ABSTRAK

Penelitian ini dilakukan bertujuan untuk mendeskripsikan bentuk rancang bangun media pembelajaran berbasis video tutorial teknik dasar servis dalam permainan bola voli serta mengetahui tanggapan dari para ahli serta peserta didik dalam uji coba perorangan, uji coba kelompok kecil dan uji coba kelompok besar materi teknik dasar servis dalam permainan bola voli terhadap video yang dikembangkan. Metode pengumpulan data menggunakan kuesioner berbentuk skala skor dan studi literatur. Penelitian ini diimplementasikan menggunakan model pengembangan ADDIE (*Analyze, Design, Development, Implementation, dan Evaluation*). Hasil pengembangan media pembelajaran berbasis video tutorial yang dilakukan yakni: (a) ahli isi pembelajaran berada pada kategori sangat baik dengan presentase 92%, (b) ahli desain pembelajaran berada pada kategori sangat baik dengan presentase 94%, (c) ahli media pembelajaran berada pada kategori sangat baik dengan presentase 92%, (d) ahli praktisi lapangan berada pada kategori sangat baik dengan presentase 96%, (e) uji perorangan berada pada kategori sangat baik dengan presentase 95%, (f) uji coba kelompok kecil berada pada kategori sangat baik dengan presentase 95%, (g) uji coba kelompok besar berada pada kategori sangat baik dengan presentase 92%. Dari hasil tersebut dikatakan bahwa media pembelajaran berbasis video tutorial teknik dasar servis dalam permainan bola voli pada peserta didik sekolah menengah pertama dapat dinyatakan sangat layak digunakan. Saran kepada pengajar untuk mengimplementasikan media pembelajaran berbasis video tutorial pada mata pelajaran yang relevan.

ABSTRACT

This study was conducted with the aim of describing the design of learning media based on video tutorials on basic service techniques in volleyball and to find out the responses of experts and students in individual trials, small group trials and large group trials of basic service techniques in volleyball to the videos developed. The data collection method used a questionnaire in the form of a score scale and literature studies. This research was implemented using the ADDIE development model (Analyze, Design, Development, Implementation, and Evaluation). The results of the development of video tutorial-based learning media that were carried out were: (a) learning content experts were in the very good category with a percentage of 92%, (b) learning design experts were in the very good category with a percentage of 94%, (c) learning media experts were in the very good category with a percentage of 92%, (d) field practitioner experts were in the very good category with a percentage of 96%, (e) individual tests were in the very good category with a percentage of 95%, (f) small group trials were in the very good category with a percentage of 95%, (g) large group trials were in the very good category with a percentage of 92%. From these results, it is said that video tutorial-based learning media for basic volleyball service techniques for junior high school students can be stated as very feasible to use. Suggestions for teachers to implement video tutorial-based learning media in relevant subjects.

Keywords: Development, Volleyball, ADDIE, Video Tutorial.
