SCRIPT UNTUK SOAL NO 1 SAMPAI DENGAN NO 4

The importance of reading

I personally think that reading is an important activity in our life. Why do I say so? Firstly, by reading we can get a lot of information about many things in the world such as science, technology, sports, arts, and culture. Secondly, by reading we can get a lot of news and knowledge about something happening in any part of the world which we can see directly. Thirdly, reading can give us pleasure. When we are tired, we can read books, newspaper or magazines on the entertainment column such as short stories, comedies or quizzes to make us relax. Fourthly, reading can also take us to other part of the world. By reading a book about Irian Jaya we may feel that we're really sitting in the jungles, not at home or in our rooms. Based on the facts above, it is obvious that everyone needs to read books, newspapers, magazines or other to get knowledge, news, information and also entertainment. In other words we can say reading is truly important in our life.

Bananas can easily be found in tropical regions of the world. Bananas need plenty of rain and sunshine for most of the year. This makes bananas grow well and bear fruit all year around. A banana tree grows from a small root to three meters high. One of the suckers will grow to its full size and bear the fruit. The fruit grows downwards in large bunches. A fully grown bunch can weigh up to 35 kilos.

*Petruk Cave* is named because the length of the cave is as long as the *Petruk's* nose. The name *Petruk* comes from a stone or stalagmite in the cave which has a shape like *Petruk's* nose, the name of the *Punokawan* character from Java, *Ki Semar's* tall son, but has a very sharp nose.

The cave consists of three floors, the first is a basic cave, *Hindu* caves, and *Petruk* cave. The base cave is a short cave that is just 100 meters away. The cave is used tourist attraction. A *Hindu* cave is part of the cave that is usually used to put offerings to the ancestor. Inside *Petruk* cave there are so many stalactites and stalagmites which are awesome. If you want to explore this cave you must be led by guides who are ready to take you through the cave. After arriving at the end of the cave, you see the beach or waterfall located near the end of the cave.

#### TEKS 4

##### Tanjung Puting National Park

Tanjung Puting National Park is an internationally famous eco-tourism destination, which is located in the southwest of the Central Kalimantan peninsula. Visitors from foreign countries come to this park because of its amazing nature. This is called a park, but unlike any park that you have seen in your city, this is a jungle! It is a real jungle, which is home to the most interesting animals in the world: orangutans.

To see orangutans, we should go to Camp Leakey, which is located in the heart of Tanjung Puting National Park. Camp Leakey is a rehabilitation place for ex-captive orangutans and also a preservation site. It is also a famous center for research about orangutans which has been conducted by the famous primatologist Dr. Birute Galdikas since 1971. Here visitors can see daily feedings to orangutans at jungle platforms as part of the rehabilitation process to their natural habitat. This event allows them to see orangutans up close.

Though the park is home to many animals, seeing orangutans is usually the visitors' main reason for visiting the park. Orangutans, which means the man of the forest, are the largest arboreal animal on the planet. Most of their lives are spent in trees where orangutans travel from branch to branch by climbing or swinging with their long arms.

(Adapted from: <https://orangutan.org/rainforest/tanjung-puting-national-park/>)

9. We can conclude that paragraph one is...
- Giving information about Central Kalimantan
  - Describing orangutans in the park of Tanjung Puting Park
  - Describing the reason people visit Tanjung Puting Park
  - Explaining the situation of orangutans
  - Describing the location of Tanjung Puting National Park

Natural Bridge National Park is a luscious tropical rainforest. It is located 110 kilometers south of Brisbane and is reached by following the Pacific Highway to Nerang and then by traveling through the Numinbah Valley. This scenic roadway lies in the shadow of Lamington National Park.

The phenomenon of the rock formed into a natural ‘arch’ and the cave through which a waterfall cascade is a short one-kilometer walk below a dense rainforest canopy from the main picnic area. Swimming is permitted in the rock pools. Night-time visitors to the cave will discover the unique feature of the glow worms. Picnic areas offer toilets, barbecues, shelter sheds, water, and fireplaces; however, overnight camping is not permitted.

