ABSTRACT

This study aims to determine the influence of Green Accounting, Profitability, and Company Operational Activities on Company Value in manufacturing companies listed on the Indonesia Stock Exchange (IDX) for the 2021–2023 period. This study uses a quantitative approach with secondary data in the form of annual reports and sustainability reports obtained through the official website of the Indonesia Stock Exchange, namely www.idx.co.id. The sample in this study was determined by the purposive sampling method based on certain criteria and obtained as many as 66 observation data. The data analysis technique used was multiple linear regression with the help of SPSS version 25 software. The results of the study show that: (1) partially Green Accounting has a positive and significant effect on the Firm value, (2) partially Profitability has a positive and significant effect on the Firm value, (3) partially the Company's Operational Activities also have a positive and significant effect on the Firm value, and (4) simultaneously the three independent variables have a significant effect on the Firm value.

Keywords: *Green Accounting, Profitability, Operational Activities, Firm Value, Manufacturing Company.*
