## **ABSTRACT**

This study aims to determine the effect of bank health with the Risk Based Bank Rating (RBBR) method which consists of *Non Performing Loan, Loan To Deposito Ratio, Good Corporate Governance, Net Interest Margin, Return On Asset, Capital Adequacy Ratio* and *Economic Value Added* methods Against the stock price of banking companies listing on the Indonesia Stock Exchange in 2014-2018. Data acquisition is secondary through financial statements. The use of the population is all banks listed in the Indonesia Stock Exchange specifically for the 2014-2018 period. How to take a sample with purposive sampling through certain criteria. The number of samples produced was 23 banks in five years. Data processing using multiple linear regression techniques through SPSS version 20.

The result showed that partially there was a negative influence on the *Non Performing Loan, Loan To Deposito Ratio, Good Corporate Governance* variables on Stock Prices, while the *Net Interest Margin, Return On Asset*, and *Economic Value Added* variables had a positive effect on Stock Price. Meanwhile, the *Capital Adequacy Ratio* has no effect on the Share Price.

**Keywords:** *Economic Value Added (EVA), RBBR, Stock Prices.*
