ABSTRACT

This study aims to examine the effect of (1) organizational culture on employee performance, (2) work environment on employee performance, and (3) organizational culture and work environment on employee performance. The research method used in this research is causal quantitative. The subjects in this study were all ASN employees of the Trade, Industry, and Cooperatives Office, UKM Buleleng Regency, while the objects of research included organizational culture, work environment, and employee performance. The population of this study amounted to 42 employees, with a sample that included the entire population. Data were collected using the methods of (1) questionnaires and (2) interviews, then analyzed using multiple linear regression analysis. The results obtained show that: (1) organizational culture has a positive and significant effect on employee performance; (2) work environment has a positive and significant effect on employee performance; and (3) organizational culture and work environment simultaneously have a significant effect on employee performance at the Office of Trade, Industry, and SME Cooperatives of Buleleng Regency.