Angkor Wat faced a Hindu temple and a man of Buddhist temple in Cambodia. It is the largest religious monument in the world. The temple was built by the Khmer King, Suryawarman II in the early 12th century in Yosadapura, the capital of the Khmer Empire as this temple of eventual moslem. It is dedicated to Wisnu. It is designed to represent Khmer Meru, the frame of the Devis in Hindu mythology within the mouth, and has an outer wall that is 3 to 7 km long. It has three rectangular galleries which race about the neck. At the center of the temple stands Queen Cap of Tower.

The Angkor Wat complex is located in the northern province of Siem Reap. Its overall square is approximately 400 square kilometers; on it, numerous temples, basins, reservoirs, canals, and communication routes are located. Angkor Wat had been a center of the Khmer Kingdom; with its impressive monuments, urban plans, and complicated system of canals, the site is an exemplar of Khmer architecture, closely linked to the geographical context, and possessing strong symbolic significance.

Angkor Wat is so vast that it is difficult to grasp its entire architectural plan if you are walking around the monument's territory. From a distance, Angkor Wat looks like a colossal mass of stone, but if you get closer, you will see numerous elevated towers, chambers, and courtyards, all of them located on different levels, and connected with stairways and covered galleries. ### Soal: TEKS 7

The name of Raja Ampat (Raja means king, and *empat* means four) comes from local mythology that tells of a woman who finds seven eggs. Four of the seven hatch and become kings who occupy four of Raja Ampat's biggest islands whilst the other three become a ghost, a woman, and a stone.

History shows that Raja Ampat was once a part of the Sultanate of Tidore, an influential kingdom from Maluku. Yet, after the Dutch invaded Maluku, it was claimed by the Netherlands.

The first recorded sighting and landing by Europeans of the Ampat Islands was by the Portuguese navigator Jorge de Menezes and his crew in 1526, en route from Biak, the Bird's Head Peninsula, and Waigeo, to Halmahera .

The English explorer William Dampier gave his name to Dampier Strait, which separates Batanta island from Waigeo island. To the east, there is a strait that separates Batanta from Salawati. In 1759 Captain William Wilson sailing in the East Indiaman Pitt navigated these waters and named a strait the 'Pitt strait', after his vessel; this was probably the channel between Batanta and Salawati.

(Adapted from: <https://indonesiakaya.com/pustaka-indonesia/raja-ampat-surga-petualangan-dunia-di-ujung-papua/>)

$$vc = \frac{D}{A + B + C + D}$$

$$vc = \frac{40}{0 + 0 + 0 + 40}$$

$$vc = \frac{40}{40} = 1$$

Tes hasil belajar memiliki koefisien validitas isi sama dengan 1,00 dengan kategori sangat tinggi.

**Tanjung Puting National Park**

Tanjung Puting National Park is an internationally famous eco-tourism destination, which is located in the southwest of the Central Kalimantan peninsula. Visitors from foreign countries come to this park because of its amazing nature. This is called a park, but unlike any park that you have seen in your city, this is a jungle! It is a real jungle, which is home to the most interesting animals in the world: orangutans.

To see orangutans, we should go to Camp Leakey, which is located in the heart of Tanjung Puting National Park. Camp Leakey is a rehabilitation place for ex-captive orangutans and also a preservation site. It is also a famous center for research about orangutans which has been conducted by the famous primatologist Dr. Birute Galdikas since 1971. Here visitors can see daily feedings to orangutans at jungle platforms as part of the rehabilitation process to their natural habitat. This event allows them to see orangutans up close

Though the park is home to many animals, seeing orangutans is usually the visitors' main reason for visiting the park. Orangutans, which means the man of the forest, are the largest arboreal animal on the planet. Most of their lives are spent in trees where orangutans travel from branch to branch by climbing or swinging with their long arms.

