**ABSTRAK**

Tujuan dari penelitian yaitu untuk mengembangkan media video pembelajaran teknik dasar tendangan pencak silat dengan model ADDIE. Jenis penelitian ini adalah penelitian pengembangan. Prosedur pengembangan model ADDIE, yaitu: *analysis, design, development, implementation* dan *evaluation*. Validasi bahan ajar model ADDIE yaitu: uji ahli isi mata pelajaran, uji ahli media pembelajaran, uji ahli desain pembelajaran, uji coba perorangan, uji coba kelompok kecil dan uji coba kelompok besar. Teknik analisis deskriptif kualitatif dan analisis deskriptif kuantitatif adalah teknik analisis yang digunakan. Tanggapan ahli isi mata pelajaran memperoleh persentase 94% dengan kualifikasi sangat baik. Tanggapan ahli media pembelajaran memperoleh persentase 90% dengan kualifikasi sangat baik. Tanggapan ahli desain pembelajaran memperoleh persentase 94% dengan kualifikasi sangat baik. Sedangkan uji coba peserta didik tidak bisa dilakukan karena adanya pandemi covid19 yang mengharuskan peserta didik belajar dirumah secara online/daring. Hasil penelitian disimpulkan bahwa media video pembelajaran teknik dasar tendangan pencak silat layak digunakan menurut uji ahli isi mata pelajaran, uji ahli media pembelajaran dan uji ahli desain pembelajaran karena sudah memenuhi kriteria sesuai ketentuan dan sudah melaksanakan tahapan model ADDIE secara keseluruhan. Saran dari peneliti terhadap penelitian pengembangan ini dapat digunakan sebagai salah satu alternatif sumber belajar dan penelitian ini dapat dieksperimenkan sehingga keefektifan dapat diketahui.

**Kata kunci:** media video, pencak silat, ADDIE.

**ABSTRACT**

The purpose of this research is to develop video learning media for basic techniques of pencak silat kicks with ADDIE models. This type of research is development research. ADDIE model development procedures, namely: analysis, design, development, implementation and evaluation. Validation of ADDIE model teaching materials are: subject matter expert test, instructional content expert test, instructional design expert test, individual trial, small group trial and large group trial. Qualitative descriptive analysis techniques and quantitative descriptive analysis are the analysis techniques used. Expert content responses received a percentage of 94% with very good qualifications. Learning media expert responses obtained a 90% percentage with very good qualifications. Learning design expert responses obtained a 94% percentage with very good qualifications. Whereas student trials cannot be carried out because of the co-pandemic19 which requires students to study at home online / online. The results of the study concluded that the video media for learning basic techniques of pencak silat kicks was appropriate to be used according to the subject matter expert test, the instructional media expert test and the learning design expert test because it had met the criteria according to the requirements and had carried out the stages of the ADDIE model as a whole. Suggestions from researchers on this research development can be used as an alternative source of learning and this research can be experimented so that effectiveness can be known.

**Keywords:** learning video, pencak silat, ADDIE
