ABSTRAK

Penelitian ini bertujuan untuk mengkaji (1) pengaruh interaksi sosial terhadap sikap peduli lingkungan di kelas V, (2) pengaruh sikap tanggung jawab terhadap sikap peduli lingkungan di kelas V dan (3) pengaruh interaksi sosial dan sikap tanggung jawab terhadap sikap peduli lingkungan di kelas V. Penelitian ini mempergunakan rancangan *ex post facto* dengan pendekatan korelasional dengan populasi yaitu semua siswa kelas V SD di Sekolah Adiwiyata Kabupaten Gianyar yang terdiri dari 4 kelas yang berjumlah 90 siswa. Sampel pada penelitian dialokasikan dari populasi dengan mempergunakan teknik sampel jenuh yakni semua anggota populasi menjadi sampel penelitian yang berjumlah 90 orang. Metode pengumpulan data yang digunakan yaitu metode non tes, berupa angket. Uji hipotesis dilaksanakan dengan analisis regresi linier sederhana dan analisis regresi linier ganda. Dari hasil analisis yang dilakukan, mendapatkan simpulan bahwa, (1) terdapat pengaruh yang signifikan interaksi sosial terhadap sikap peduli lingkungan dibuktikan berdasarkan nilai $F_{hitung} = 5,74 > F_{tabel} = 3,95$ dan kontribusi 5,52%, (2) terdapat pengaruh yang signifikan sikap tanggung jawab terhadap sikap peduli lingkungan diyakini dari nilai $F_{hitung} = 5,35 > F_{tabel} = 3,95$ dengan kontribusi 6,52% , (3) terdapat pengaruh yang signifikan interaksi sosial dan sikap tanggung jawab terhadap sikap peduli lingkungan dibuktikan berdasarkan berdasarkan nilai $F_{hitung} = 18,6 > F_{tabel} = 3,1$ dengan kontribusi 13,22%. Hasil penelitian ini dapat dipergunakan sebagai referensi bagi peneliti lain.

Kata Kunci: sikap peduli lingkungan, interaksi sosial, sikap tanggung jawab

**EFFECT OF SOCIAL INTERACTION AND ATTITUDE OF LIABILITY
ON ENVIRONMENTAL CARE ATTITUDE IN CLASS ELEMENTARY
SCHOOL ADIWIYATA GIANYAR DISTRICT
ACADEMIC YEAR 2019/2020**

ABSTRACT

This study aims to examine (1) social interaction on environmental care attitudes in class V, (2) the influence of attitude of responsibility towards environmental care attitude in class V and (3) the effect of social interaction and attitude of responsibility towards environmental care attitude in class V. This study uses an ex post facto design by discussing the relationship with all fifth grade elementary school students at Adiwiyata School, Gianyar Regency which consists of 4 classes that support 90 students. Research samples allocated from the population using a sample technique of 90 people. Data collection methods used are non-test methods, in the form of a questionnaire. Hypothesis testing is done by simple linear regression analysis and multiple linear regression analysis. From the results of the analysis conducted, get that conclusion, (1) There is a significant influence of social interactions on attitudes to care for the environment proven by the value of $F_{count} = 5.74 > F_{table} = 3.95$ and a contribution of 5.52%, (2) available related to the significance of the responsibility towards environmental care attitudes from the value of $F_{count} = 5.35 > F_{table} = 3.95$ with a contribution of 6.52%, (3) related to significant social interactions and responsibility for the attitude of caring for the environment are shared based on the value of $F_{count} = 18,6 > F_{table} = 3.1$ with a contribution of 13.22%. The results of this study can be used as a reference for other researchers.

Keywords: environmental care attitude, social interaction, attitude of responsibility
