ABSTRAK

Penelitian ini dilakukan bertujuan untuk mendeskripsikan bentuk rancang bangun pengembangan media pembelajaran berbasis video pembelajaran teknik dasar *passing* dan *control* dalam permainan sepak bola SMP Negeri 1 Sawan, serta mengetahui tanggapan para ahli serta peserta didik dalam uji coba kelompok kecil dan uji coba kelompok besar. Metode pengumpulan data menggunakan kuesioner bentuk skala skor. Penelitian mengembangkan media pembelajaran berbasis video pembelajaran menggunakan model ADDIE (*Analyze, design, Development, Implementation dan Evaluatin*). Hasil analisis data pengembangan media pembelajaran berbasis video pembelajaran diuji oleh para ahli dan dapat penilaian ahli isi/materi pembelajaran 86% kategori baik, penilaian ahli desain pembelajaran 92.5% kategori sangat baik, penilaian ahli media pembelajaran 91,6% kategori sangat baik dan penilaian ahli praktisi lapang 96% kategori sangat baik. Uji coba kelompok kecil mendapatkan penilaian 96.4% kategori sangat baik dan uji coba kelompok besar mendapatkan penilaian 96.8% kategori sangat baik. Dari hasil tersebut dapat disimpulkan media pembelajaran berbasis video pembelajaran dikembangkan layak diterapkan pada pembelajaran. Saran kepada pengajar untuk mengimplementasikan media pembelajaran berbasis video pembelajaran pada mata pelajaran yang relevan.

ABSTRACT

This study was conducted with the aim of describing the design of developing learning media based on video learning of basic passing and control techniques in football games at SMP NEGERI 1 Sawan, as well as to find out the responses of experts and students in small group trials and large group trials. The data collection method used a questionnaire in the form of a score scale. The study developed learning media based on learning videos using the ADDIE model (Analyze, Design, Development, Implementation and Evaluation). The results of the data analysis of the development of learning media based on learning videos were tested by experts and received an assessment from content/learning material experts of 86% in the good category, an assessment from learning design experts of 92.5% in the very good category, an assessment from learning media experts of 91.6% in the very good category and an assessment from field practitioner experts of 96% in the very good category. The small group trial received an assessment of 96.4% in the very good category and the large group trial received an assessment of 96.8% in the very good category. From these results, it can be concluded that the learning media based on learning videos developed is worthy of being applied to learning. Suggestions for teachers to implement learning media based on learning videos in relevant subjects.
