Recount Text 1

ACTIVITIES DURING A PANDEMIC

7 months ago, the Corona virus entered in Indonesia. at that time I was doing my graduation exam. the exam is carried out at home because it is to minimize transmission of the virus.

After the exam was over I did a lot of things during this pandemic, namely cleaning the house and helping my parents' trade. Sometimes I went out of town to send red onion. Remembering that the situation was not safe, I always to follow health protocols to stay healthy.

Holidays during this pandemic are indeed boring but I still enjoy it. I really missed to do my activities like before.

MY EXPERIENCES WHILE STUDYING AT HOME

The last few months, I studied at home because the situation does not support to study in school. The Covid19 virus outbreak had spread to several areas and it made all of schools' activities were stopped.

The school is also looking for solutions so that the students could study at home through online. Online school is an online learning activity through smartphones, laptop, etc. Now, online school is practiced by almost all schools in Indonesia during the pandemic

The first time I felt that online school was a little stranger, I could lay on my bed and stare at my smartphone screen. It was not like study at school which the students must sit up straight and held the sleepiness. It felt like there was freedom, there was a chance to lay on the bed during the class.

Even though I got the freedom, the tasks were still pill up every day and I did an online assignment continuously. Sometimes the teachers were told to make videos, power points, etc. Even though there are many tasks, it still feels fun.

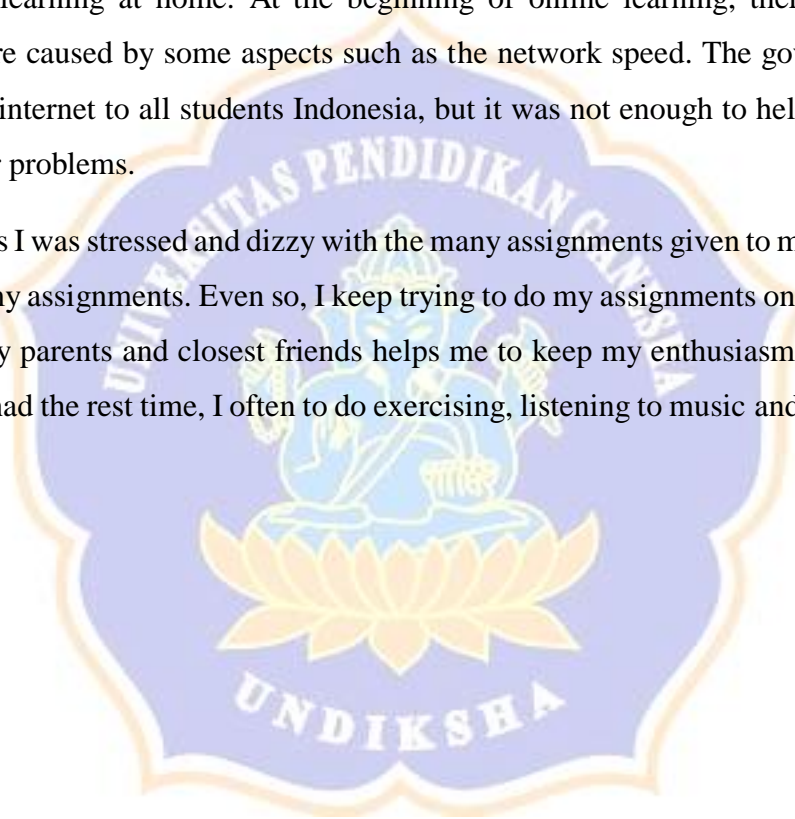

In the midst of my busy life because of my assignments, I got support by my family. They helped me when I did sport lesson. The task is pretty easy, I just need to do sit ups, push ups, and back ups. But when I tried, it is not easy as I imagined. It is a bit heavy and tired. The, my brother taught me the right way to do that and because of that I got my satisfying score.

MY ACTIVITIES AT HOME DURING THE PANDEMIC

The Covid19 pandemic has made many changes to the surrounding environment. Since the implementation of lockdown and social distancing. Many people are doing their activities at home. They do all their activities at home, such as working, studying or trading and I am the one of them.

About last April, I only do my activities at home, from waking up going to sleep again. I also do online learning at home. At the beginning of online learning, there were many obstacles that were caused by some aspects such as the network speed. The government also provide free data internet to all students Indonesia, but it was not enough to help the students who had the other problems.

Sometimes I was stressed and dizzy with the many assignments given to me. Sometimes I do not even do my assignments. Even so, I keep trying to do my assignments on my own way. The support of my parents and closest friends helps me to keep my enthusiasm for doing the assignments. If I had the rest time, I often to do exercising, listening to music and chatting with my friends.

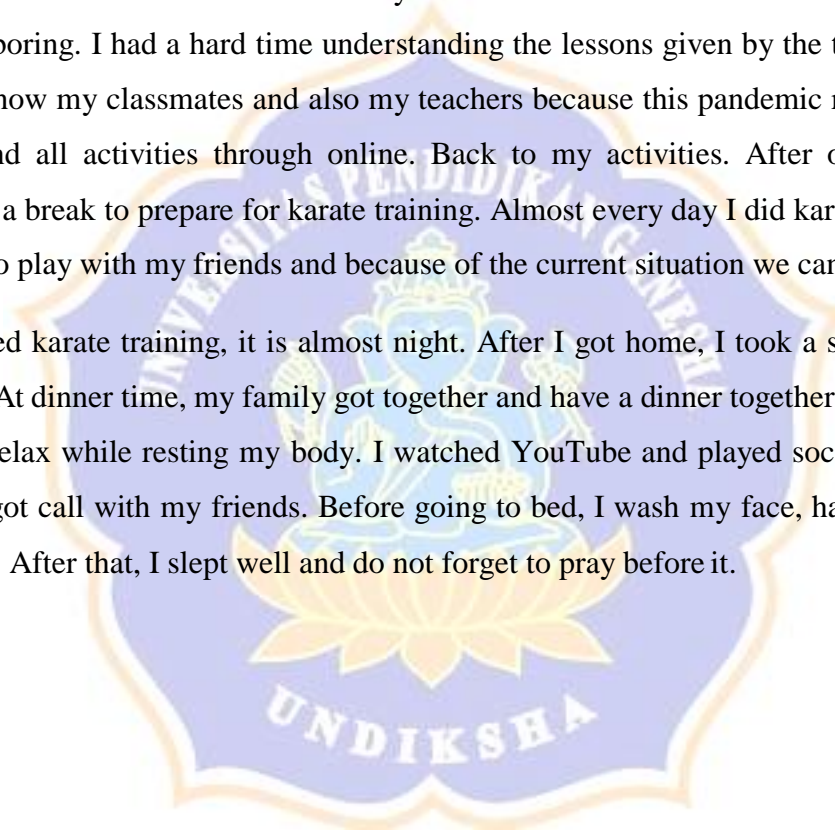

Recount Text 4

For a few months ago, my activities during this Corona pandemic were online school and karate training. I wake up at 04.30 to start my day. First, I will go to the bathroom and wash my face as well as ablution to pray Fajr. After finished I relax while waiting for the sunrise. Sometimes I take a morning walk to breathe the fresh air. After that, I help my mom to clean the house and cook for breakfast.

Before starting the online school, I took a shower and then had a breakfast. After that, I prepared lessons for the online school that day and started the online school. Honestly, online school was so boring. I had a hard time understanding the lessons given by the teacher. Until now I do not know my classmates and also my teachers because this pandemic requires us to work, study and all activities through online. Back to my activities. After online school finished, I take a break to prepare for karate training. Almost every day I did karate, until I do not have time to play with my friends and because of the current situation we cannot meet.

I finished karate training, it is almost night. After I got home, I took a shower then I pray Maghrib. At dinner time, my family got together and have a dinner together. Then I go to my room and relax while resting my body. I watched YouTube and played social sent some messages and got call with my friends. Before going to bed, I wash my face, hands, feet and brush my teeth. After that, I slept well and do not forget to pray before it.

Recount Text 5

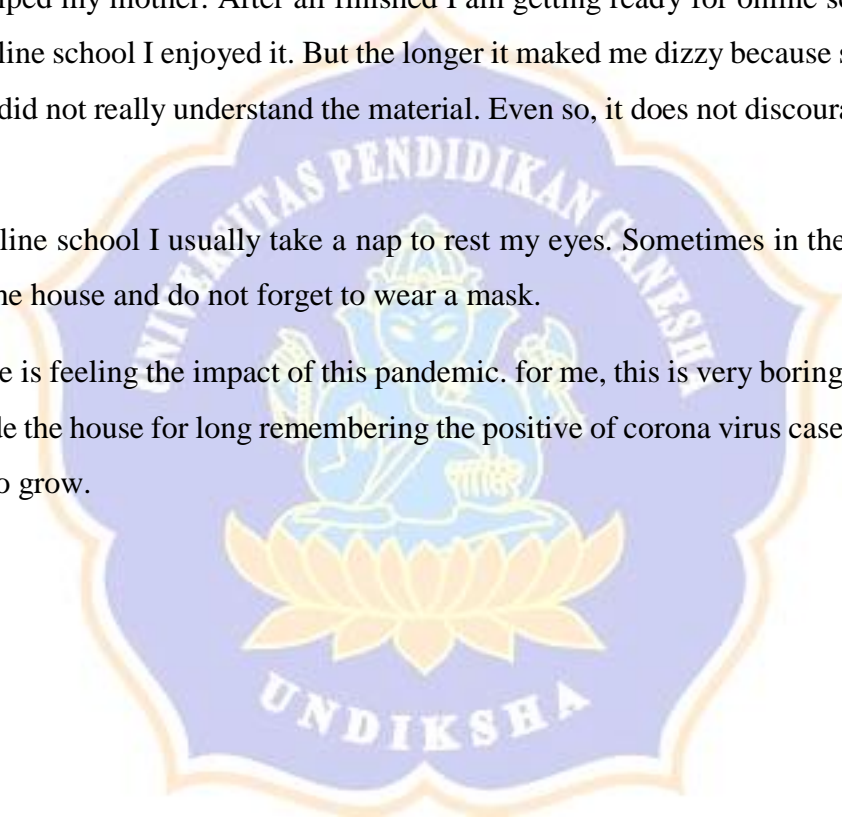

My Activities during the Covid-19 Pandemic

In the last eight months, I had to reduced my actives outside the home because of the Covid-19 virus pandemic. This also helped the government to reduce the spread of the virus. In addition, the government also implemented social distancing, especially in public places and even closed them

While at home, there are many activities that I could do, such as taked walk in the morning and helped my mother. After all finished I am getting ready for online school. In the early days of online school I enjoyed it. But the longer it maked me dizzy because school is not like usual and I did not really understand the material. Even so, it does not discourage me from studying.

