APPENDIX 1 : READING INTEREST SCALE VALIDATION

RESEARCH INSTRUMENTS VALIDATION

A. READING INTEREST

Introduction

The general objectives of the proposed research is to describe and correlate objectively the students' reading interest, reading self-efficacy in relation to their reading competency on English descriptive text and recount text in *Sekolah Menengah Pertama Negeri 3 Singaraja*. More specifically, the current research objectives are: 1) describing the eighth grade students' reading interest, reading self-efficacy, and reading competency on high-order-thinking items of the English descriptive and recount text types in *Sekolah Menengah Pertama Negeri 3 Singaraja*, 2) relating pairwisely the students' reading interest, reading self-efficacy, and their reading competency on high-order-thinking items of the English descriptive and recount text types in *Sekolah Menengah Pertama Negeri 3 Singaraja*, and 3) relating multiply the students' reading interest, reading self-efficacy, and their reading competency on high-order-thinking items of the English descriptive and recount text types in *Sekolah Menengah Pertama Negeri 3 Singaraja*. Prior to data collection, the instruments are validated. The reading interest, reading self-efficacy, reading competency are validated theoretically on reliability and validity through **expert judgements**. The reading competency test is validated empirically for item difficulty / facility (IF). There are three instruments that will be used, namely: 1) Reading Interest Scale, 2) Reading Self-Efficacy Scale, and 3) Reading Competency Test. Those instruments will be validated on its a) content validity, that is the consistency between indicators and their descriptors; b) reliability, that is the consistency between indicators, descriptors, and the items.

Reading Interest Scale

Reading interest is indicated by four indicators, namely: 1) pleasure, 2) willingness, 3) consciousness, and 4) attention (Oakhill, et.al., 2015). Pleasure is a feeling of enjoyment to read a descriptive text and a recount text. Willingness is a feeling of readiness in determining the specific information of descriptive text and recount text. Consciousness is a feeling of awareness

to determine textual references of descriptive text and recount text. Attention is a focus on the word meaning when reading a descriptive text and a recount text. The current research is adapted from **Oakhill, Cain, & Elbro's theory**.

a). Reading Interest Scale's Content Validity

Oakhill, et.al (2015) proposed four indicators and descriptors of reading interest. Please give your judgement or your agreement with the proposed indicators by crossing **Agree** or **Disagree** independently to ensure **the content validity of the reading interest scale** in the following column. **Note the score meanings are: 1=strongly disagree; 2=disagree; 3= agree; 4=strongly agree.**

APPENDIX 2: READING SELF-EFFICACY SCALE VALIDATION

B. READING SELF-EFFICACY

Reading self-efficacy is indicated as the variable that has relation with students' reading competency with four indicators, namely: 1) progress, 2) observational comparison, 3) social feedback, and 4) physiological states (Henk & Melnick, 1995). Progress is a feeling of confidence to move forward in determining the main idea of a descriptive text and a recount text. Observational comparison is a confidence of expressing careful consideration in determining specific information of a descriptive text and a recount text. Social feedback is a feeling of confidence to get an input or feedback in determining textual references of a descriptive text and a recount text. Physiological states is ready mental states to determine the word meaning of a descriptive text and a recount text. The instrument used to measure reading self-efficacy is a scale. The scale is adapted from Henk & Melnick (1995). In order to ensure the validity and reliability, the instruments should be judged by experts prior to its use in data collection.

a). Reading Self-Efficacy Scale's Content Validity

Henk & Melnick (1995) proposed four indicators and descriptors of reading self-efficacy. Please give your judgement or your agreement with the proposed indicators by crossing **Agree** or **Disagree** independently to ensure **the content validity of the reading self-efficacy scale** in the following column. Note the score meanings are: 1=strongly disagree; 2=disagree; 3= agree; 4=strongly agree.

APPENDIX 3 : READING COMPETENCY TEST VALIDATION

C. READING COMPETENCY TEST

Reading competency can be defined as the skill that interpret a textbook from the text and monitor the text itself (Ntereke et al, 2017). According to Latifa (2018) there are four aspects or indicators in reading competency, namely: 1) the main idea that is a simple sentence that tells about the point of the text or passage, 2) specific information are the information contained on the text or paragraph, 3) textual references are pronouns that refer to the other nouns of the text, and 4) word meanings are the implicational or psychological meaning of certain words based on the context of the text. In order to ensure the validity and reliability, the instruments should be judged by experts prior to its use in data collection.

a). Reading Competency Test's Content Validity

To ensure the reading competency validity and reliability, please give your judgment or your agreement with the proposed indicators and descriptors by crossing **Agree** or **Disagree** independently to ensure **the content validity of the reading competency test** in the following column. Note the score meanings are: 1=strongly disagree; 2=disagree; 3= agree; 4=strongly agree.

