ABSTRAK

Penelitian ini difokuskan pada lokasi terbang paralayang lintas alam di Bukit Abah, Kabupaten Klungkung. Tujuannya adalah menjelaskan pengaruh letak geografis terhadap atlet paralayang dan mengidentifikasi kelebihan, kekurangan, hambatan, dan peluang di lokasi tersebut. Metode campuran digunakan, menggabungkan kualitatif dengan dukungan kuantitatif. Lokasi Bukit Abah cocok untuk paralayang dengan ketinggian 450 meter dan lebar lapangan 30 meter, tanpa hambatan pohon, dan angin dominan dari selatan. Lokasi ini diharapkan membuka peluang pengembangan UMKM, meningkatkan permintaan terhadap produk lokal, dan mendukung pengembangan atlet paralayang di tingkat nasional dan internasional. Dukungan pengelola desa juga diperlukan untuk keselamatan penerbangan dan potensi ekonomi dan pariwisata.

Kata-kata Kunci : Paralayang, eksplorasi, pariwisata, atlet

GEOGRAPHICAL LOCATION ANALYSIS ON THE COMPETENCE OF CROSS-COUNTRY FLYING ATHLETES IN PARAGLIDING IN BALI PROVINCE

ABSTRACT

This research is focused on the location of cross-country paragliding in Bukit Abah, Klungkung Regency. The goal is to explain the influence of geographical location on paragliding athletes and identify advantages, disadvantages, obstacles, and opportunities in the location. A mixed method is used, combining qualitative with quantitative support. The location of Bukit Abah is suitable for paragliding with a height of 450 meters and a field width of 30 meters, without tree obstacles, and the dominant wind from the south. This location is expected to open up opportunities for MSME development, increase demand for local products, and support the development of paragliding athletes at the national and international levels. The support of village managers is also needed for flight safety and economic and tourism potential.
