ABSTRAK

Upaya riset ini diabdikan guna memformulasi instrumen pembelajaran berplatform web mengenai materi dasar pengoperan (*passing*) bola voli khusus untuk murid kelas V SD Negeri 1 Semarapura Kangin tahun akademik 2024/2025. Kajian ini mengadopsi kerangka pengembangan ADDIE yang mencakup lima fase prosedural, yakni: (1) *Analysis*, (2) *Design*, (3) *Development*, (4) *Implementation*, dan (5) *Evaluation*. Skema investigasi ini mengintegrasikan penelaahan kesahihan oleh pakar, pengujian produk, serta penilikan daya guna (praktikalitas) dengan melibatkan partisipatif para siswa kelas V SD Negeri 1 Semarapura Kangin selaku subjek amatan. Pengumpulan data ditunaikan melalui kuesioner, yang kemudian ditelaah memanfaatkan kalkulasi deskriptif kualitatif maupun kuantitatif. Berdasarkan temuan riset, wahana instruksional berbasis laman jejaring yang dikonstruksi memuat konstituen vital berupa (1) laman muka, (2) opsi capaian pembelajaran, (3) substansi bahan ajar, (4) instrumen asesmen mandiri, serta (5) rekam jejak perancang. Selaku sarana edukasi, platform tersebut sanggup dijangkau memanfaatkan komputer, komputer jinjing, tablet, maupun telepon pintar yang terkoneksi jejaring internet, sehingga menstimulasi keluwesan pembelajar dalam menimba ilmu di lingkungan sekolah maupun kediaman. Kualifikasi amat baik diraih dalam pengujian validitas, dengan persentase 98% dari spesialis substansi, 96% dari pakar media maupun desain instruksional, serta 96% dari praktisi di lapangan. Pengujian yang dilakukan menunjukkan perolehan angka sebesar 99% pada tahap individu, 97% pada kelompok minor, serta 95% pada kelompok mayor. Adapun evaluasi aspek kepraktisan mencatatkan proporsi 96% dengan klasifikasi sangat praktis. Menilik konklusi penelitian ini, sarana edukasi berbasis laman internet dinilai memenuhi kriteria kesahihan, kelayakan, dan kepraktisan sebagai instrumen pembelajaran PJOK, terutama untuk topik penguasaan teknik dasar olah umpan (*passing*) bola voli.

Kata-kata kunci: PJOK, Media Pembelajaran, *Website*, *Passing* Bola Voli

***DEVELOPMENT OF WEBSITE-BASED LEARNING MEDIA FOR BASIC
VOLLEYBALL PASSING TECHNIQUES FOR GRADE V STUDENTS OF

ABSTRACT

This research aims to develop a web-based instructional tool covering the fundamentals of volleyball passing, specifically for fifth-grade students at SD Negeri 1 Semarang Kangin during the 2024/2025 academic year. The study employs the ADDIE Development framework, comprising five procedural phases: (1) Analysis, (2) Design, (3) Development, (4) Implementation, and (5) Evaluation. The research process integrates expert validation, product testing, and practicality assessments involving fifth-grade students from SD Negeri 1 Semarang Kangin as the study subjects. Data collection was conducted via questionnaires, followed by Analysis using both qualitative and quantitative descriptive methods. Research findings indicate that the developed web-based instructional tool incorporates key components: (1) a home page, (2) learning objective options, (3) instructional content, (4) self-assessment tools, and (5) developer information. As an educational resource, the platform is accessible via internet-connected computers, laptops, tablets, and smartphones, thereby offering learners flexibility in studying at both school and home. Validity testing yielded excellent ratings, with scores of 98% from subject matter experts, 96% from media and instructional Design experts, and 96% from field practitioners. Testing results showed scores of 99% at the individual level, 97% for the small group, and 95% for the large group. Furthermore, the practicality assessment recorded a score of 96%, classifying the tool as highly practical. Based on the study's conclusions, the web-based educational resource is considered to meet the criteria of validity, feasibility, and practicality as an instructional tool for Physical Education (PJOK), particularly for mastering basic volleyball passing techniques.