| Indicators | Descriptors | Score Judgement | | | |
|----------------------|--|-----------------|---|---|---|
| | | 1 | 2 | 3 | 4 |
| The Main Idea | The main idea that is a simple sentence that tells about the point of the text or passage. | | | | |
| Specific Information | Specific information are the information contained on the text or paragraph. | | | | |
| Textual References | Textual references are pronouns that refer to the other nouns of the text. | | | | |
| Word Meanings | Word meanings are the implicational or psychological meaning of certain words based on the context of the text | | | | |

APPENDIX 4. INSTRUMENT VALIDATION BY JUDGE 1

RESEARCH INSTRUMENTS VALIDATION

Introduction

The general objectives of the proposed research is to describe and correlate objectively the students' reading interest, reading self-efficacy in relation to their reading competency on English descriptive text and recount text in *Sekolah Menengah Pertama Negeri 3 Singaraja*. More specifically, the current research objectives are: 1) describing the eighth grade students' reading interest, reading self-efficacy, and reading competency on high-order-thinking items of the English descriptive and recount text types in *Sekolah Menengah Pertama Negeri 3 Singaraja*, 2) relating pairwisely the students' reading interest, reading self-efficacy, and their reading competency on high-order-thinking items of the English descriptive and recount text types in *Sekolah Menengah Pertama Negeri 3 Singaraja*, and 3) relating multiply the students' reading interest, reading self-efficacy, and their reading competency on high-order-thinking items of the English descriptive and recount text types in *Sekolah Menengah Pertama Negeri 3 Singaraja*. Prior to data collection, the instruments are validated. The reading interest, reading self-efficacy, reading competency are validated theoretically on reliability and validity through **expert judgements**. The reading competency test is validated empirically for item difficulty / facility (IF). There are three instruments that will be used, namely: 1) Reading Interest Scale, 2) Reading Self-Efficacy Scale, and 3) Reading Competency Test. Those instruments will be validated on its a) content validity, that is the consistency between indicators and their descriptors; b) reliability, that is the consistency between indicators, descriptors, and the items.

1). Reading Interest Scale

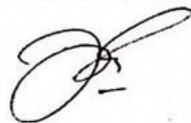

Reading interest is indicated by four indicators, namely: 1) pleasure, 2) willingness, 3) consciousness, and 4) attention (Oakhill, et.al., 2015). Pleasure is a feeling of enjoyment to read a descriptive text and a recount text. Willingness is a feeling of readiness in determining the specific information of descriptive text and recount text. Consciousness is a feeling of awareness to determine textual references of descriptive text and recount text. Attention is a focus on the word meaning when reading a descriptive text and a recount text. The current research is adapted from **Oakhill, Cain, & Elbro's theory**.

a). Reading Interest Scale's Content Validity

Oakhill, et.al (2015) proposed four indicators and descriptors of reading interest. Please give your judgement or your agreement with the proposed indicators by crossing Agree or Disagree independently to ensure the content validity of the reading interest scale in the following column. Note the score meanings are: 1=strongly disagree; 2=disagree; 3=agree; 4=strongly agree.

2). Reading Self-Efficacy Scale

Reading self-efficacy is indicated as the variable that has relation with students' reading competency with four indicators, namely: 1) progress, 2) observational comparison, 3) social feedback, and 4) physiological states (Henk & Melnick, 1995). Progress is a feeling of confidence to move forward in determining the main idea of a descriptive text and a recount text. Observational comparison is a confidence of expressing careful consideration in determining specific information of a descriptive text and a recount text. Social feedback is a feeling of confidence to get an input or feedback in determining textual references of a descriptive text and a recount text. Physiological states is ready mental states to determine the word meaning of a descriptive text and a recount text. The instrument used to measure reading self-efficacy is a scale. The scale is adapted from Henk & Melnick (1995). In order to ensure the validity and reliability, the instruments should be judged by experts prior to its use in data collection.

a). Reading Self-Efficacy Scale's Content Validity

Henk & Melnick (1995) proposed four indicators and descriptors of reading self-efficacy. Please give your judgement or your agreement with the proposed indicators by crossing Agree or Disagree independently to ensure the content validity of the reading self-efficacy scale in the following column. Note the score meanings are: 1=strongly disagree; 2=disagree; 3=agree; 4=strongly agree.

b). Reading Self-Efficacy Scale's Reliability

Henk & Melnick (1995) proposed four indicators and descriptors of reading self-efficacy. Please give your judgment or your agreement with the proposed indicators, descriptors, and the corresponding items by crossing the appropriate score independently to ensure the reliability of the reading self-efficacy scale in the following column. Note the score meanings are: 1=very irrelevant; 2=irrelevant; 3=relevant; 4=very relevant.

