ABSTRAK

Penelitian ini bertujuan untuk (1) mendeskripsikan proses pengembangan busana kerja berbahan kain tenun motif Subahnale dengan konsep busana Spirituality, (2) mengetahui hasil pengembangan busana kerja berbahan kain tenun motif Subahnale dengan konsep busana Spirituality, Penelitian ini merupakan penelitian pengembangan Research and Development (R&D) dengan model pengembangan PPE. Proses pengembangan dengan model PPE terdiri dari 3 tahapan penelitian yakni: Perencanaan (Planning), Produksi (Production), Evaluasi (Evaluation). Alat pengumpulan data berupa lembar kuisioner yang telah diuji validitasnya oleh Ahli. Tahapan pengembangan PPE terhadap busana kerja melalui beberapa proses yaitu: tahap pertama (Planning) perencanaan pengembangan produk meliputi proses analisis konsep yang akan dikembangkan menjadi busana kerja. Kemudian proses pembuatan rancangan desain busana kerja dan rancangan bahan. Selanjutnya yakni tahap produksi (Production), yang meliputi proses memotong bahan, menjahit busana hingga proses penyelesaian akhir. Selanjutnya dilanjutkan pada tahap akhir yaitu evaluasi (Evaluation) terhadap kualitas hasil produk busana kerja dengan uji produk melalui penilaian oleh dua orang ahli busana. Hasil pengembangan busana kerja berbahan kain tenun motif subahnale dengan konsep trend busana spirituality terdiri dari blus dan celana yang bersumber dari konsep busana spirituality yang terfokus pada ciri khusus dari spirituality yakni berpijak pada filosofi sejarah budaya, model yang sederhana. Berdasarkan hasil uji produk busana kerja dari ahli busana I dan ahli busana II mendapatkan rata-rata hasil persentase 92%. Hal ini menunjukkan bahwa pengembangan busana kerja berbahan kain tenun motif subahnale dengan konsep trend busana spirituality memiliki tingkat pencapaian sangat baik.

ABSTRACT

This study aims to (1) describe the process of developing work clothes made from Subahnale motif woven fabric with the concept of Spirituality clothing, (2) find out the results of the development of work clothing made from Subahnale motif woven fabric with the concept of Spirituality clothing, This research is a research on the development of Research and Development (R&D) with PPE development model. The development process with the PPE model consists of 3 stages of research, namely: Planning, Production, Evaluation. Data collection tools in the form of questionnaire sheets that have been tested for validity by experts. The stages of PPE development for work clothing go through several processes, namely: the first stage (Planning) product development planning includes the process of analyzing the concept to be developed into work attire. Then the process of making work clothing design designs and material designs. Next is the production stage (Production), which includes the process of cutting materials, sewing clothes to the final finishing process. Then proceed to the final stage, namely the evaluation of the quality of workwear products with product tests through assessment by two fashion experts. The results of the development of work clothing made from woven subahnale motif fabrics with the concept of spirituality fashion trends consist of blouses and pants sourced from the concept of spirituality clothing which focuses on the special characteristics of spirituality, which is based on the philosophy of cultural history, a simple model. Based on the results of the workwear product test from fashion experts I and fashion experts II get an average percentage result of 92%. This shows that the development of workwear made from subahnale motif woven fabric with the concept of spirituality fashion trends has a very good level of achievement.
