*One of the goals of every football team is to score more goals against the opponent than to concede successfully. This research aims to analyze shooting and scoring patterns successfully, the Denpasar Perseden team throughout the PSSI Bali League 3 in 2021. The research procedures used in this research are, quantitative descriptive with the method of observing all Perseden Denpasar matches throughout the Liga 3 PSSI Bali 2021 (8 matches), which wants to create time intervals (15 minutes), type of play, number of passes before the formation of shooting and scoring, player actions before shooting and scoring, player positions in play and playing zones. Based on the results of processing and analysis of information, until it is sourced at time intervals ( 15 minutes) the best shooting is established at minutes 31-45 (+A. T) or as much as 20% and the best scoring is established at minutes 16-30 or as much as 25%. From the type of play such as open play or set play, then the number of successful shooting and scoring is also calculated made by Perseden Denpasar. When open play formed 29 times ( 86%) shooting, and when set play formed 21 times ( 14%) shooting. Total scoring was 19 ( 79%) during open play, and 5 ( 21%) from the atmosphere of set play. Based on passing before shooting, the best shooting percentage of Denpasar Perseden was established at 3 times (3 passing) passing before shooting 22 times or 15% of the total shooting totality, while the best scoring percentage of the best Denpasar Perseden was established at 4 times (4 passing) and 8 times (8 passing) passing before scoring 4 times or 16% of the total totality of scoring. Then at the beginning / action before shooting, the best shooting percentage of Denpasar Perseden occurred in Control + Shoot as much as 62 or 41% of the total overall shooting, while the best scoring percentage of the best Denpasar Perseden Control + Dribble + Shoot was 9 or 37% of the total scoring. From the position of the player, the winger is the most in shooting 51 times (34%) and the most scoring is created by the winger at 12 goals (50%). Then in the best zone shooting occurred Central Advenced 51 times or 34% shooting and the most scoring occurred Central Ultra Offensive which was 11 times or 45%. This data has implications for the evaluation of tactical training programs and also on one of the guidelines in preparing the Denpasar Perseden training program for the next competition.*