3). Reading Competency Test

Reading competency can be defined as the skill that interpret a textbook from the text and monitor the text itself (Ntereke et al, 2017). According to Latifa (2018) there are four aspects or indicators in reading competency, namely: 1) the main idea that is a simple sentence that tells about the point of the text or passage, 2) specific information are the information contained on the text or paragraph, 3) textual references are pronouns that refer to the other nouns of the text, and 4) word meanings are the implicational or psychological meaning of certain words based on the context of the text. In order to ensure the validity and reliability, the instruments should be judged by experts prior to its use in data collection.

a). Reading Competency Test's Content Validity

To ensure the reading competency validity and reliability, please give your judgment or your agreement with the proposed indicators and descriptors by crossing Agree or Disagree independently to ensure the content validity of the reading competency test in the following column. Note the score meanings are: 1=strongly disagree; 2=disagree; 3= agree; 4=strongly agree.

b). Reading Competency Test's Reliability

Latifa (2018) proposed four aspects or indicators and descriptors of reading competency test. Please give your judgment or your agreement with the proposed aspects or indicators, descriptors, and the corresponding items by crossing the **corresponding score** independently to ensure the **reliability of the reading competency test** in the following column. Note the score meanings are: 1=very irrelevant; 2=irrelevant; 3=relevant; 4=very relevant.

APPENDIX 5. INSTRUMENT VALIDATION BY JUDGE 2

RESEARCH INSTRUMENTS VALIDATION

Introduction

The general objectives of the proposed research is to describe and correlate objectively the students' reading interest, reading self-efficacy in relation to their reading competency on English descriptive text and recount text in *Sekolah Menengah Pertama Negeri 3 Singaraja*. More specifically, the current research objectives are: 1) describing the eighth grade students' reading interest, reading self-efficacy, and reading competency on high-order-thinking items of the English descriptive and recount text types in *Sekolah Menengah Pertama Negeri 3 Singaraja*, 2) relating pairwisely the students' reading interest, reading self-efficacy, and their reading competency on high-order-thinking items of the English descriptive and recount text types in *Sekolah Menengah Pertama Negeri 3 Singaraja*, and 3) relating multiply the students' reading interest, reading self-efficacy, and their reading competency on high-order-thinking items of the English descriptive and recount text types in *Sekolah Menengah Pertama Negeri 3 Singaraja*. Prior to data collection, the instruments are validated. The reading interest, reading self-efficacy, reading competency are validated theoretically on reliability and validity through **expert judgements**. The reading competency test is validated empirically for item difficulty / facility (IF). There are three instruments that will be used, namely: 1) Reading Interest Scale, 2) Reading Self-Efficacy Scale, and 3) Reading Competency Test. Those instruments will be validated on its a) content validity, that is the consistency between indicators and their descriptors; b) reliability, that is the consistency between indicators, descriptors, and the items.

1). Reading Interest Scale

Reading interest is indicated by four indicators, namely: 1) pleasure, 2) willingness, 3) consciousness, and 4) attention (Oakhill, et.al., 2015). Pleasure is a feeling of enjoyment to read a descriptive text and a recount text. Willingness is a feeling of readiness in determining the specific information of descriptive text and recount text. Consciousness is a feeling of awareness to determine textual references of descriptive text and recount text. Attention is a focus on the word meaning when reading a descriptive text and a recount text. The current research is adapted from **Oakhill, Cain, & Elbro's theory**.

a). Reading Interest Scale's Content Validity

Oakhill, et.al (2015) proposed four indicators and descriptors of reading interest. Please give your judgement or your agreement with the proposed indicators by crossing Agree or Disagree independently to ensure the content validity of the reading interest scale in the following column. Note the score meanings are: 1=strongly disagree; 2=disagree; 3=agree; 4=strongly agree.

2). Reading Self-Efficacy Scale

Reading self-efficacy is indicated as the variable that has relation with students' reading competency with four indicators, namely: 1) progress, 2) observational comparison, 3) social feedback, and 4) physiological states (Henk & Melnick, 1995). Progress is a feeling of confidence to move forward in determining the main idea of a descriptive text and a recount text. Observational comparison is a confidence of expressing careful consideration in determining specific information of a descriptive text and a recount text. Social feedback is a feeling of confidence to get an input or feedback in determining textual references of a descriptive text and a recount text. Physiological states is ready mental states to determine the word meaning of a descriptive text and a recount text. The instrument used to measure reading self-efficacy is a scale. The scale is adapted from Henk & Melnick (1995). In order to ensure the validity and reliability, the instruments should be judged by experts prior to its use in data collection.

a). Reading Self-Efficacy Scale's Content Validity

Henk & Melnick (1995) proposed four indicators and descriptors of reading self-efficacy. Please give your judgement or your agreement with the proposed indicators by crossing Agree or Disagree independently to ensure the content validity of the reading self-efficacy scale in the following column. Note the score meanings are: 1=strongly disagree; 2=disagree; 3=agree; 4=strongly agree.

Text Seven : Descriptive Text of Procedure

How do you serve a cup of tea? If you are using leaves, put a teaspoon of tea per cup in your warm teapot. Fill it with freshly boiled water (never boil water twice), stir slightly, and allow it to ‘steep’ or sit for between 2 and 5 minutes, depending on the strength you seek. Stir it again before you serve.

Serving the coffee at the counter or at the table is always with the saucer placing the handle of the cup to the left and the spoon to the right of the cup with the handle of the latter towards the customer. Customers are pleased to find on the saucer a good small chocolate treat to be enjoyed before or after the coffee. (<https://www.professorhouse.com>).
