Abstract

This study is entitled The Ability to Transcribe Balinese Script to Latin letter by students in grade 4 and 5 at SDN 2 Kalibukbuk. It aims to analyse the students' ability to transcribe wreastra script, pengangge suara, pengangge tengenan, and gantungan as well as gempelan that have been carried out by the researcher at SDN 2 Kalibukbuk. This study belonged to descriptive qualitative study in which the subjects were the 23 students in grade 4 and 5 at SDN 2 Kalibukbuk. Moreover, the object of this research was the students' ability to transcribe the words which written in balinese script into the correct latin letters according to the rules for writing Balinese script. 1) the result of mapping wreastra script with Balinese script to Latin script shows that 9.6 of the mappings are correct, and 5.4 are still lacking (from the maximum average of 15); 2) the results of mapping the characterization of letters, namely the results of the voice angge from Balinese script to Latin letters show that 3.3 mapping is correct, and 1.7 is still lacking (from the maximum mapping average of 5), and the tengenan angge from Balinese script to Latin letters shows 3.7 mapping is correct, and 0.3 is still lacking (from the maximum mapping average of 4) ; 3) the results of mapping the hangers and gempelan from Balinese script to Latin letters show that 2.2 mappings are correct and 1.8 are still lacking (from the maximum mapping average of 4).

Key words: transcribe, balinese script, latin letters