After online school I usually take a nap to rest my eyes. Sometimes in the afternoon I cycled around the house and do not forget to wear a mask.

Everyone is feeling the impact of this pandemic. for me, this is very boring because we cannot be outside the house for long remembering the positive of corona virus cases and deaths that continued to grow.

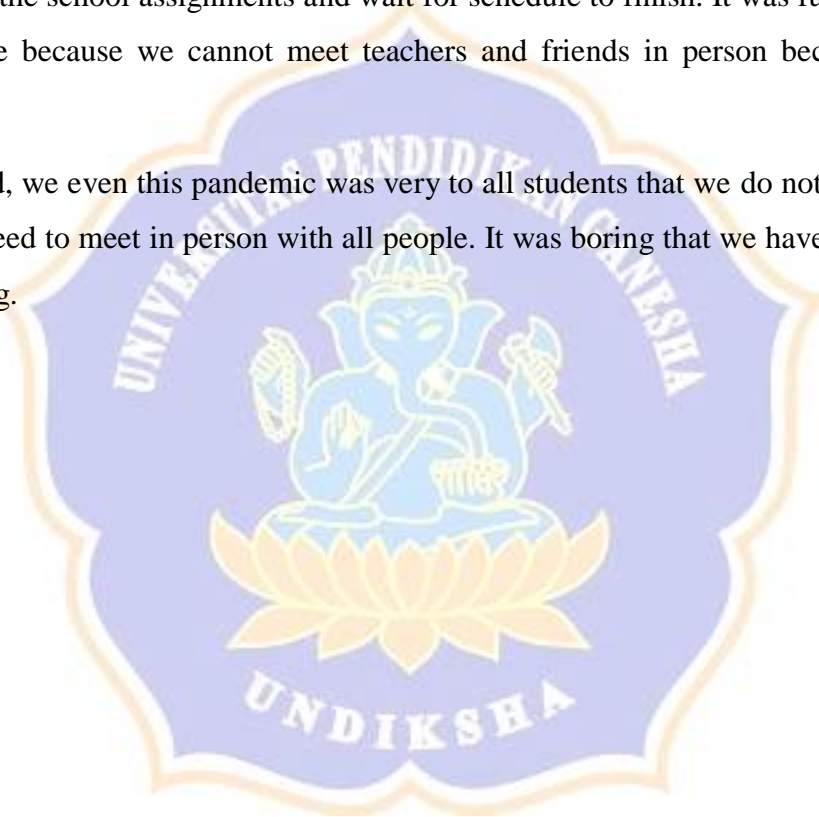

ACTIVITIES DURING PANDEMIC

In Indonesia, all the students starting from kindergarten until the university start studying from their own home because Covid-19. First day, I am so happy that I could woke up late in the morning and there is no school. I can playing with my 8 cats, play online games with my friends and I do not need to wearing school uniform.

Our online school was just simple, we just have to woke up in the morning and standby from 7 a.m. I do the school assignments and wait for schedule to finish. It was fun but boring in the same time because we cannot meet teachers and friends in person because of this pandemic.

In the end, we even this pandemic was very to all students that we do not had to go to school, but we need to meet in person with all people. It was boring that we have to stayed in home all day long.

My Activities during the Pandemic Covid-19 Virus Outbreak

Since the first case of Corona virus in Indonesia last month, the government swiftly decided to limit the social direct interaction and close the public places including schools.

As long as I am a student of SMA N 1 Cluring, I have never met my friends or teachers directly because the Covid-19 outbreak. The situation requires all students to learning online at home and it also makes us lazy. My parents complained a lot because online school which requires a lot of quota unlike usual. Beside online school used cellphone more often so that it made the cellphone slow, got hot easily, and the battery ran out quickly.

Moreover, the limit of sending the task is too fast. It is what I hated the most about online learning activities. Almost every day I have assignments that must be completed and submitted every day. I am dizzy and stressed if I am still doing my assignments and then are other tasks that have to be submitted at the same time. As a result, I am late in submit assignments, I was at home studying by myself and no one teach me because my parents worked so I had to study by myself. sometimes I also found difficulties while studying because I did not really understand the material

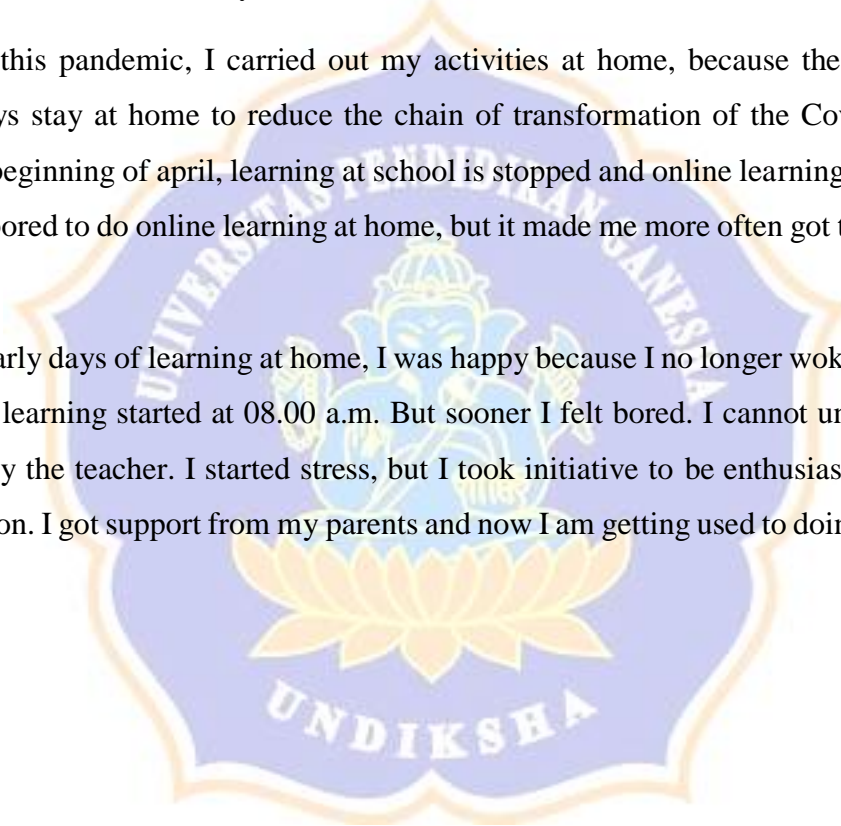

I could manage my time studying at home. I could be flexible in manage time such as when I do school work, help my parents, rest, worship and soon. I hope this pandemic will end quickly so that I can come back school and I can understand the material easier.

ACTIVITIES DURING A PANDEMIC

The Covid-19 virus had been endemic since the beginning of 2020. Many people feel burdened because of this pandemic. However, the existence of this pandemic should be able to divert our minds from what cannot be done to what can be done. Since this pandemic, people become more productive in carrying out their days. Many people started to selling online, creating a content and uploaded it on social media. besides, most people starting to like sports so that their bodies become healthy and can avoid this virus.

During this pandemic, I carried out my activities at home, because the government advise to always stay at home to reduce the chain of transformation of the Covid-19 virus. Starting at the beginning of april, learning at school is stopped and online learning is continued at home. I felt bored to do online learning at home, but it made me more often got together with my family.

In the early days of learning at home, I was happy because I no longer woke up as usual because online learning started at 08.00 a.m. But sooner I felt bored. I cannot understand the lessons given by the teacher. I started stress, but I took initiative to be enthusiastic no matter what the situation. I got support from my parents and now I am getting used to doing this online learning.

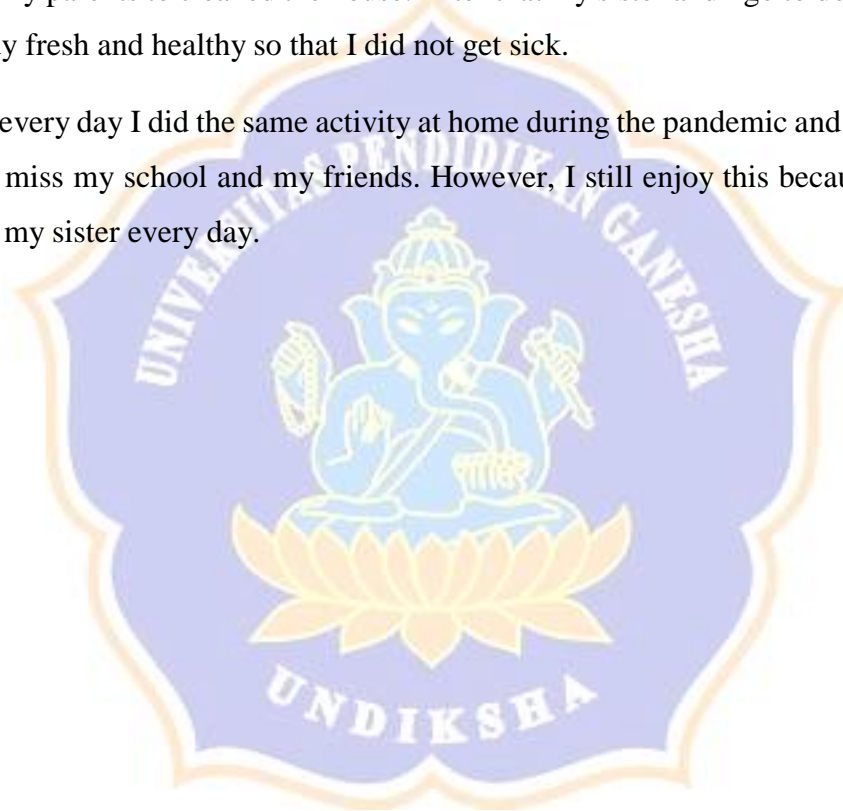

Activity during a Pandemic

For the last 8 months ago, I spend my days at home with my family. I cannot go anywhere because of the pandemic. I spend my time in front of television or watch various Korean drama. Sometimes, my family and I also garden together on the backyard.

