ABSTRACT

This research aims to develop a promotional video for Sidetapa Tourist Village. This study is a development research conducted in Sidetapa Village, Banjar Subdistrict, Buleleng District. The research method used in this study is a mixed method, including both qualitative descriptive and quantitative descriptive research methods. The sources of data in this study were the Sidetapa Village tourism community group (Pokdarwis Desa Sidetapa), the village head of Sidetapa, Bamboo Corner Handicraft, and the bamboo weaving community of Sidetapa Village. After data collection, product development was carried out starting from the Define, Design, Develop, and Disseminate stages. Following product quality testing, it was found that the promotional video media for Sidetapa Tourist Village is suitable for use as promotional video media, in line with the feasibility level table, with a percentage acquisition from the quality test of 89.25%, categorized as highly suitable.

Keywords: development, media, video, tourist village.
