ABSTRACT

This research was designed to test and analyze the extent to which family business background and emotional intelligence influence entrepreneurial interest among undergraduate students majoring in Management at Universitas Pendidikan Ganesha. The data collection system chosen was a survey using a quantitative research design, in which the research instruments were given to students enrolled in 2021. This study required a sample of 107 respondents, selected using purposive sampling. Data processing was conducted using multiple linear regression with the assistance of SPSS for Windows version 27.0. The research findings indicate that: 1) There is a significant effect between family business background and interest in entrepreneurship, 2) There is a significant influence between emotional intelligence and interest in entrepreneurship, 3) There is a simultaneous influence of family business background and emotional intelligence on the interest in entrepreneurship among undergraduate students in the Management Program at Undiksha. Therefore, it can be concluded that the stronger a person's family business background and emotional intelligence, the higher their interest in entering the business world.

Keywords: family business background, emotional intelligence, interest in entrepreneurship
