**ABSTRACT**

This study was conducted to find the effect of income owned by parents and students' motivation in learning on the learning outcomes of class IX students in Social Studies subject at SMP N 8 Singaraja during the COVID-19 pandemic. The variables used are parents' income (X1), learning motivation (X2), and learning outcomes (Y). This study uses a quantitative approach with a causal type. The population used was all students of class IX SMP N 8 Singaraja. Using a sample of 164 students. Probability sampling technique is a sampling technique with a random method. The data was collected using a questionnaire and documentation which later the data was analyzed by t test and F test on SPSS. From this research, it can be shown that there is an influence of income owned by parents and students' motivation in learning on a learning outcome obtained by class IX students of Social Studies subject at SMP Negeri 8 Singaraja during the COVID-19 pandemic.

**Keywords:** parent's income, learning motivation, learning outcomes.
