**ABSTRAK**

Kajian ini bertujuan untuk (1) menghasilkan rancang bangun media pembelajaran *Flipchart* bergambar pada materi roll belakang dalam senam lantai bagi peserta didik sekolah dasar, (2) mengetahui kelayakan media berlandaskan penilaian ahli media, ahli desain pembelajaran, ahli materi, dan guru PJOK, serta (3) mengetahui tanggapan peserta didik terhadap penggunaan media tersebut. Kajian ini merupakan penelitian dan pengembangan (*Research and Development*) menggunakan model ADDIE yang meliputi tahap *analysis, design, development, implementation, dan evaluation*. Subjek penelitian terdiri atas satu orang ahli materi, satu orang ahli media, satu orang ahli desain pembelajaran, satu orang guru PJOK sebagai praktisi lapangan, dan 24 peserta didik kelas IV SD Negeri 2 Kubu. Data dikumpulkan melalui observasi, wawancara, angket, dan dokumentasi, kemudian dianalisis menggunakan teknik analisis deskriptif kuantitatif. Hasil penelitian menunjukkan bahwa media yang dikembangkan berupa *Flipchart* bergambar berukuran A4 yang memuat tujuan pembelajaran, materi, ilustrasi tahapan gerakan roll belakang, kuis evaluasi, dan penutup. Media tersebut memperoleh persentase kelayakan 95,59% dari ahli materi, 96,88% dari ahli media, 100% dari ahli desain pembelajaran, dan 97,50% dari praktisi lapangan dengan kategori sangat layak. Tanggapan peserta didik juga menunjukkan kategori sangat layak, dengan persentase 95,51% pada uji perorangan, 94,87% pada uji kelompok kecil, dan 94,23% pada uji kelompok besar. Berlandaskan hasil tersebut, media pembelajaran *Flipchart* bergambar dinyatakan layak digunakan pada materi roll belakang dalam senam lantai bagi peserta didik kelas IV SD Negeri 2 Kubu.

**Kata kunci:** *Flipchart* bergambar, media pembelajaran, roll belakang, senam lantai, ADDIE.

**DEVELOPMENT OF AN ILLUSTRATED FLIPCHART LEARNING MEDIA  
FOR BACKWARD ROLL IN FLOOR GYMNASTICS FOR FOURTH-GRADE  
STUDENTS AT SD NEGERI 2 KUBU**

**ABSTRACT**

*This study aimed to (1) develop a pictorial Flipchart learning media for teaching the backward roll in floor gymnastics for elementary school students, (2) determine the feasibility of the developed media based on evaluations by a material expert, a media expert, a learning design expert, and a Physical Education teacher, and (3) examine students' responses to the use of the learning media. This research employed a Research and Development (R&D) approach using the ADDIE model, which consists of five stages: analysis, design, development, implementation, and evaluation. The research subjects included one material expert, one media expert, one learning design expert, one Physical Education teacher as a field practitioner, and 24 fourth-grade students of SD Negeri 2 Kubu. Data were collected through observation, interviews, questionnaires, and documentation, and were analyzed using descriptive quantitative analysis. The results showed that the developed product was an A4-sized pictorial Flipchart containing learning objectives, instructional materials, sequential illustrations of backward roll movements, evaluation quizzes, and a closing section. The media obtained feasibility scores of 95.59% from the material expert, 96.88% from the media expert, 100% from the learning design expert, and 97.50% from the field practitioner, all categorized as highly feasible. Students also gave very positive responses, with percentages of 95.51% in the individual trial, 94.87% in the small-group trial, and 94.23% in the large-group trial, all categorized as highly feasible. Therefore, the developed pictorial Flipchart learning media is considered suitable for use in teaching the backward roll in floor gymnastics to fourth-grade students of SD Negeri 2 Kubu.*
