

ABSTRAK

Asuhan Kebidanan Komprehensif pada Perempuan “WW” di PMB “TC” di Wilayah Kerja Puskesmas Kubutambahan I Tahun 2020

Kehamilan sebagai keadaan fisiologis dapat diikuti proses patologis sehingga sering menimbulkan ketidaknyamanan seorang ibu dalam proses kehamilan dan dapat mengancam keadaan ibu dan janin. Ketidaknyamanan seorang ibu dalam proses kehamilan dapat dirasakan sejak trimester satu, dua, dan tiga. Laporan Tugas Akhir ini memiliki tujuan untuk memberikan asuhan kebidanan secara *continuity of care* pada ibu hamil, bersalin, nifas, neonatus dan KB. Asuhan kebidanan diberikan kepada perempuan “WW” di PMB “TC” mulai bulan 12 Mei 2020 sampai dengan 24 Juni 2020 dengan pentalaksanaan protokol covid-19. Metode asuhan kebidanan pada laporan tugas akhir ini menggunakan manajemen kebidanan berdasarkan 7 langkah varney dan didokumentasikan dalam bentuk SOAP. Asuhan persalinan tanggal 24 Mei 2020, Pr “WW” bersalin secara normal dan sesuai APN, bayi lahir spontan belakang kepala, jenis kelamin perempuan, berat lahir 2900 gram, panjang badan 48 cm. Asuhan masa nifas berjalan lancar dan tidak terdapat komplikasi pada ibu dan bayi serta ibu diberikan KIE selama proses asuhan dan pada masa nifas ibu sudah menggunakan alat kontrasepsi suntik 3 bulan pada 31 hari masa nifanya yang sebelumnya sudah dilakukan penapisan akseptor KB suntik 3 bulan. Berdasarkan hasil asuhan kebidanan secara komprehensif yang telah dilakukan pada Pr “WW” diharapkan klien dapat menerapkan konseling yang telah diberikan selama dilakukan asuhan kebidanan sehingga kondisi ibu dan bayi tetap baik dan dapat mencegah terjadinya komplikasi hingga kematian.

ABSTRACT

Midwifery Care Comprehensive Women "WW" in PMB "TC" in Puskesmas Kubutambahan I 2020

Pregnancy as a physiological condition can be followed by a pathological process that often causes discomfort for a mother in the process of pregnancy and can threaten the state of the mother and fetus. A mother's discomfort in the process of pregnancy can be felt since trimester one, two, and three. This Final Project Report aims to provide midwifery care in continuity of care for pregnant women, childbirth, neonatus and KB. Midwifery care is given to "WW" women in PMB "TC" from 12 May 2020 to 24 June 2020 with the implementation of the covid-19 protocol . The method of midwifery care in this thesis report uses obstetric management based on 7 steps varney and documented in the form of SOAP. Childbirth care on 2 May 4 2020, Pr "WW" gave birth normally and according to the APN, the baby was born spontaneously behind the head, female sex, birth weight was 2900 grams, body length was 48 cm. Childbirth care runs smoothly and there are no complications for mothers and infants and mothers are given IEC during the care process and during childbirth the mother has used injection contraception for 3 months in 31 days of childbirth which previously had been screened for injectable KB acceptors for 3 months. Based on the results of comprehensive midwifery care that has been done at Pr "WW", it is expected that clients can apply the counseling that has been given during midwifery care so that the condition of the mother and baby remains good and can prevent complications to death.
