ABSTRACT

This study aims to determine the effect of the 5C credit principle assessment (*condition of economy, capacity, collateral, character, dan capital*) and find out the credit supervision of the decision toward grant credit to BUM Village in Kubutambahan district. Moreover, there are 13 BUM villages in Kubutambahan district chosen by the researcher to be the population of this research. The total samples that used to take the data in each BUM village which involved in providing credit were four respondents. This research was used quantitative method which the data was numeric. The data resources that used was primer data. Furthermore, the researcher distributed questionnaire to respondents in each BUM villages in Kubu tambahan district, Buleleng regency in collecting the data. The data analysis technique was using multiple regression analysis with using SPSS 17 version.

This research' result showed that the assessment of the 5C principles of credit (Character, Capacity, capital. Collateral, and condition of economy) and credit supervision partially give a positive and also significant impact on credit decisions for BUM Desa in Kubutambahan district. In addition, the advice was given to BUM desa in Kubutambahan district is in the aspect of credit supervision because it has the highest significant value by conducting comparative studies on companies that have adequate credit supervision, thus it will add insight from the credit supervisor.