Besides that, during the pandemic I also did online assignments given by the school. After completing the assignments, I usually took a nap and woke up in the afternoon. After woke up I help my parents to cleaned the house. After that my sister and I go to do jogging and it made my body fresh and healthy so that I did not get sick.

Almost every day I did the same activity at home during the pandemic and it looks very boring. I really miss my school and my friends. However, I still enjoy this because I can see my mother and my sister every day.

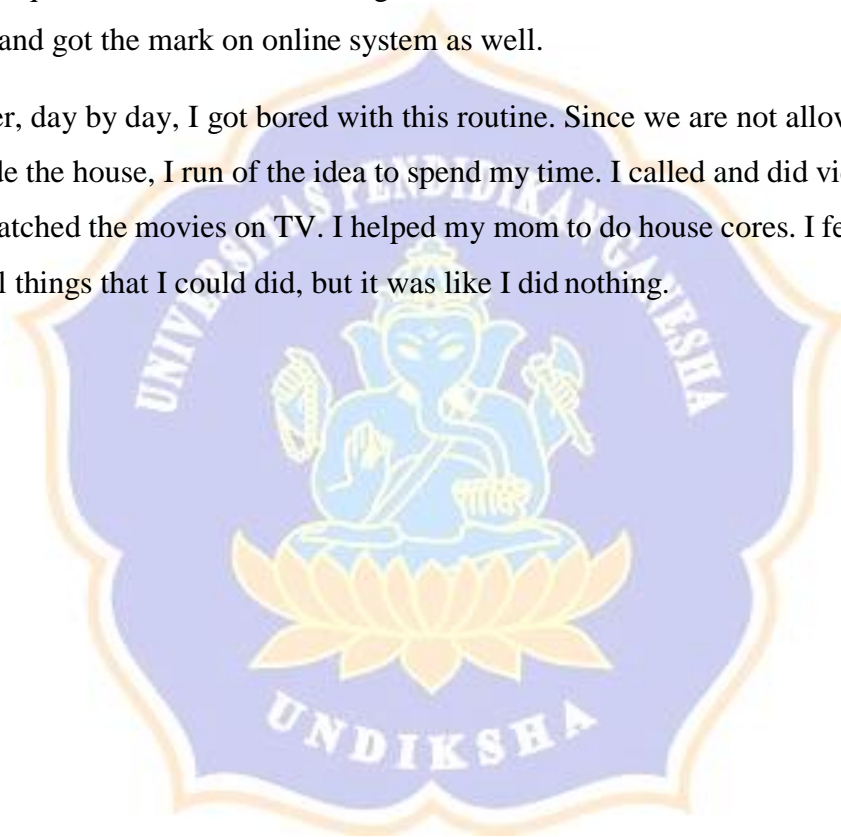

Recount Text 10

First week of day off I spent my time well. I enjoyed so much had most of the time at home. I could wake up late in the morning. I did not have to feel the traffic jam. I did need to wear my boring uniform to school. Though, my teacher still gave us some assignments to do through online system.

I had to stay to do my online school at 10.00 a.m. until the teacher said it has over. The assignments are quite the same as that we got at school, but we submitted the assignments through online and got the mark on online system as well.

However, day by day, I got bored with this routine. Since we are not allowed to do the activities outside the house, I run of the idea to spend my time. I called and did video call with my friends. I watched the movies on TV. I helped my mom to do house cores. I felt like I have already done all things that I could did, but it was like I did nothing.

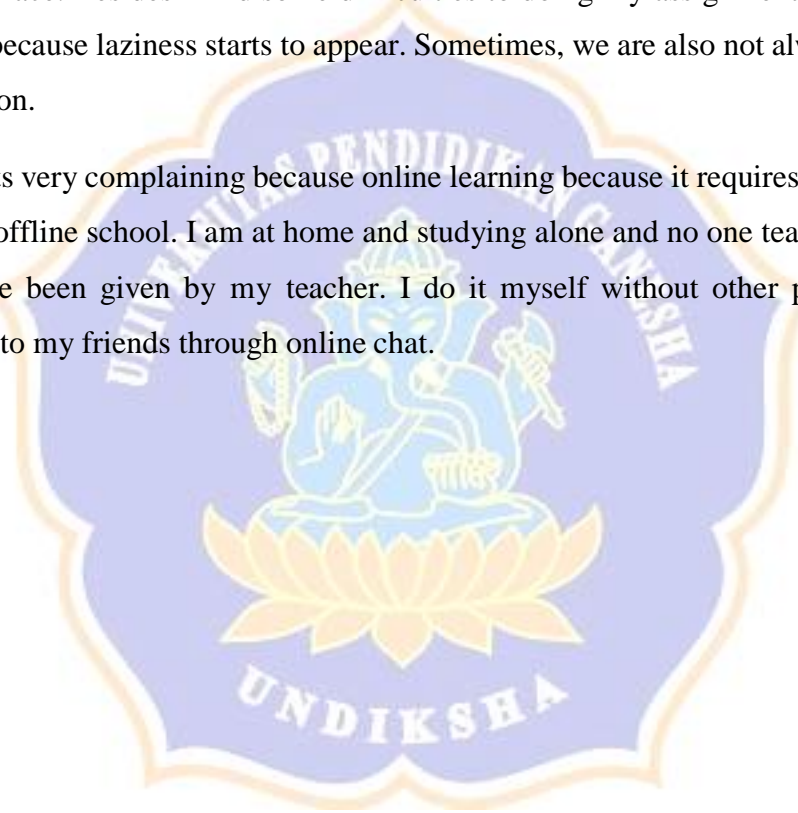

My Activities during Online Learning

In first month of covid 19 cases, I entered at the school for the first time at SMA N 1 Cluring. I have never meet my classmates or teachers at school. I feel happy if school activities are offline rather than online. Sometimes, some students in my class do not submitted their assignments because there is no one directly monitors them.

Actually, I am very bored with online school because I do not understand if it is not explained face to face. Besides I find some difficulties to doing my assignments. Sometimes, the task piles up because laziness starts to appear. Sometimes, we are also not always active in learning application.

My parents very complaining because online learning because it requires a lot of quota unlike usual like offline school. I am at home and studying alone and no one teaches me to do the task that have been given by my teacher. I do it myself without other people's help. Sometimes, I ask to my friends through online chat.

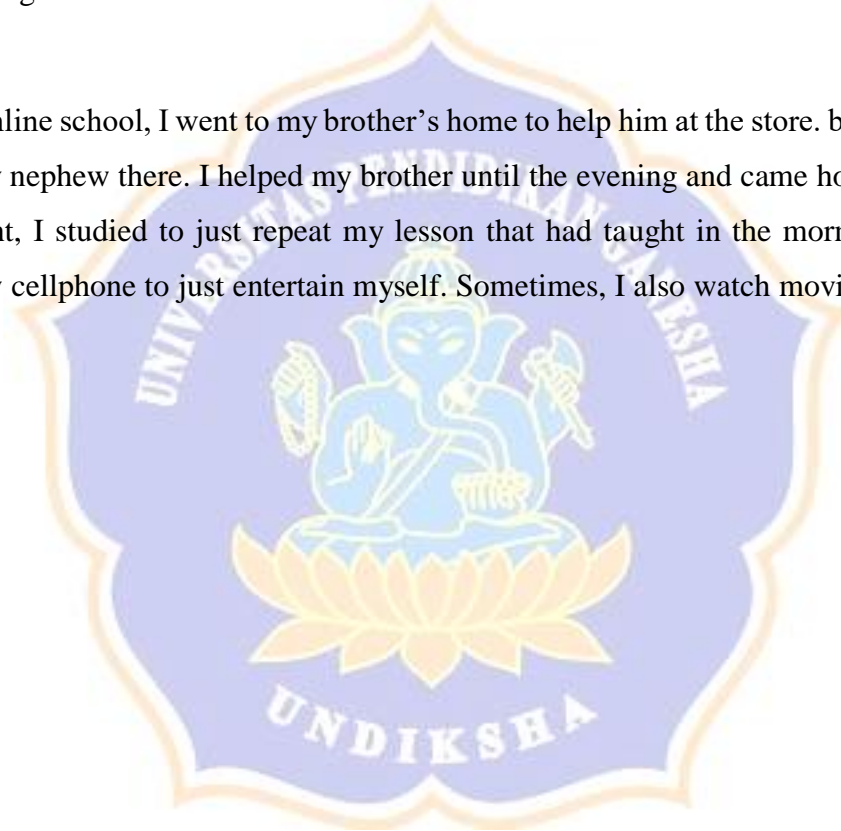

Recount Text 12

Pandemic covid-19 entered Indonesia on march 2020 and almost all schools are done through online system. All of activities are done at home and social interaction are limited. So, I do my activities at home to avoid the virus.

First, I wake up around 5 a.m. Then, I cleaned the bed and take a shower and get ready for prayer. After that, I went to watch TV until 6 a.m. I helped my parents prepare breakfast and then I prepare for my online school. I started my online school around 8 a.m. to 11 a.m., but if I have assignments I could work until the afternoon. I also took a rest in the middle of online school.

After online school, I went to my brother's home to help him at the store. besides, I also played with my nephew there. I helped my brother until the evening and came home to take a shower. at night, I studied to just repeat my lesson that had taught in the morning. Then, I played with my cellphone to just entertain myself. Sometimes, I also watch movies and ready to sleep.

Recount Text 13

The last 8 months ago, all of students did the learning process through online school. I did all my activities at home to avoid Covid19. I always woke up at 4 in the morning and I prayed at dawn prayers. After that, I usually walked in the morning. Then, I went to groceries in the market. In the market, I always buy porridge. When I got home, I helped my mother cook, clean the home and water the plants. After finished I took a shower and had breakfast together. Before Covid19, I usually went to school after I finish my breakfast, but because Covid19 all learning activities is done through online. During online learning activity, there are a lot of material that I did not understand.

Sometimes, I hang out with Tia. We usually go to get some foods and drink. Our activity to get rid of boredom, we playing the truth or dare challenge. Then, I got home and I changed my clothes. After that, I got my ablution for prayer. After I finished I take a nap. In the afternoon, I am told to go to the store to buy groceries for dinner. Then, I helped my mom to prepare dinner and clean the house. After that, I take a shower. While waited for the evening prayer, I play the phone and chat with my family. After that, I took ablution and did the prayer together with my family. After prayed, I get ready for lesson and waited for Tia to come home and started for study.

