The Eiffel Tower

The Eiffel Tower is an iron lattice tower located on the Champ de Mars in Paris. Built in 1889, it has become both a global icon of France and one of the most recognizable structures in the world. The tower is the tallest building in Paris and the most-visited paid monument in the world; millions of people ascend it every year. Named after its designer, engineer Gustave Eiffel, the tower was built as the entrance arch to the 1889 World's Fair.

The tower stands 324 meters (1,063 ft) tall, about the same height as an 81-story building. Upon its completion, it surpassed the Washington Monument to assume the title of tallest man-made structure in the world, a title it held for 41 years, until the Chrysler Building in New York City was built in 1930; however, due to the addition in 1957 of the antenna, the tower is taller than the Chrysler Building. Not including broadcast antennas, it is the second-tallest structure in France after 2004, Millau Viaduct.

The tower has three levels for visitors. Tickets can be purchased to ascend, by stairs or lift, to the first and second levels. The way to the first level is over 300 steps, as is the way from the first to the second level. The third and the highest level is accessible only by elevator. Both the first and second levels feature restaurants. The tower has become the most prominent symbol of both Paris and France, often in the establishing shot of films set in the city.

Toba Lake

Danau Toba or Toba Lake is one of the most popular destinations in Indonesia, especially in Medan, North Sumatra. Danau Toba is the largest volcanic lake in Indonesia, even in the Southeast Asia. Which make it more special is taken from the Samosir Island, an Island that settled in the middle of the lake.

Toba lake is an area of 1,707 km², we can say that this is 1,000 km² bigger than Singapore. It formed by a gigantic volcanic eruption some 70,000 years ago, it is probably the largest resurgent caldera on Earth. Pulau Samosir or Samosir Island, the island in the middle, was joined to the caldera wall by a narrow isthmus, which was cut through to enable boats to pass; a road bridge crosses the cutting. Samosir island is the cultural centre of the Batak tribe, the indigenous from North Sumatra.

By the eruption of a super volcano (Mount Toba) was estimated to have caused mass death and extinction of several species of living creatures. The eruption of Mount Toba has led to changes in the earth's weather and the start into the ice age that affects the world civilization.

Toba lake is actually more like a sea than a lake considering its size. Therefore, the Lake placed as the largest lake in Southeast Asia and the second largest in the world after Lake Victoria in Africa. Toba lake is also includes the deepest lake in the world, which is approximately 450 meters

Monas National Monument

The National Monument, or "Monas" as it is popularly called, is one of the monuments built during the Sukarno era of fierce nationalism. The top of the National Monument (Monas) is Freedom Square. It stands for the people's determination to achieve freedom and the crowning of their efforts in the Proclamation of Independence in August 1945. The 137-meter tall marble obelisk is topped with a flame coated with 35 kg of gold. The base houses a historical museum and a hall for meditations. The monument is open to the public and upon request the lift can carry visitors to the top, which offers a bird's eye view on.

Go early to beat the crowds and the haze. It is easy for the less physically able as lifts take visitors to the top. The diorama exhibition in the basement gives such a distorted view of Indonesian history.

This imposing obelisk is Jakarta's most famous landmark. Construction started in 1961 under President Soekarno but was not completed until 1975, under President Soeharto. The monument houses a couple of museums. The Freedom Hall depicts Indonesia's struggle for independence through a series of dioramas, whereas the Hall of Contemplation displays the original Declaration of Independence document and a recording of the speech.

Way Kambas National Park

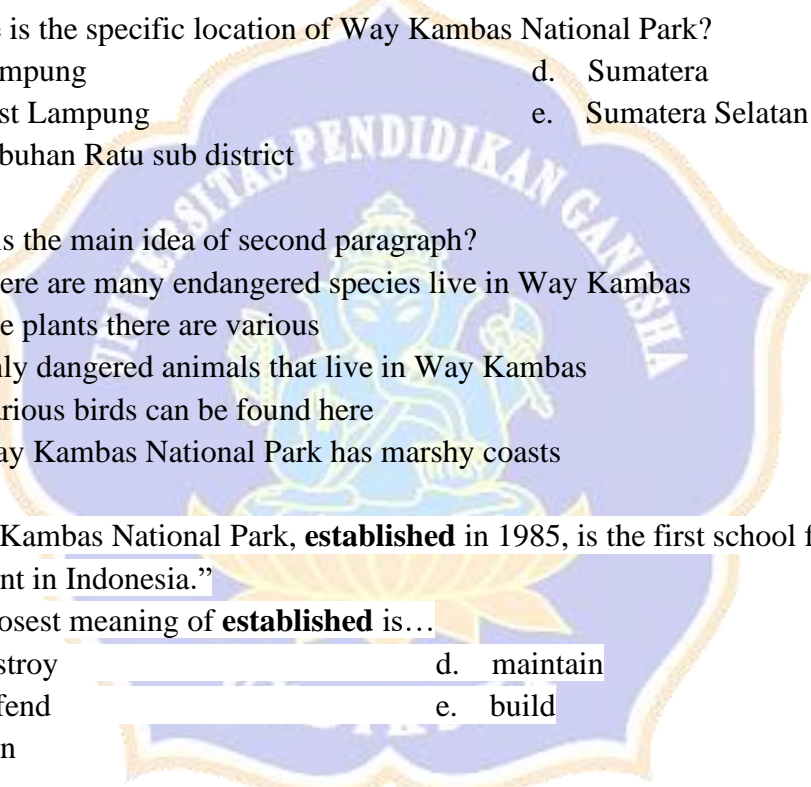

Way Kambas National Park is a national park for elephant sanctuary located in Lampung precisely in the Labuhan Ratu sub district, East Lampung, Indonesia. Way Kambas National Park, established in 1985, is the first school for elephant in Indonesia. In the beginning of its establishment, Way Kambas National Park was named the Elephant Training Center / Pusat Latihan Gajah (PLG), but the last few years this name was changed into Elephant Conservation Center / Pusat Konservasi Gajah (PKG), which is expected to become a center for elephant conservation in taming, training, breeding and conserving elephants.

