Kata kunci : RPP, Kecakapan, dan Inovasi

Penelitian ini bertujuan untuk mengetahui validitas, kepraktisan, dan efektivitas RPP dengan menggunakan model 4D Thiagarajan. Model ini terdiri dari 4 tahap yaitu *Define*, *Design*, *Develop*, dan *Disseminate*. Instrumen penelitian terdiri atas lembar validasi, lembar keterlaksanaan pembelajaran, angket respon guru, dan hasil belajar siswa. Analisis validasi RPP menggunakan *Alpha Cronbach* berada pada kategori “Valid” dengan skor 0,75. Keterlaksanaan RPP memenuhi kriteria “Sangat Praktis” dengan skor 4,12 dan respon guru tergolong “Sangat Praktis” dengan skor 4,60. Uji Efektivitas RPP menggunakan tes hasil belajar dengan rumus t (test) dengan $t_{hitung} > t_{tabel}$ dan tingkat efektivitas RPP berdasarkan kriteria Efektivitas Size sebesar 1,21 berada pada tingkat efektivitas tinggi.

ABSTRACT

This research aims to determine the validity, practicality, and effectiveness of lesson plan by using the 4d Thiagarajan model. This model consists of 4 stages, namely Define, Design, Develop, and Disseminate. The researched instrument consisted of validation sheets, learning achievement sheets, teacher response questionnaires, and student learning outcomes. Validation analysis of lesson plan using alpha cronbach was in the category of "valid" with a score of 0.75. The implementation of the lesson plan fulfills the criteria of "very practicality" with a score of 4.12 and the teacher's response was classified as "very practicality" with a score of 4.60. Lesson Plan effectiveness test uses a test of learning outcomes with the formula t (test) with t count $>$ t table and the effectiveness leveled of lesson plan based on the criteria of Effectiveness Size of 1.21 was at a high leveled of effectiveness.