7. We can conclude that paragraph one is...

*Tandai satu oval saja.*

- a. Giving information about Central Kalimantan
- b. Describing orangutans in the park of Tanjung Puting Park
- c. Describing the reason people visit Tanjung Puting Park
- d. Explaining the situation of orangutans

The name of Raja Ampat (Raja means king, and empat means four) comes from local mythology that tells of a woman who finds seven eggs. Four of the seven hatch and become kings who occupy four of Raja Ampat's biggest islands whilst the other three become a ghost, a woman, and a stone.

History shows that Raja Ampat was once a part of the Sultanate of Tidore, an influential kingdom from Maluku. Yet, after the Dutch invaded Maluku, it was claimed by the Netherlands.

The first recorded sighting and landing by Europeans of the Ampat Islands was by the Portuguese navigator Jorge de Menezes and his crew in 1526, en route from Biak, the Bird's Head Peninsula, and Waigeo, to Halmahera .

The English explorer William Dampier gave his name to Dampier Strait, which separates Batanta island from Waigeo island. To the east, there is a strait that separates Batanta from Salawati. In 1759 Captain William Wilson sailing in the East Indiaman Pitt navigated these waters and named a strait the 'Pitt strait', after his vessel; this was probably the channel between Batanta and Salawati.

Global warming is a phenomenon used to describe the gradual increase in the temperature of Earth's atmosphere and oceans. Global warming is not a new problem lately people are acknowledging that we are facing a serious problem. Climate change is apparent everywhere.

First of all, there is irrefutable evidence that human activities have changed the atmosphere of our earth. Since the time we have been industrializing, we started polluting our waters and air, and have been releasing greenhouse gases that contribute to global warming.

Secondly, according to research by the Greenpeace organization, there is evidence of extensive deforestation being carried out in Indonesia and other tropical countries around the world. These forests are used to grow crops like palm sugar, palm oil, and coffee. The impact of climate change is noticeable throughout Asia Pacific either during hot days or too much rain accompanied by wind and thunderstorms. This has started to affect the economy as well.

Furthermore, the shifting weather patterns have made it difficult for farmers to grow crops. A recent study has shown that due to unpredictable weather patterns, there have been a lot of failed crops (Reuters, 2007)

In conclusion, global warming is not a new problem nor are we solely responsible for it. But as citizen of the world, we have to take every possible action to help overcome this issue. it is not for us but for all the future generations to follow.

I think that reading is an important activity in our life. Why do I say so? Firstly, by reading we can get a lot of information about many things in the world such as science, technology, sports, arts, and culture. Secondly, by reading we can get a lot of news and knowledge about something happening in any part of the world which we can see directly. Thirdly, reading can give us pleasure. When we are tired, we can read books, newspapers, or magazines on the entertainment column such as short stories, comedies, or quizzes to make us relax. Fourthly, reading can also take us to other parts of the world. By reading a book about Irian Jaya we may feel that we're sitting in the jungles, not at home or in our rooms. Based on the facts above, it is obvious that everyone needs to read books, newspapers, magazines or others to get knowledge, news, information and also entertainment. In other words we can say reading is truly important in our life.

## 22. TEXT 13

\* 1 poin

We all know that exercise is important in our daily lives, but we may not know why or what exercise can do for us. Here are some benefits of exercise.

Exercise increases energy levels. Exercise improves both the strength and the efficiency of your cardiovascular system to get oxygen and nutrients to your muscles. When your cardiovascular system works better everything seems easier and you have more energy for the fun stuff in life.

Exercise improves muscle strength. Staying active keeps muscles strong and joints, tendons and ligaments flexible, allowing you to move more easily and avoid injury. Strong muscles and ligaments reduce your risk of joint and lower back pain by keeping joints in proper alignment. They also improve coordination and balance.

Exercise can help you to maintain a healthy weight. The more you exercise, the more calories you burn. In addition, the more muscle you develop, the higher your metabolic rate becomes, so you burn more calories even when you're not exercising. The result? You may lose weight and look better physically which will boost your self-esteem.

