DECLARATION

I hereby declare that the written work titled “**Machine Learning-Based Biomass Estimation Using Remote Sensing Data To Support PLN’s Net Zero Emission Target**” and its entirety are genuinely the author’s original work, prepared independently without plagiarism, data fabrication, or any improper citation practices that violate academic and scientific ethics. By making this declaration, full responsibility is accepted for any consequences or sanctions that may be imposed if any violations of scientific integrity or challenges to the authenticity of the work are later identified.

FOREWORD

The author would like to express sincere gratitude to Almighty God for His blessings and guidance, through which the author has been able to complete the undergraduate thesis titled “**Machine Learning-Based Biomass Estimation Using Remote Sensing Data To Support Pln9s Net Zero Emission Target**”. This undergraduate thesis is prepared to fulfill the requirements for obtaining a Bachelor of Education degree at Universitas Pendidikan Ganesha.

The completion of this undergraduate thesis would not have been achieved without the valuable support and assistance provided by many parties, both morally and materially. The author would like to convey sincere appreciation to:

1. Prof. Dr. I Wayan Lasmawan, M.Pd., as the Rector of Universitas Pendidikan Ganesha, who has provided educational facilities for the author in the university environment.
2. Prof. Dr. Kadek Rihendra Dantes, S.T., M.T., as the Dean of the Faculty of Engineering and Vocational Studies, who has provided motivation and facilities for the author in the faculty environment.
3. Dr. Putu Hendra Suputra, S.Kom., M.Cs., as the Head of the Informatics Engineering Department and also as the first examiner, who has provided motivation and facilities for the author in the department environment and also guide the author throughout the process of making the thesis.
4. I Nyoman Saputra Wahyu Wijaya, S.Kom., M.Cs., as the Coordinator of the Computer Science Study Program, for his guidance and support throughout the author's academic journey.
5. Kadek Yota Ernanda Aryanto, S.Kom., M.T., Ph.D., as the first advisor, for giving the author valuable opportunities to grow and for placing great trust in the author through various projects that significantly supported the author's academic progress. The author is also deeply grateful for his continuous guidance and direction throughout the undergraduate years.

6. Ni Putu Novita Puspa Dewi, S.Kom., M.Cs., MIM., as the second advisor, for her guidance and for the trust she has given to the author throughout the thesis writing process as well as during the author's academic activities.
7. Dr. Luh Joni Erawati Dewi, S.T., M.Pd., as the second examiner, for her valuable feedback, support, and assistance throughout the thesis writing process and during the author's academic journey.
8. All lecturers in the Informatics Engineering Department and the Computer Science Study Program who have shared their knowledge and experiences, and consistently provided motivation and encouragement throughout the author's studies at Universitas Pendidikan Ganesha.
9. The author's parents, I Nyoman Suhartana Wijaya and Ni Luh Suci Ariyati, who have continuously prayed for the author and provided unwavering encouragement, support, and motivation.
10. All of the author's close friends, especially Gandha, Yudha, Surya, Luhur, Agung Bayu, and Bisnu who have been by the authors side since senior high school until the completion of this thesis, and who have consistently provided support and encouragement throughout the journey.
11. All friends the author has met throughout the journey at Universitas Pendidikan Ganesha, for the shared experiences, support, and companionship during campus life.
12. All parties who have accompanied and supported the author along the way, whose names cannot be mentioned individually.

The author fully acknowledges that this thesis is still far from perfect due to the limitations of the author's knowledge and abilities. Therefore, constructive criticism and suggestions from all parties are sincerely welcomed to improve this work. The author hopes that this thesis will be useful and provide benefits for everyone, especially in supporting the advancement of education.