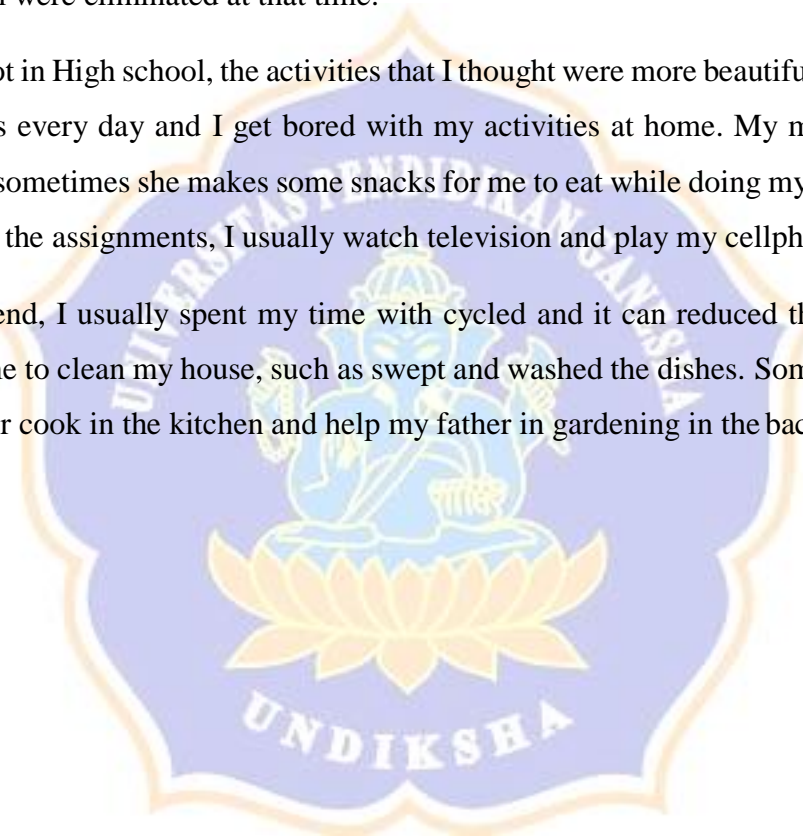

Sometimes I go to my aunt's house to help her to make birthday cakes. My aunt has cake shop that is quite busy every day. Sometimes, I just helped to beat the mixture and taste the cake. After helped my aunt, I carry my cousin to play together. She is very cute and adorable. Sometimes I take her to my home. My cousin rarely cries so it is not difficult for me to take care of her. After my cousin fell asleep, I went home and washed my face and brushed my teeth. Then, got ready to sleep.

ACTIVITIES DURING PANDEMIC COVID 19

Since the Covid-19 case in Indonesia spread, the government decided to close school. At that time, I was still in Junior High school. I was very happy to hear the information that we had a long holiday school. I thought it would be fun without any assignments and activities at school. But I was still given assignments through online system by my teacher and the assignments had to be collected on time. All activities at school turned into school online and the national exam were eliminated at that time.

When I got in High school, the activities that I thought were more beautiful were wrong. I got assignments every day and I get bored with my activities at home. My mother tries to cheer up me and sometimes she makes some snacks for me to eat while doing my assignments. After finished all the assignments, I usually watch television and play my cellphone.

On weekend, I usually spent my time with cycled and it can reduced the boredom. I also spare my time to clean my house, such as swept and washed the dishes. Sometimes, I also helped my mother cook in the kitchen and help my father in gardening in the backyard.

MY ACTIVITIES DURING THE PANDEMIC

Since the COVID-19 case entered Indonesian in last February, the Indonesian government immediately took the decision to limit large scale social interactions and closed public places. One of public places which had closed was school.

At first, I thought this long holiday would give me some time to have fun, but it was not like what I thought. The first day, there was no something to do at home. However, I did my online school at home and could not meet my friends. There were more assignments that I had to do and it should be submitted with the specified time.

During at home, I do not have any interesting activities to do. Sometimes I only lied on my bedroom and played an online game. I also helped my mom to clean the house and watched korean dramas to spend my time.

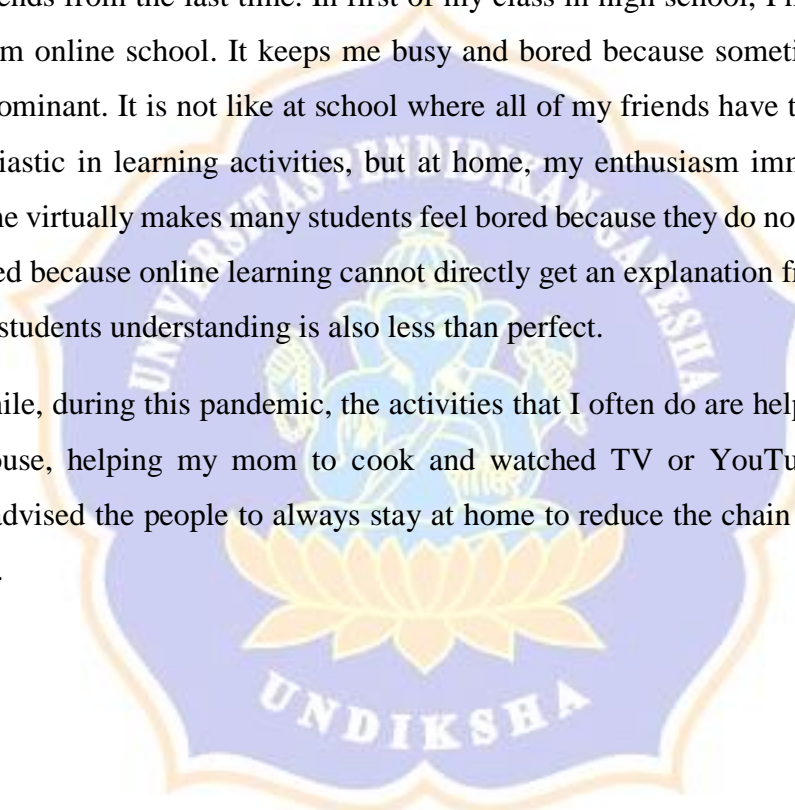

My Activities during the Pandemic

Corona virus was starting on March 2020. Government Indonesian determined that all activities outside home must be completely replaced by online system until undetermined time.

School activities are stopped and learning process was continued at home. At first, I thought that it would be a long holiday and I would have fun. However, all those happy thoughts were over. At that time, I was still in 9th grade junior high school and I feel sad because I could not meet my friends from the last time. In first of my class in high school, I have to do some assignments from online school. It keeps me busy and bored because sometimes laziness at home is more dominant. It is not like at school where all of my friends have the same goal to be more enthusiastic in learning activities, but at home, my enthusiasm immediately fades. Learning at home virtually makes many students feel bored because they do not understand the material provided because online learning cannot directly get an explanation from the teacher. So, the level of students understanding is also less than perfect.

Meanwhile, during this pandemic, the activities that I often do are helping my mother to clean the house, helping my mom to cook and watched TV or YouTube because the government is advised the people to always stay at home to reduce the chain of transmission of Corona virus.

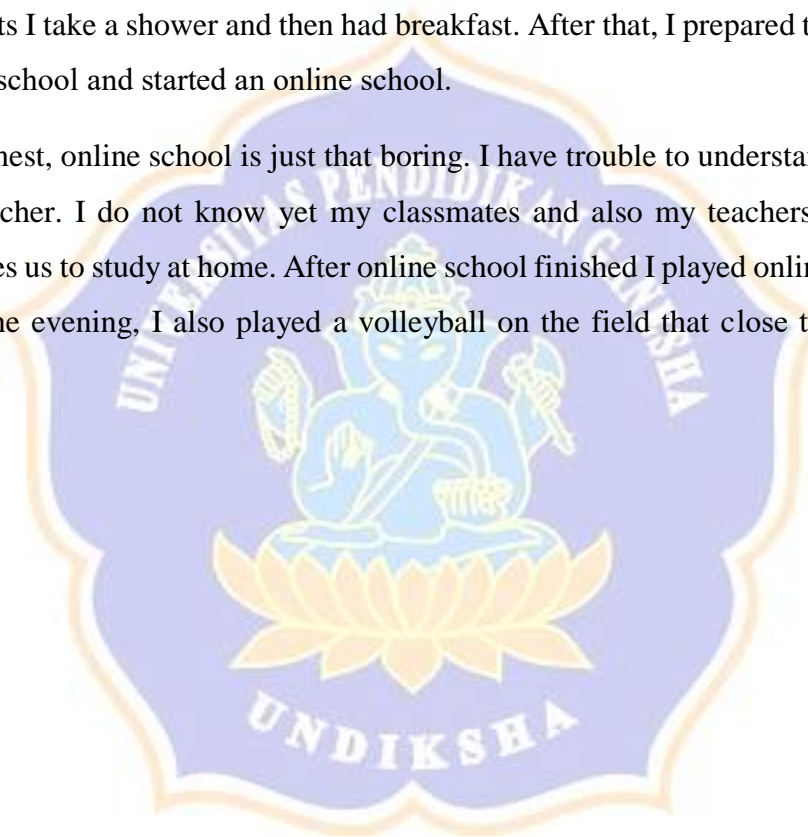

Recount Text 17

Since the outbreak of the Corona virus, Indonesian government implemented a system of work, study and worship from home. All activities are recommended to be carried out at home because the virus quickly infects many people and can causes death. So that all schools, offices, places of worship, and factories were closed. Likewise, teaching and learning activities that must be done through online.

Before online school was started I helped my parents to clean my hose. After I finished to help my parents I take a shower and then had breakfast. After that, I prepared the lessons for the day's online school and started an online school.

To be honest, online school is just that boring. I have trouble to understand the lessons given by the teacher. I do not know yet my classmates and also my teachers because this pandemic requires us to study at home. After online school finished I played online games with my friends. In the evening, I also played a volleyball on the field that close to my friend's house.