Until now, this PKG has trained for about 300 elephants which have been deployed to all over the country.

In Way Kambas National Park, there are some endangered animals such as Sumatran Rhinos, Sumatran elephant, Sumatran tiger, Mentok Rimba, and Buaya sepi. The Eiffel Tower

The Eiffel Tower is an iron lattice tower located on the Champ de Mars in Paris. Built in 1889, it has become both a global icon of France and one of the most recognizable structures in the world. The tower is the tallest building in Paris and the most-visited paid monument in the world; millions of people ascend it every year. Named after its designer, engineer Gustave Eiffel, the tower was built as the entrance arch to the 1889 World's Fair.

The tower stands 324 meters (1,063 ft) tall, about the same height as an 81-story building. Upon its completion, it surpassed the Washington Monument to assume the title of tallest man-made structure in the world, a title it held for 41 years, until the Chrysler Building in New York City was built in 1930; however, due to the addition in 1957 of the antenna, the tower is taller than the Chrysler Building. Not including broadcast antennas, it is the second-tallest structure in France after 2004, Millau Viaduct.

The tower has three levels for visitors. Tickets can be purchased to ascend, by stairs or lift, to the first and second levels. The way to the first level is over 300 steps, as is the way from the first to the second level. The third and the highest level is accessible only by elevator. Both the first and second levels feature restaurants. The tower has become the most prominent symbol of both Paris and France, often in the establishing shot of films set in the city.

Monas National Monument

The National Monument, or "Monas" as it is popularly called, is one of the monuments built during the Sukarno era of fierce nationalism. The top of the National Monument (Monas) is Freedom Square. It stands for the people's determination to achieve freedom and the crowning of their efforts in the Proclamation of Independence in August 1945. The 137-meter tall marble obelisk is topped with a flame coated with 35 kg of gold. The base houses a historical museum and a hall for meditations. The monument is open to the public and upon request the lift can carry visitors to the top, which offers a bird's eye view on.

Go early to beat the crowds and the haze. It is easy for the less physically able as lifts take visitors to the top. The diorama exhibition in the basement gives such a distorted view of Indonesian history.

This imposing obelisk is Jakarta's most famous landmark. Construction started in 1961 under President Soekarno but was not completed until 1975, under President Soeharto. The monument houses a couple of museums. The Freedom Hall depicts Indonesia's struggle for independence through a series of dioramas, whereas the Hall of Contemplation displays the original Declaration of Independence document and a recording of the speech.

Candi Borobudur

Borobudur is the biggest Buddhist temple in the ninth century measuring 123 x 123 meters. It is located at Magelang, 90-km southeast of Semarang, or 42-km northwest of Yogyakarta. Borobudur temple is the one of the best-preserved ancient monument in Indonesia that are most frequently visited by over a million domestic as well as foreign visitors. It also had been acclaimed by the world as a cultural heritage main kind. The architectural style has no equal through out the world. It was completed centuries before Angkor Wat in Kamboja.

Borobudur is one of the world's most famous temples; it stands majestically on a hilltop overlooking lush green fields and distant hills. Borobudur is built of gray andesite stone. It rises to seven terraces, each smaller than the one below it. The top is the Great Stupa, standing 40 meters above the ground. The walls of the Borobudur are sculptured in bas-reliefs extending over a total length of six kilometers. It has been hailed as the largest and most complete ensemble of Buddhist relieves in the world, unsurpassed in artistic merit and each scene an individual masterpiece.

Borobudur temple built in the eighth century by the Cailendra dynasty, is believed to have been derived from the Sanskrit words "Vihara Buddha Uhr" the Buddhist Monastery on the hill. Borobudur is a terraced temple surmounted by stupas, or stone towers; the terraces resemble Indonesian burial foundations, indicating that Borobudur was regarded as the symbol of the final resting place of its founder, a Syailendra, who was united after his death with the Buddha. The Prambanan temple complex is also associated with a dead king.

The inscription of 856 mentions a royal funeral ceremony and shows that the dead king had joined Shiva, just as the founder of the Borobudur monument had joined the Buddha. Divine attributes, however, had been ascribed to kings during their lifetimes. A Mahayana inscription of this period shows that a ruler was said to have the purifying powers of a bodhisattva, the status assumed by the ruler of Shrivijaya in the 7th century; a 9th-century Shaivite inscription from the Kedu Plain describes a ruler as being "a portion of Shiva."

The Borobudur was in danger of collapsing as its stone statues and stone carvings, moss and lichen affected bas-reliefs. But, the monument has been completely restored and was officially opened by the President on 23rd February 1983. The restoration took eight years to complete, funded by the Government of Indonesia with aid from the UNESCO and donations from private citizens as well as from foreign governments.

The visitors have the option of going by taxi or public bus to reach this temple. Public transportation is available from the bus terminal. From that point visitors can hire becaks or horse carts, or walk the rest of the way to the

monument. A large parking area is available not far from the monument, so private cars and buses can park in this area.
