***ABSTRACT***

*This study aims to identify the traditional Balinese sausage dish, plant-based "urutan," specific to Panji Anom Village, in terms of its ingredients, processing techniques, and presentation methods. The research employs a qualitative descriptive approach, with data collected through interviews, observations, and documentation. Key informants were selected using purposive sampling, while additional informants were chosen through the snowball sampling method. The data collection instruments consisted of interview guidelines and observation sheets. Data analysis was conducted using qualitative analysis, encompassing four stages: data collection, data reduction, data presentation, and conclusion drawing. The findings reveal that the plant-based "urutan" dish in Panji Anom Village includes variations such as urutan pusuh, urutan nangka, urutan biu, urutan don sele, and urutan don kayu manis. The primary ingredients of this dish consist of pork offal and plant-based components such as banana blossom, young jackfruit, banana, cassava leaves, and cinnamon leaves. The seasoning includes "base genep" and "base bawang jahe." The equipment used comprises preparation tools, processing tools, and serving utensils. The processing stage incorporates traditional Balinese cooking techniques known as "nglablab" and "metunu." The plant-based "urutan" dish in Panji Anom Village represents a modification of the traditional dish, driven by economic factors and reflecting local wisdom in utilising the abundance of available local food resources.*