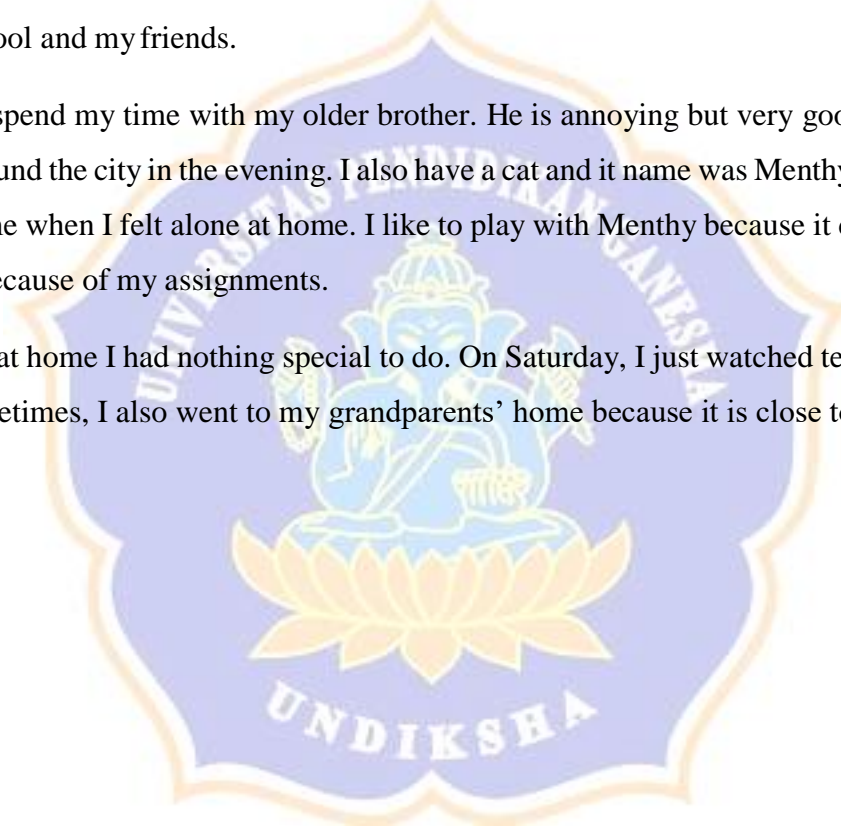

Activities during the Pandemic

Since the coming of Corona virus 8 months ago, the government had set health protocol rules to limit social interaction. The government also closed several crowded places, such as; supermarkets, schools and others public places. When the school was closed, initially I thought it was fun getting a long holiday. But everything was wrong and it is not fun because I have to follow online school. Online school made me busy and made me get bored with the assignments. I did it every day until I felt bored and wanted to go to school again. I really missed my school and my friends.

I often spend my time with my older brother. He is annoying but very good at me. We often travel around the city in the evening. I also have a cat and its name was Menthy. He always accompanied me when I felt alone at home. I like to play with Menthy because it could relieve my tiredness because of my assignments.

During at home I had nothing special to do. On Saturday, I just watched television and YouTube. Sometimes, I also went to my grandparents' home because it is close to my home.

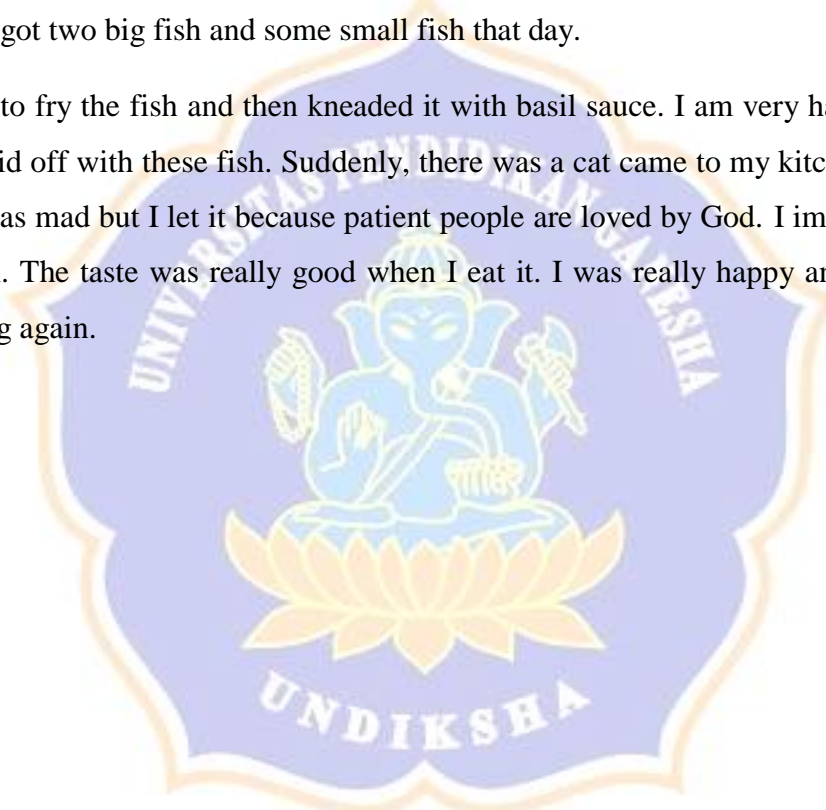

Recount Text 19

One day in pandemic holiday, I went fishing in the river to reduce my boredom. That day was a great day for fishing because I was usually busy with my online school. First of all, I went to the market to buy tempeh that I would use for bait. I mixed tempeh, rice, garlic, and turmeric until it was smooth. After that, I went to the river and started fishing.

In the river, I looked for the best place for fishing. I went to a near a public cemetery. I immediately set the bait and threw my hook into the calm current. After a while waiting, finally a fish caught on my hook. That fish was large enough. Then, I followed the river to search of a better place. I got two big fish and some small fish that day.

I would to fry the fish and then kneaded it with basil sauce. I am very happy because my tiredness paid off with these fish. Suddenly, there was a cat came to my kitchen and stole my big fish. I was mad but I let it because patient people are loved by God. I immediately fry some small fish. The taste was really good when I eat it. I was really happy and someday I would go fishing again.

ACTIVITIES DURING THE CORONA PANDEMIC

Since there was a case of the Corona virus, the government has issued a warning to cancel all activities at school and replace them with online learning. all of Indonesian students were obliged to do all learning activities at home and avoided the activities outside.

I had several problems while I studied at home, such as, the internet quota problem and the signal was not good. Besides, it is not easy to understand the material presented by the teacher. The explanation from the teacher is not optimal. it made me confused in understanding the material.

After I finished my online school, I usually went to house grandmother to keep the shop and help to serve when there were buyers. Besides, I also take care of my sister, play together with her, and watch some videos on youtube. I came home in the evening to help my mom to wash the dishes and sweep the floor. Sometimes after I clean the house, I go to exercise around the house, like playing badminton or jogging.

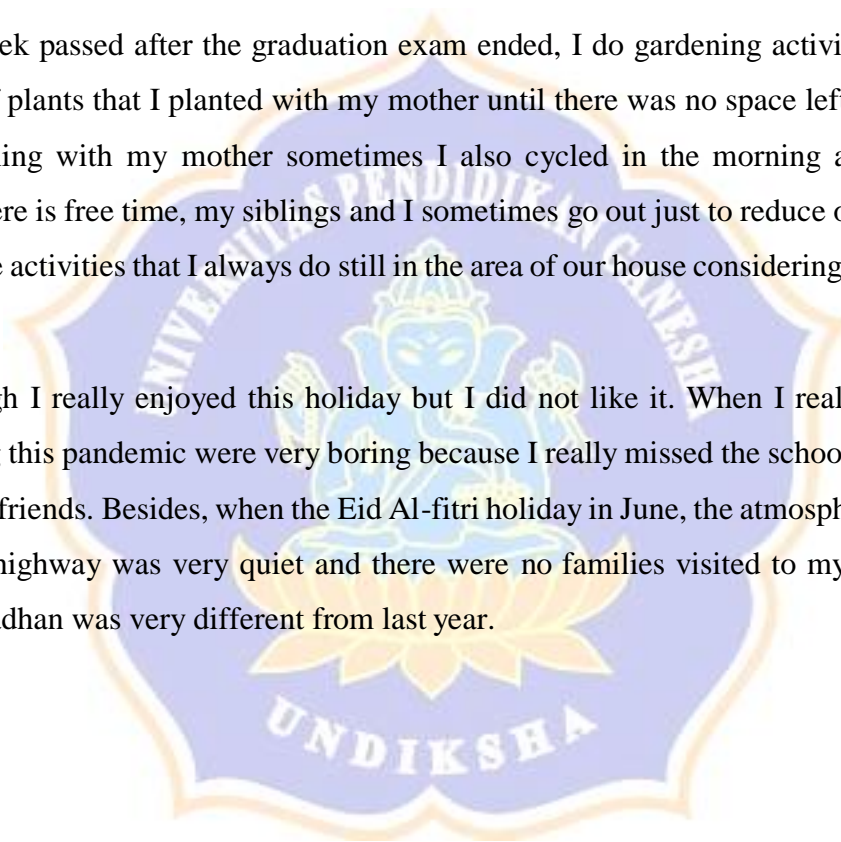

ACTIVITIES DURING THE PANDEMIC

About 8 months ago due to the Corona virus which was increasingly spreading in various countries including Indonesia. All public places were closed and started carrying out activities at home. At that time, I was in my junior high school and do practice exam. I took my lessons through online school. I have a lot of practical exams and assignments to do at home. When the graduation exam ended, I am very happy because I can enjoy the holiday. Many things I do during this pandemic.

One week passed after the graduation exam ended, I do gardening activities with my mother. Lots of plants that I planted with my mother until there was no space left in our yard. Besides gardening with my mother sometimes I also cycled in the morning and prepared breakfast. If there is free time, my siblings and I sometimes go out just to reduce our boredom. But even so, the activities that I always do still in the area of our house considering the situation is not safe.

Although I really enjoyed this holiday but I did not like it. When I realized that the holidays during this pandemic were very boring because I really missed the school atmosphere and missed my friends. Besides, when the Eid Al-fitri holiday in June, the atmosphere was very different. The highway was very quiet and there were no families visited to my house. Last month of Ramadhan was very different from last year.