20. Which is NOT TRUE based on the text?

*Tandai satu oval saja.*

- a. Energy level improves if we do exercise
- b. Lower back pain is caused by staying active
- c. Things will be easier if the cardiovascular system is functioning well

## Vegetarians

There are many reasons why people become vegetarians, including personal health, the environment, and the economy.

A vegetarian is a person who does not eat meat, poultry, and fish. Vegetarians mostly eat fruit, vegetables, legumes, grains, seeds, and nuts. Vegetarians also consume eggs and dairy products, but they avoid meat products, such as beef, chicken stocks, and gelatin.

According to research, vegetarians have a lower risk of heart disease, high cholesterol, diabetes, obesity, and high blood pressure. This may happen due to a healthy vegetarian diet, which has low fat but high fiber.

However, a vegetarian diet can be high in fat if it includes excessive amounts of fatty snacks, fried food, whole dairy products, and eggs.

At the same time, a vegetarian diet can be simple and easy to prepare. Therefore, a vegetarian diet must be well-planned to prevent and treat certain diseases.

### The Benefits of Trees

Trees play a critical role for people and the planet. They provide numerous benefits to our health and environment. People plant trees to provide shade and beautify our landscapes. There are other numerous benefits of trees in urban cities.

First, trees mitigate climate change. Trees are effective in storing carbon as they grow. They absorb CO<sub>2</sub> from the atmosphere and store it as carbon in the biomass (trunk, branches, leaves, and roots) and in the soil. Trees are a powerful tool in reducing urban heating in several ways. One of the simplest ways is by providing shade. Shaded areas can be up to 20–45 degrees cooler than areas that lack shade.

Second, trees are an important component of green infrastructure. It refers to the network of natural and semi-natural features that provide ecosystem services such as air and water purification, flood control, and climate regulation. Trees also can help reduce stormwater runoff by absorbing rainwater through their roots and reducing erosion. One study revealed that increasing tree canopy by 10% could reduce stormwater runoff by 9.5%.

Third, trees provide habitat for wildlife and improve biodiversity in urban areas. They can form a critical part of a "green chain", acting as bridges for insects and animals between habitats. Many species of wildlife depend on trees for habitat. They provide food, protection, and homes for many birds and mammals.

Fourth, trees can play a role in accelerating recovery from illness. Studies have shown that patients who have access to green spaces with trees have shorter hospital stays and require less pain medication than those who do not. Exposure to nature has also been linked to reduced stress levels and improved health outcomes, which can aid in the recovery process.

In conclusion, trees are useful for well-beings and environment. They reduce urban heating, provide ecosystem, provide food and protection for wildlife, and help people's health recovery. There are still many other benefits of trees.

### TEXT 1

The importance of fruits and vegetables is no secret, but there may be more advantages to a fruit-and-veggie-filled diet than you realize. Fruits and vegetables are significant parts of a healthy diet, so when you add fruits and veggies to your daily menu, you'll reap the benefits of healthy food and good nutrition. Eating fruits and vegetables supports your overall health in a variety of ways, and adopting a healthier diet can also lead to an improved lifestyle and boosted satisfaction. Here's a closer look at the many benefits of fruits and vegetables.

First, fruits and vegetables contain nutrients. They are a crucial part of a healthy diet because they give us necessary nutrients that we can't always produce ourselves, like fiber. They also provide beneficial vitamins and minerals. Some of the most nutritious fruits are apples, blueberries, mangos, and pineapples. However, certain fruits offer different kinds of nutrients. This means that you can cater your fruit choices to your specific dietary needs. In general, however, it's best to have a wide variety so you can get the most nutrition.

Second, fruits and vegetables are good for your eyes. Studies have also shown a correlation between fruit and vegetable consumption and vision health. Introducing more fruits and vegetables to your diet may help prevent two common aging-related eye diseases—cataracts and macular degeneration. This prevention is especially helped by lutein and zeaxanthin, which are found in green vegetables like spinach and kale.

Third, eating fruits and vegetables can also help you maintain a healthy blood pressure. One study found that "a diet rich in fruits, vegetables, and low-fat dairy foods and with reduced saturated and total fat can substantially lower blood pressure". In the study, subjects eating more fruit and vegetables than the control diet showed improvements on par with taking blood pressure medications.

