ABSTRACT

This study aims to examine the effect of the Board of Commissioners, Institutional Ownership, and Audit Committee on Financial Performance of insurance companies listed on the Indonesia Stock Exchange for the period 2021–2024. The method used is a quantitative approach with purposive sampling techniques to determine the sample. Data were obtained from the annual financial reports of insurance companies listed on the IDX, with 61 observations from 16 companies. Data analysis was conducted through descriptive statistical tests, classical assumption tests, and hypothesis testing using multiple linear regression analysis with SPSS software. The results indicate that, partially, the Board of Commissioners has no significant effect on Financial Performance. Institutional Ownership has a significant and negative effect on Financial Performance. The Audit Committee has no significant effect on Financial Performance.

Keywords: board of commissioners, institutional ownership, audit committee, good corporate governance, financial performance.