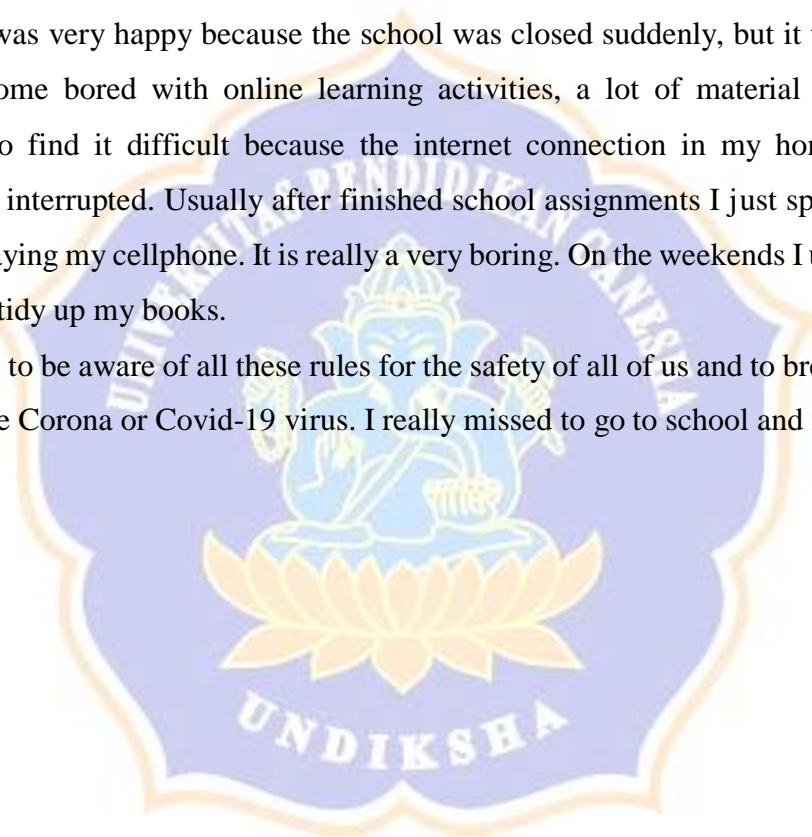

Studying at Home because of Covid-19

Since the outbreak of the corona virus or covid-19, the Indonesian government has implemented a system of work, study and worship from home. All activities are recommended to be carried out at home because this virus quickly infects many people and can cause death. So that all schools, offices, places of worship, and factories are all closed. Likewise with teaching and learning activities that must be done through online.

At first I was very happy because the school was closed suddenly, but it turned out to be wrong. I become bored with online learning activities, a lot of material that I didn't understand. I also find it difficult because the internet connection in my home area and sometimes it gets interrupted. Usually after finished school assignments I just spend my time on the bed and playing my cellphone. It is really a very boring. On the weekends I usually clean the bedroom and tidy up my books.

But I have to be aware of all these rules for the safety of all of us and to break the chain of carrying out the Corona or Covid-19 virus. I really missed to go to school and friends.

My Activities at Home during the Pandemic

Since the Corona virus had hit various countries, especially Indonesia, the government had decided several rules in handling Covid-19. One of the rules is large-social restriction. The government urged us to do all activities at home. Since last March, I had been doing my activities at home, such as online school. It makes me a little bored.

In the morning before online school started, I was helped my mother to cook for our breakfast. I also sweep the floor and wash the dishes. After that, I took a bath around 6.25 a.m. I also had my breakfast before online school. Because in my opinion, breakfast is important to generate our energy and increase our concentration while studying.

At 07.00 a.m. online school activity was started. The teacher started the lesson by checking a list of students' attendance. After the teacher gave the assignment. Each teacher gives assignments with different collection method. Some teacher asked the students to collect the assignments through Google class, Google form, class Q application or through WhatsApp group. The assignments are collected according to the teacher's order. The provision of the material also varies, some of them provided the material via YouTube or sent the material in the form of files.

After the online learning is over, I went to take a break, pray and had lunch. In the afternoon, I exercised in the yard of the house. In this situation, body health is needed. As usual in the evening, I was studied for tomorrow's subjects. Sometimes, I also repeat the material that I have studied in the morning. After that, I prepared the books that I needed for online school the next day. I went the bedroom to sleep at night, so that I do not wake up late and I set the alarm.

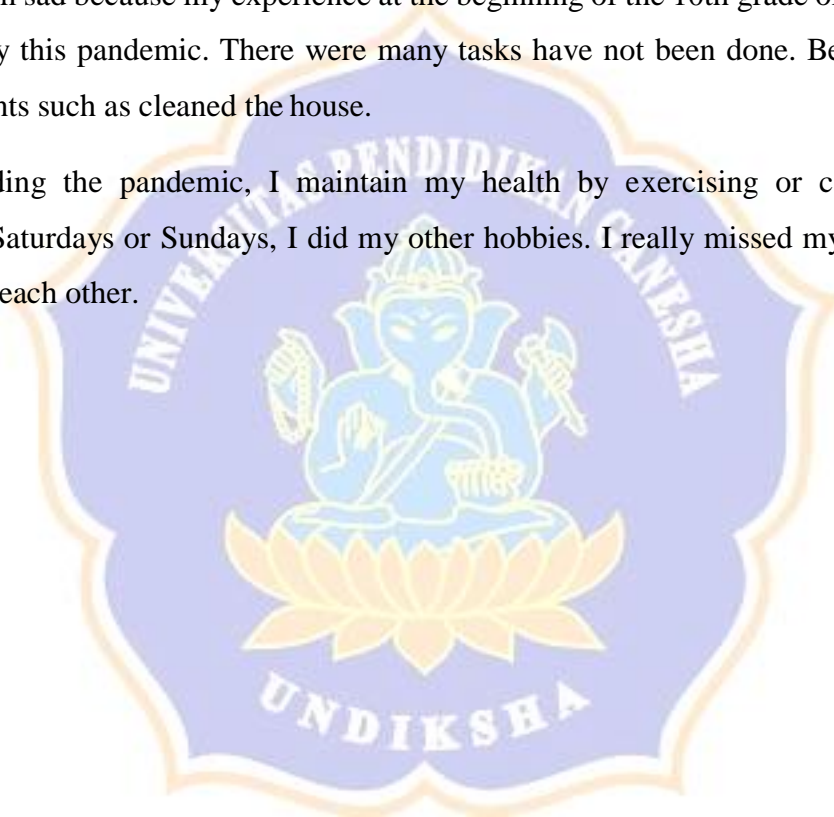

I feel bored. Sometimes, I did something to refresh myself. I watched movies, read novels, and made some crafts. I love to do that, because it can get rid of feeling tired and boredom. So I kept my spirit even though I only do activates at home. I prayed that Covid-19 will end soon so that we could carry out our activities like before.

Recount Text 24

Since the existence of the Covid19 in Indonesia on March 2020, some public places such as school had been closed. At first I was happy because I had time off. I could have fun with my family and hopefully I could play with friends or do my hobbies but everything was not like that. The government turned out to limit social interactions that people had to initially obey the rules of the government.

In the midst of a pandemic, I had graduated from junior high school and started to enter high school. I am sad because my experience at the beginning of the 10th grade of high school was hindered by this pandemic. There were many tasks have not been done. Besides, I also helped my parents such as cleaned the house.

In avoiding the pandemic, I maintain my health by exercising or cycle around. Sometimes on Saturdays or Sundays, I did my other hobbies. I really missed my friends and wanted to meet each other.

Recount Text 25

Three weeks ago, I started to study at home because of corona virus. My teacher said that we must stay at home and we did not let to go to the crowded places like mall or supermarket. Besides, I had to wear a mask when I went out to public places.

My teacher gave us many assignments such as social, science, Indonesian language, English Language, arts and so on. My teacher also ordered us to send to their email if we had finished our assignments. I had to finish my assignments on time to get my score. Sometimes, I studied my subjects from internet and it was little bit helped me to do my assignments.

I like to spend my time with another activities such as watch korean dramas or read some novels on my phone. To be honest, I feel so bored with my activities during the pandemic because I could not meet my friends and I should stayed at home to avoid the virus.

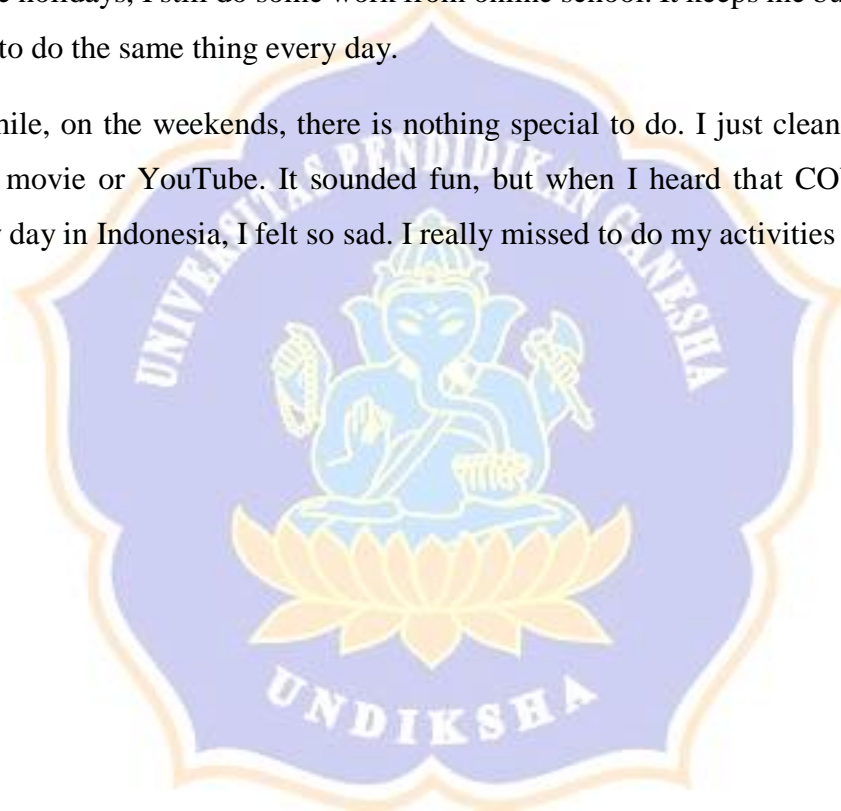

My Activities during the Pandemic

Since the first case of Corona virus or COVID-19 in Indonesia on last February 2020, the Indonesian government had swiftly decided to limit the direct social interaction and closed some public places including schools.

