ABSTRACT

The purpose of the study was to examine the effect of (1) training on employee performance, (2) work motivation on employee performance, (3) training and work motivation on employee performance of the Regional Disaster Management Agency of Buleleng Regency. The study design is a causal quantitative study. The subjects tested were all members of the Rapid Response Team (TRC) of BPBD Buleleng Regency, and the objects were training, work motivation, and employee performance. The population of this study used 56 employees and all of them were used as subjects of observation, thus this study was classified as a population study. Data collection was carried out through the use of questionnaires and analyzed through the use of multiple linear regression analysis. The results of this study also prove that: (1) training contributes positively and substantially to employee performance of the Buleleng Regency Regional Disaster Management Agency, (2) work motivation contributes positively and substantially to employee performance of the Buleleng Regency Regional Disaster Management Agency, (3) training and work motivation contribute positively to employee performance of the Buleleng Regency Regional Disaster Management Agency.

Keywords: employee performance, training, and work motivation
