**ABSTRACT**

*This research aims to explore the influence of compensation and work environment on employee job satisfaction at the National Narcotics Agency of Buleleng Regency. The research employs a quantitative causal method with a descriptive approach, which is based on positivist philosophy, used to study a specific population or sample, to select samples. A total of 34 respondents participated in this study. Data were collected through the use of questionnaires, and multiple linear regression analysis was used as the analysis method. The results of the study indicate that: (1) Compensation does not have an effect on employee job satisfaction. (2) The Work Environment has a significant positive effect on Employee Job Satisfaction, and (3) compensation and work environment simultaneously have an effect on the job satisfaction of employees at the National Narcotics Agency of Buleleng Regency.*

**Keywords:** Compensation, Work Environment, Employee Job Satisfaction