The first time I heard the news that the school activities were stopped, I felt very happy because I thought that I had a long weekend and I would had fun, but all of my thoughts are over. During the holidays, I still do some work from online school. It keeps me busy and bored because I have to do the same thing every day.

Meanwhile, on the weekends, there is nothing special to do. I just cleaned the house and watched a movie or YouTube. It sounded fun, but when I heard that COVID-19 case increased every day in Indonesia, I felt so sad. I really missed to do my activities outside.

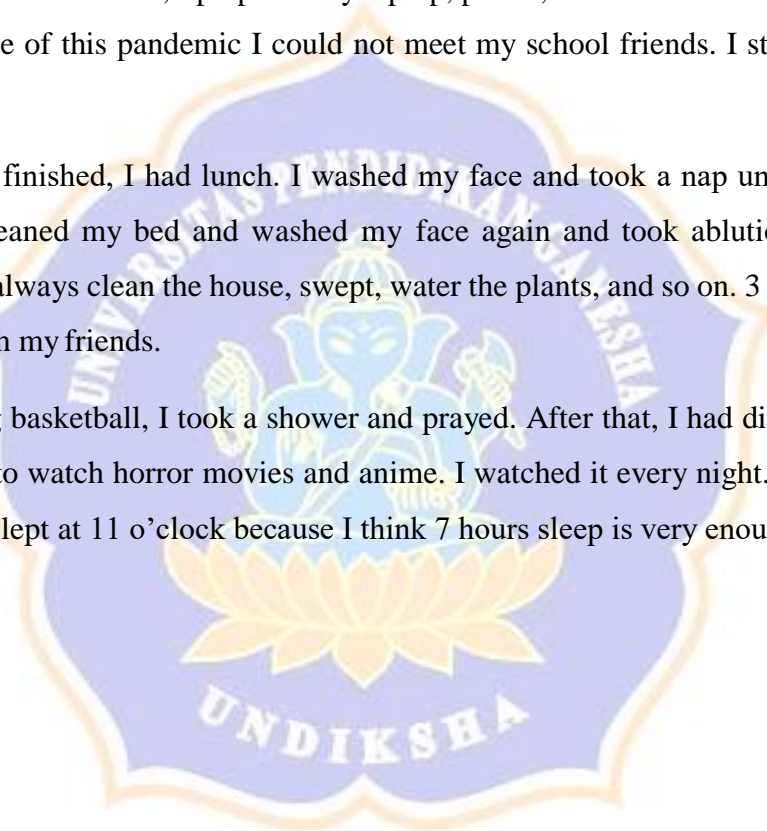

Recount Text 27

A few months ago, I did all my activities at home because of Covid19. I usually wake up at 6 o'clock in the morning. Then I drinking 2 glasses of water and I feel very fresh after I drunk water. I always clean the bed because my mother taught me to tidy up the bedroom since I was child. I also always wash my face and brush my teeth. Then I did 15 minutes of cardio on YouTube while listened to a song. I think that it really helped my mood and also keeps my body healthy. I never had breakfast because I was not used to do it.

I take a shower at 7. Then, I prepared my laptop, phone, and books for online school. I was very sad because of this pandemic I could not meet my school friends. I starting school online at 7 to 12.

After school finished, I had lunch. I washed my face and took a nap until 2 o'clock. After woke up, I cleaned my bed and washed my face again and took ablution water and continued to pray. I always clean the house, swept, water the plants, and so on. 3 to 5 o'clock, I play basketball with my friends.

After playing basketball, I took a shower and prayed. After that, I had dinner with my family. I really like to watch horror movies and anime. I watched it every night. Before went to sleep, I prayed. I slept at 11 o'clock because I think 7 hours sleep is very enough.

Recount Text 28

Since the Covid-19 case, I did not go to school because the school was closed. I thought I would have a long vacation and I can relax at home all day. Apparently not, teachers still gave me some assignments through online system.

While waited for assignments from the teacher, I usually has breakfast. After breakfast I did all the assignments given by the teachers. Even though there are some obstacles such as bad signal, I am still enthusiastic to do all my assignments and sent them to my teacher.

After school online, I prayed at noon. Then, take a short break while. Sometimes, I played my phone and watched YouTube or a movie. In the afternoon, I go to play football with my team in the field. I really like to play football because I want to be a professional soccer player.

My Activities during the Pandemic

Since the beginning it was decided that the Covid19 virus entered Indonesia, I was initially happy because I had two weeks off. I could have fun with my family. In my expectations I could walk around the city or go out of town but everything was wrong. It turns out that the government set limits on social interaction very tight.

In the middle of the pandemic, I started to enter high school. I am sad because my experience in early 10th grade of high school was taken away by this pandemic. There are many tasks that had not been done, but I still did my tasks well. I also did some activities such as helped my mom to cook or swept the floor.

On weekend morning or evening, I and my friends cycled around to maintain our health. I have cycling community with my friends and sometimes we cycled around the city. We did not forget to obey protocol rules such as wear a mask. This activity could reduce my boredom on the weekend.

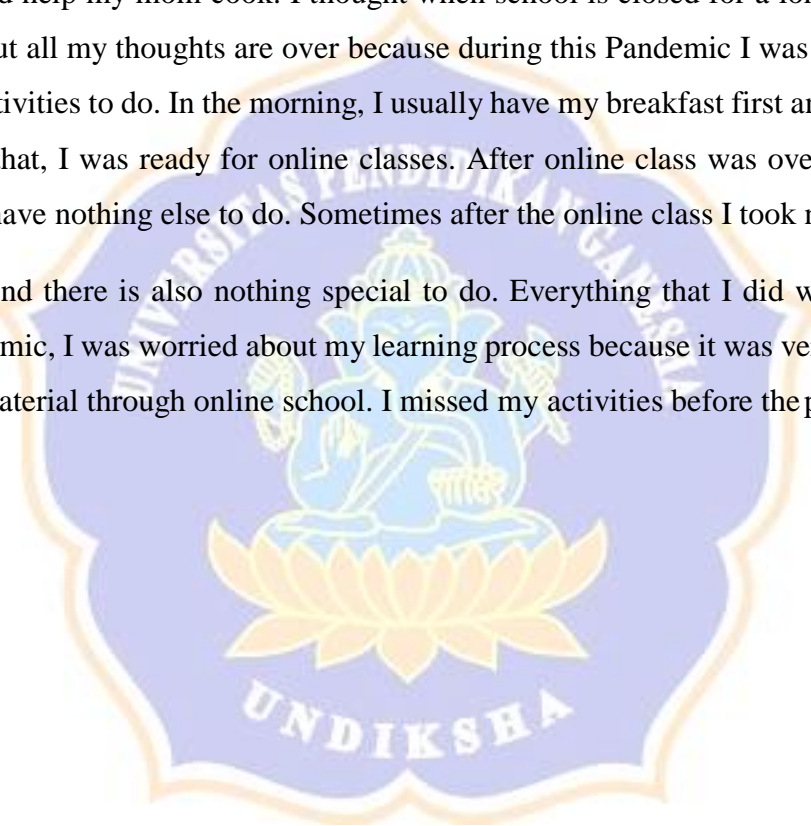

MY DAILY LIFE DURING THE COVID-19 PANDEMIC

Since the COVID-19 case entered Indonesia in last February, Indonesian government immediately took the decision to limit large-scale social interactions, such as implementing online school for all Indonesian students.

During this COVID-19 Pandemic I woke up at 4 o'clock to carry out my obligations as a Muslim. Then, I helping my mother before the online class started, such as sweep the floor, clean the bed, and help my mom cook. I thought when school is closed for a long time I will have fun time. But all my thoughts are over because during this Pandemic I was very bored. I have the same activities to do. In the morning, I usually have my breakfast first and then I took a shower. After that, I was ready for online classes. After online class was over, I was very bored because I have nothing else to do. Sometimes after the online class I took nap.

On the weekend there is also nothing special to do. Everything that I did was the same. During the pandemic, I was worried about my learning process because it was very difficult in understand the material through online school. I missed my activities before the pandemic.

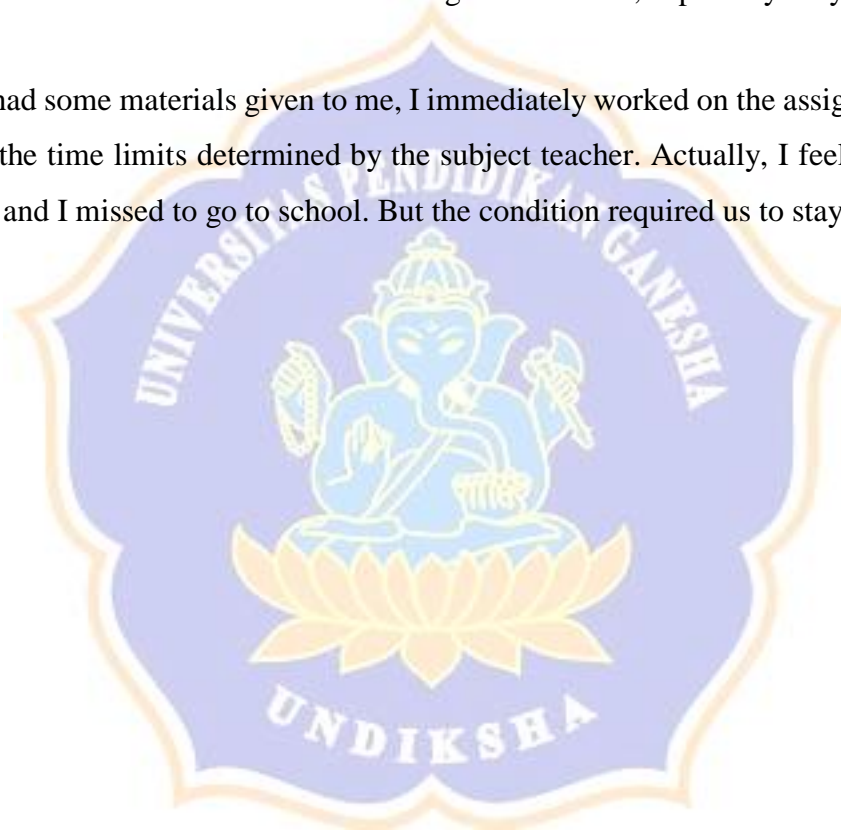

Recount Text 31

At the start the Covid19 outbreak, I did online learning that had been determined by the government. Before started the lessons, I always have my breakfast first and I start to prepare whatever that I use for online learning. While waited for an assignments from my teacher, I have another activity, namely caring for my pet birds.

