## ABSTRACT

This study aimed at describing kinds and function of affixes especially prefixes and suffixes in Balinese language of Nusa Penida (Kutampi) people at Kutampi village. This study was a qualitative descriptive study. This study used snowball technique in collecting the data, where the informants of the study were found in a chained way. The data of this study were collected through 3 domains, such as; family, neighborhood and friendship. In this study, there were four processes for analyzing the data, those are: data collection, data reduction, data display, and conclusion drawing and verifying. The results of the study, it was found that there were 5 kinds of prefixes, such as: {mə-}, {nge-}, {a-}, {ny-}, and {ng-} and 5 kinds of suffixes, such as: {-nyə}, {-tə}, {-an}, {-in}, and {-e}. There were three prefixes that belong only to inflectional morpheme: prefix {nge-}, {a-} and {ng-} and three suffixes that belong only to inflectional morpheme: {-nye}, {-tce} and {-e}. There was no prefix and suffix which belong only to derivation morpheme. There were two prefixes that belong to both inflectional and derivation morpheme: {me-} and {ny-} and two suffixes that belong to inflectional and derivation morpheme: {-an} and {-in}.

**Keywords:** affixation, inflectional morpheme, derivational morpheme, Nusa Penida (Kutampi village) dialect

## **ABSTRAK**

Penelitian ini bertujuan untuk menemukan jenis dan fungsi afiks khususnya awalan dan akhiran yang ada dalam bahasa Bali orang Nusa Penida (Kutampi) di desa Kutampi. Penelitian ini adalah penelitian deskriptif kualitatif. Penelitian ini menggunakan teknik snowball dalam mengumpulkan data, di mana informan atau sampel penelitian ditemukan dengan cara berantai. Dalam penelitian ini peneliti mengumpulkan data melalui 3 domain, seperti; keluarga, lingkungan dan pertemanan. Dalam penelitian ini, ada empat proses untuk menganalisis data, yaitu: pengumpulan data, reduksi data, tampilan data, dan penarikan kesimpulan dan verifikasi. Dari hasil penelitian, ditemukan bahwa ada 5 jenis awalan, seperti: {mə-}, {Nge-}, {a-}, {ny-}, dan {ng-}, dan 5 jenis sufiks: {-nyə}, {-tcə}, {-an}, {-in}, dan {-e}. Ada tiga awalan yang hanya termasuk ke morfem infleksional: awalan {nge-}, {a-} dan {ng-} dan tiga akhiran yang hanya termasuk ke morfem infleksi: {-nye}, {-tce} dan {-e}. Ada dua awalan yang termasuk dalam morfem infleksi dan derivasi: { mə-} dan {ny-} dan dua akhiran yang termasuk dalam morfem infleksi dan derivasi: {-an} dan {-in}.

Kata kunci: afiksasi, morfem infleksional, morfem derivasional, dialek Nusa Penida ( Desa Kutampi)