Finally, consuming fruits and vegetables lower your disease risk. People whose diets feature more fruits and vegetables also experience decreased risk for certain diseases. These kinds of diets have been shown to lower the risk of cardiovascular disease and diabetes, as well as help prevent certain kinds of cancer.

##### Soal Pilihan Ganda (Tes Formatif)

Mata Pelajaran : Bahasa Inggris  
Kelas/Semester : XI/2  
Tahun Pelajaran : 2022/2023  
Materi : Descriptive Text  
Petunjuk : Answer the following questions correctly!

##### My Favourite Teacher

Everyone has a favorite teacher we feel a special connection. In primary school, my favorite teacher was Ms. Nuraini. I was not such a good pupil, but just looking at Ms. Nuraini made me feel that I was going to learn.

Ms. Nuraini is 45 years old and rather short about 1.50 meters. Since I'm short too, I always feel a bit nervous with a tall teacher who towers menacingly over me. It was reassuring to be around Ms. Nuraini. Also, I always enjoy the fragrance of the herbs that she grew in our classroom.

On the top of her round head, Ms. Nuraini always wore a colorful headscarf with an intriguing design. This, plus her warm smile, brightened the lessons in her classroom. However, the best part of her face was her kind eyes that said to her students, "I care deeply about you."

Ms. Nuraini usually wore a bright long-sleeve blouse that went well with her coffee-color skin. She did not wear much jewelry, just a simple Casio watch on her left hand and a ruby red ring on the ring finger of her right hand. The other ‘decoration’ on her hand came from types of ink from whiteboard markers and other sources.

On most days, Ms. Nuraini wore loose-fitting pants. Finally, on her feet, she often had brown closed-toe shoes with just a slightly raised heel that made a peculiar ‘clip-clop’ sound as she walked. These low-heeled shoes made it easy for Ms. Nuraini to walk briskly around the classroom to help us when we were doing group activities.

I can still feel her friendly touch on my shoulder as she stood listening carefully to our group or explaining something that none of us could figure.

Questions:

1. What is the participant of the text about?
2. What makes the writer to feel special to Ms. Nuraini?
3. What is paragraph three describing?
4. Write down five adjectives that you find in the text!
5. Based on the text, match the sentences with the structures!

### Estimated Marginal Means

### 1. Grand Mean

Dependent Variable	Mean	Std. Error	95% Confidence Interval	
			Lower Bound	Upper Bound
post_nyimak	31.214 <sup>a</sup>	.143	30.931	31.496
post_HB	16.350 <sup>a</sup>	.085	16.181	16.520

a. Covariates appearing in the model are evaluated at the following values: pre\_nyimak = 27.9316, pre\_HB = 13.6752.

### 2. model

Based on estimated marginal means

\*. The mean difference is significant at the ,05 level.

b. Adjustment for multiple comparisons: Least Significant Difference (equivalent to no adjustments).

### Multivariate Tests

	Value	F	Hypothesis df	Error df	Sig.
Pillai's trace	.645	26.687	4.000	224.000	.000
Wilks' lambda	.396	32.646 <sup>a</sup>	4.000	222.000	.000
Hotelling's trace	1.417	38.957	4.000	220.000	.000
Roy's largest root	1.338	74.903 <sup>b</sup>	2.000	112.000	.000

Each F tests the multivariate effect of model. These tests are based on the linearly independent pairwise comparisons among the estimated marginal means.

a. Exact statistic

b. The statistic is an upper bound on F that yields a lower bound on the significance level.

### Univariate Tests

Dependent Variable		Sum of Squares	df	Mean Square	F	Sig.
post_nyimak	Contrast	71.190	2	35.595	14.981	.000
	Error	266.114	112	2.376		
post_HB	Contrast	122.135	2	61.067	71.498	.000
	Error	95.660	112	.854		

The F tests the effect of model. This test is based on the linearly independent pairwise comparisons among the estimated marginal means.