Recently, I have been busy with an activity that I found quite enjoyable. This activity is more of a hobby. There is a community for Canary fans and I am the one of them. Canaries are types of birds that are tame to the surrounding environment, especially they are close to humans.

After I had some materials given to me, I immediately worked on the assignments until it finished and the time limits determined by the subject teacher. Actually, I feel bored to do online learning and I missed to go to school. But the condition required us to stay at home.

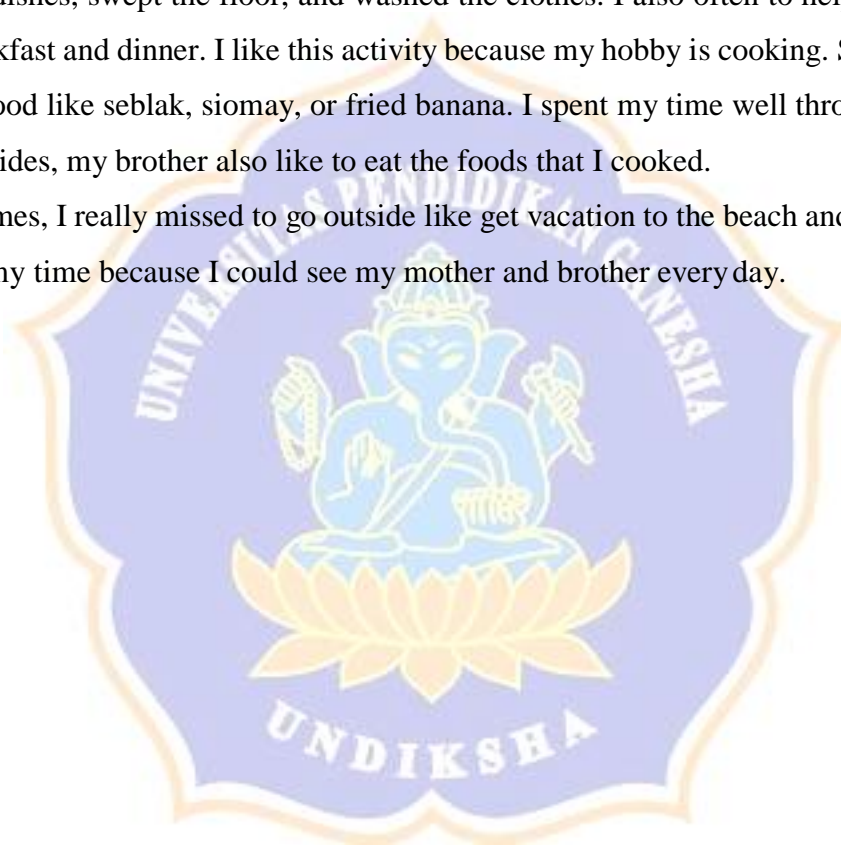

Recount Text 32

I spent my day at home for the last four weeks. I did not go anywhere because of the Corona outbreak. I spent my time in front of television or play online game with my brother and my mother. My mother bought me new mobile phone. She said that it was better to play online game than play outside the house during the pandemic.

I usually woke up without alarm and took a bath when my mother asked me. After that, I played with my cat, watched television, and play online game. I also helped my mother, such as washed the dishes, swept the floor, and washed the clothes. I also often to help my mother to prepare breakfast and dinner. I like this activity because my hobby is cooking. Sometimes, I cooked some food like seblak, siomay, or fried banana. I spent my time well through cooking something. Besides, my brother also like to eat the foods that I cooked.

Sometimes, I really missed to go outside like get vacation to the beach and the cinema. But I enjoyed my time because I could see my mother and brother every day.

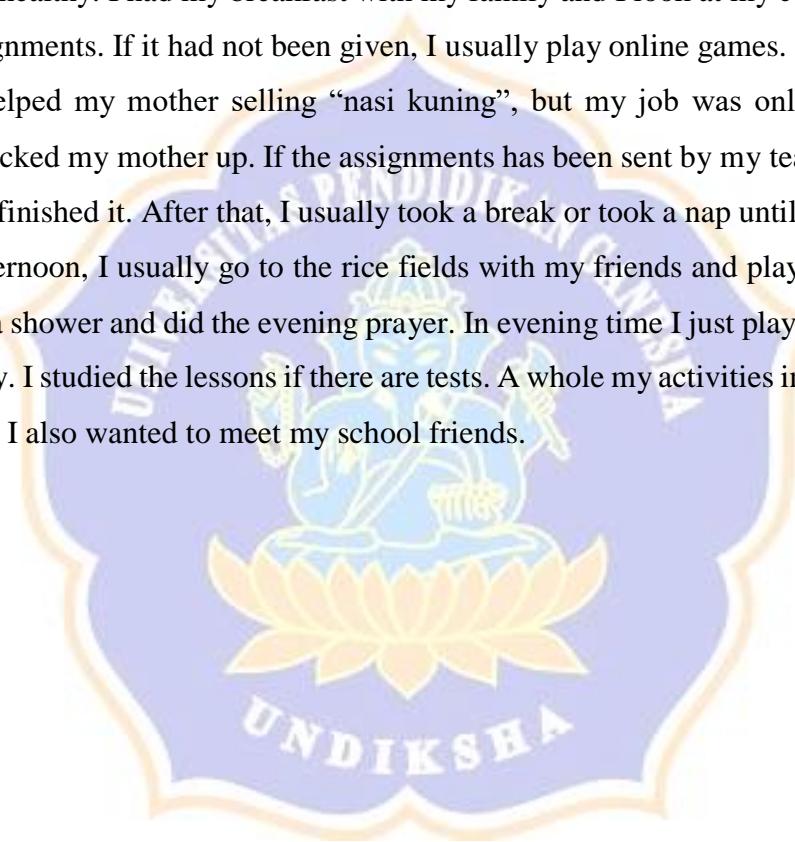

My Activities during the Pandemic

The pandemic forced us to do the things from home to avoid get contacted with other and get infected with the virus. It had been 8 months and I do all my activities at my home. I wake up in the morning. I checked my cellphone to see whether the assignments were already given or not. Then, I take a shower to clean my body. After that, I did exercise for a while to get sweat and be healthy. I had my breakfast with my family and I look at my cellphone again to check the assignments. If it had not been given, I usually play online games.

I often helped my mother selling “nasi kuning”, but my job was only to bring the groceries and I picked my mother up. If the assignments has been sent by my teacher, I did the assignments and finished it. After that, I usually took a break or took a nap until the afternoon.

In the afternoon, I usually go to the rice fields with my friends and play kites. Then, I go home to take a shower and did the evening prayer. In evening time I just play the cellphone. I also do not study. I studied the lessons if there are tests. A whole my activities in the pandemic was quite boring. I also wanted to meet my school friends.

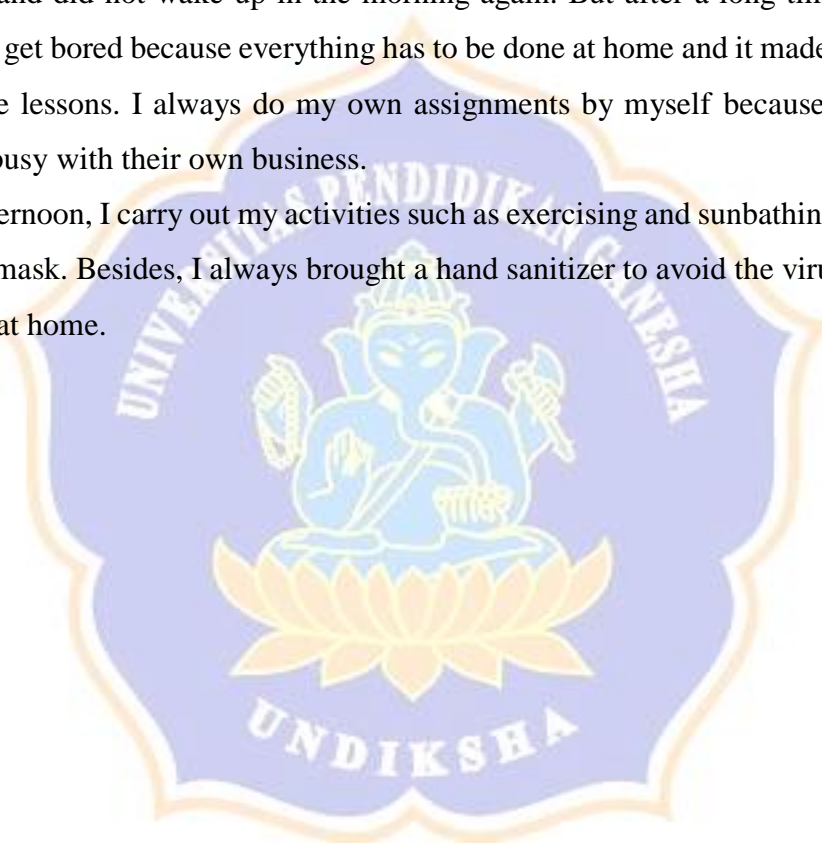

ACTIVITIES DURING A PANDEMIC

Last April 2020 the Corona virus pandemic spread in Indonesia. During this pandemic, all I did always keep my body clean and the cleanliness of my house. Besides, I did not leave the house if it is not too important. I also eat healthy and nutritious food.

In the morning, I woke up and did some activities such as washed clothes, took a shower, and did an online class. In my opinion online class was fun because I did not need to leave the house and did not wake up in the morning again. But after a long time did online class, I started to get bored because everything has to be done at home and it made me difficult to understand the lessons. I always do my own assignments by myself because everyone at home is always busy with their own business.

Every afternoon, I carry out my activities such as exercising and sunbathing and did not forget to wear a mask. Besides, I always brought a hand sanitizer to avoid the virus, but it was better if we stay at home.
