

ABSTRAK

Agustini Purnama Sari, Ni Komang Shintia (2021), Pengembangan Instrumen Pengukuran Karakter *Consistency Personality* Pada Para Siswa Di SMA Dwijendra Bualu.

Tesis, Bimbingan Konseling, Program Pascasarjana, Universitas Pendidikan Ganesha.

Tesis ini sudah disetujui dan diperiksa oleh Pembimbing I: Prof. Dr. Ni Ketut Suarni, M.S.Kons dan Pembimbing II: Prof. Dr. Nyoman Dantes

Jenis penelitian ini adalah pengembangan (*Reserarch and development* atau disingkat *R&D*). Uji validitas empirik dengan validitas butir instrumen yang menerapkan rumus korelasi *product moment*. Uji reliabilitas kuisioner dengan koefisien *Alpha Cronbach*. Pengujian validasi instrumen menggunakan rumus *Gregory* dan melibatkan 2 orang ahli yang terdiri dari 1 orang dosen Program Pascasarjana Bimbingan Konseling Undiksha dan 1 orang guru BK. Berdasarkan hasil perhitungan VC pada uji validasi isi dengan rumus *Gregory* yang didapatkan hasil 1 atau > 0 , maka dinyatakan bahwa instrumen karakter *consistency personality* sangat valid. Uji validitas butir berdasarkan hasil perhitungan rumus korelasi *product moment*, kevalidan butir dilakukan dengan kriteria pengujian jika $r_{tab} > r_{hitung}$ maka butir tersebut dinyatakan gugur, dan jika $r_{tab} < r_{hitung}$ maka butir soal tersebut dinyatakan valid. Berdasarkan kriteria tersebut dilihat dari r_{hitung} pada 40 butir soal 39 dinyatakan valid dan 1 butir soal dinyatakan gugur. Berdasarkan perhitungan uji reliabilitas dan hasil perhitungan *SPSS 24* dengan $r_{tabel} = 0.294$, $N = 45$ pada taraf signifikan 5% didapatkan hasil 1.0, pada perhitungan *SPSS24* didapatkan hasil 0,722 sehingga angka tersebut dinyatakan sangat baik.

Kata kunci: Pengembangan Instrumen Karakter *Consistency Personality*, Penelitian dan Pengembangan

ABSTRACT

Agustini Purnama Sari, Ni Komang Shintia (2021), Development of Consistency Personality Character Measurement Instruments for Students at Dwijendra Bualu High School.

Thesis, Counseling Guidance, Graduate Program, Ganesha University of Education.

This thesis has been approved and checked by Advisor I: Prof. Dr. Ni Ketut Suarni, M.S. Kons and Advisor II: Prof. Dr. Dantes

This type of research is development (Research and development or abbreviated R&D). Empirical validity test with the validity of the instrument items that apply the product moment correlation formula. Test the reliability of the questionnaire with Cronbach's Alpha coefficient. The instrument validation test uses the Gregory formula and involves 2 experts consisting of 1 lecturer from the Undiksha Counseling Guidance Postgraduate Program and 1 counseling guidance teacher. Based on the VC calculation on the content validation test with the Gregory formula which obtained a result of 1 or > 0 , it was stated that the personality consistency character instrument was very valid. The item validity test is based on the calculation results of the product moment correlation formula, the item validity is carried out with the test criteria if $r_{tab} > r_{count}$ then the item is declared invalid, and if $r_{tab} < r_{count}$ then the item is declared valid. Based on these criteria, it can be seen from the r_{count} on 40 items 39 are declared valid and 1 item is declared invalid. Based on the calculation of the reliability test and the calculation results of SPSS 24 with $r_{table} = 0.294$, $N = 45$ at a significant level of 5% the results obtained are 1.0, the SPSS24 calculation results are 0.722 so that the figure is declared very good.
