## STATEMENT OF AUTHENTICITY

I hereby declare that this academic work entitled “**Classification of Ape Characters in Balinese Ramayana Shadow Puppets Using Convolutional Neural Network Method with ResNet-50 and VGG-16 Architectures**” and all its contents are truly my own work, and I have not committed plagiarism or cited in ways inconsistent with the ethics prevailing in the academic community. I am prepared to bear any risk/sanction imposed on me if violations of academic ethics are found in this work, or if there are claims against its authenticity.

## PREFACE

The author offers deepest gratitude to God Almighty (Ida Sang Hyang Widhi Wasa) for His blessings and grace, which enabled the author to successfully complete this undergraduate thesis entitled **“Classification of Ape Characters in Balinese Ramayana Shadow Puppets Using Convolutional Neural Network (CNN) Method with ResNet-50 and VGG-16 Architectures”**. This thesis was conducted to fulfill one of the requirements to achieve a Bachelor's Degree in the Computer Science Study Program at Universitas Pendidikan Ganesha.

Throughout the process of writing this thesis, the author fully realizes that its completion would not have been possible without the assistance, guidance, direction, and support from various parties. Therefore, on this occasion, the author would like to express sincere gratitude to:

1. Prof. Dr. I Wayan Lasmawan, M.Pd., as the Rector of Universitas Pendidikan Ganesha, for providing educational facilities to the author during the period of study within the university environment.
2. Prof. Dr. Kadek Rihendra Dantes, S.T., M.T., as the Dean of the Faculty of Engineering and Vocational Studies, Universitas Pendidikan Ganesha, for providing support and facilities in assisting the completion of my studies.
3. Dr. Putu Hendra Suputra, S.Kom., M.Cs., as the Head of the Department of Informatics Engineering, for providing motivation and facilities to the author within the department.
4. I Nyoman Saputra Wahyu Wijaya, S.Kom., M.Cs., as the Coordinator of the Computer Science Study Program, for providing motivation and facilities to the author within the study program environment.
5. Prof. Dr. Luh Joni Erawati Dewi, S.T., M.Pd., as the Primary Advisor, for providing guidance, direction, constructive feedback, and motivation to the author throughout the writing of this thesis.
6. Dr. Putu Hendra Suputra, S.Kom., M.Cs., as the Co-Advisor, for providing invaluable guidance, corrections, suggestions, and support, ensuring this thesis could be completed properly.

7. Bapak Kenak, who has kindly provided the dataset and essential information regarding the ape characters in the Balinese Ramayana shadow puppets.
8. My parents and family, who have constantly provided prayers, moral support, and endless motivation throughout the author's education up to the completion of this thesis.
9. NIM 2217041179, who has always faithfully accompanied, encouraged, and served as a constant source of motivation in every process gone through until this thesis could be finished.
10. My best friend, Gede Bakti Pramata Putra, who has provided motivation and support to me in completing this thesis.
11. My companions in arms, Fieter and Rangga, who have always supported, encouraged, and motivated me during the process of completing this thesis.
12. All friends in "Team Kumpul-Kumpul", who have shared encouragement with the author during the process of completing this thesis.
13. All classmates of the Computer Science Study Program, Class of 2022, for providing various unforgettable experiences and togetherness during the author's college years.
14. As well as all parties who cannot be mentioned individually, who have helped and provided support, both directly and indirectly.

The author fully realizes that this thesis is still far from perfect due to limitations in capability and experience. Therefore, the author highly welcomes constructive criticism and suggestions for the improvement of this work. Hopefully, this thesis can be useful for readers and contribute to the development of science, particularly in the field of image processing.
