1 Klungkung in preserving book library materials. The study employed descriptive qualitative research methods and employed purposive sampling and snowball techniques for information retrieval. The study was conducted at the Library of SMK Negeri 1 Klungkung. During the data collection process, researchers employed various methodologies including observation techniques, interviews, and document studies. The result of this study indicate that the activities carried out by librarians and librarians at the Klungkung 1 Public Vocational Scholl Library are by routinely cleaning the collection racks using a duster, applying camphor to each collection rack, adjusting the room temperature so that it is not damp and taking preventive measures by doing book-covering activities. Meanwhile, the obstacles faced were the lack of experts, guidance and training in the field of preservation of book library materials.
