ABSTRACT

*This research aims to examine the influence of price and product quality on purchasing decisions for iPhone brand cellphones among students at the Faculty of Economics, Ganesha Education University. The type of research used is quantitative research. The population in this study were active students at the Faculty of Economics, Ganesha Education University. The sampling technique used in this research was nonprobability sampling or saturated sampling, so that the sample used was 96 students from the Faculty of Economics, Ganesha Education University. The data collection method in this research uses the observation method and interview method as well as the questionnaire method with a Likert scale. Data processing in this research uses the SPSS version 25 for Windows program. The data analysis technique used is multiple linear regression analysis with partial (*t* test) and simultaneous (*F* test) hypothesis testing. The results of this research show that: (1) price has a positive and significant influence on the decision to purchase iPhone brand cellphones among students at the Faculty of Economics, Ganesha Education University, (2) product quality has a positive and significant influence on the decision to purchase iPhone brand cellphones among students at the Faculty of Economics, Ganesha Education University, and (3) price and product quality simultaneously have a positive and significant effect on the decision to purchase an iPhone brand cellphone among students at the Faculty of Economics, Ganesha Education University.*

Keywords: price, purchasing decisions, product quality.
